Subject: Angeles Forest Plan Errata: Designated Utility Corridors

To: Forest Leadership Team

The Angeles NF Land Management Plan, Part 2, page 19, erroneously lists designated utility corridors and existing uses in *Table 484, Designated Utility Corridors – Angeles National Forest*.

This table is corrected in the Angeles National Forest Land Management Plan Errata dated July 18, 2007 (see attached). The corrected table displays utility corridors as designated in the 1987 Angeles National Forest Land and Resources Management Plan, and as displayed in the Management Area Preferred Plan map for that plan.

The revised 2005 Forest Plan and 2006 Record of Decision (ROD) carried forward current uses, including designated utility corridors and existing uses within the corridors. The correction made by this errata therefore does not substantively change the information presented and does not affect the decisions in the ROD or the Forest Plan.

¹ The utility corridors listed in Table 484 as corrected were designated in the 1987 Angeles National Forest Land and Resources Management Plan (Forest Plan). The revised 2005 Forest Plan carried forward current uses, including designated utility corridors and existing uses within the corridors. Authorized transmission and distribution lines also exist within the Forest outside of these designated corridors.

² Area figures shown are based on GIS-digitized utility corridor boundaries as displayed in the *Management Area Preferred Plan* map of the 1987 Angeles National Forest Land Management Plan. Figures are approximate, and do not include private inholdings within the Angeles National Forest.

Designated Utility Corridor Locations

The utility corridors listed in Table 484 as corrected were officially displayed in the *Management Area Preferred Plan* map of the 1987 Angeles National Forest Land Management Plan. A vicinity map of the corridors can be viewed on the internet at www.fs.fed.us/r5/rsl/local-resources/images/clearinghouse/gis-download.shtml#sc. The corridors are located in the following sections within the Forest boundary.
