## Watauga Lake

### Watauga Lake

View from Watauga Dam looking across the lake toward Rat Branch Boat Landing.

<b>Location</b>	Carter / Johnson counties, Tennessee, USA
<b>Lake type</b>	Reservoir
<b>Primary inflows</b>	Watauga River, Elk River
<b>Max. length</b>	16.3 mi (26 km)
<b>Max. depth</b>	265 ft (81 m)
<b>Shore length<sup>1</sup></b>	104.9 mi (169 km)
<b>Surface elevation</b>	1,959 ft (597 m)

**Watauga Lake**, located southeast of Elizabethton, Tennessee, was created by the Tennessee Valley Authority (TVA) with the completion of the TVA Watauga Dam and Reservoir.

The Cherokee National Forest surrounds both the Tennessee Valley Authority **Watauga Reservoir** and Wilbur Reservoir in an area of northeast Tennessee that TVA describes as being located "...in some of the most beautiful country in the Tennessee River watershed."<sup>[1]</sup>

### History

Construction of Watauga Dam began in early 1942 but was curtailed later that year in favor of other wartime building efforts. Work on TVA Watauga Dam resumed in 1946, and finished at the end of 1948, impounding

both the Watauga River and Elk River for the purposes of flood, hydropower generation and downstream navigation on the Tennessee River and Reservoir system.

Watauga Dam historical marker.

The original town of Butler, Tennessee, now sits at the bottom of Watauga Lake. "New" Butler was relocated to higher ground above the summer pool edge of the reservoir after it was dammed by the TVA. Other nearby Tennessee cities and communities include Hampton, Elizabethton, Roan Mountain, Mountain City, Johnson City, and Bristol.

Watauga Lake covers parts of Johnson and Carter Counties.

Another much smaller nearby lake that is not part of the TVA system is the Ripshin Lake located 6 miles (10 km) SW of Roan Mountain.

## **Specifications**

According to the 2004 TVA River and Reservoir Operations Study, Watauga Lake is approximately 16.3 miles (26 km) long, with 104.9 miles (169 km) of shoreline. At the TVA summertime water level target "full pool", the lake surface covers 6,430 acres (26 km<sup>2</sup>) and the estimated depth of Watauga Lake is 265 feet (81 m) at the dam. At full pool, Watauga's elevation is the highest of all TVA lakes at 1,959 feet (597 m) above sea level.

Watauga Lake is regularly released by TVA schedule into Wilbur Reservoir (Wilbur Lake) and impounded by the TVA Wilbur Dam. Water levels in TVA Watauga Reservoir vary about 9 feet (2.7 m) in normal years to provide for seasonal flood storage and for the augmentation of flows of water during drier seasons. Watauga has a flood-storage capacity of 152,829 acre feet (189,000,000 m<sup>3</sup>).

## **Recreation**

More than half of Watauga Lake's shoreline lies within the Cherokee National Forest and cannot be developed. Recreational uses include boating, fishing, water-skiing, and camping. There is no horsepower limit or speed limit for boats operating on the lake. Several fee-based public and private boat launch ramps provide access on the Hampton side of the reservoir.

The release of impounded water from both TVA Watauga Dam and TVA Wilbur Dam provides additional downstream riverine recreational opportunities such as whitewater rafting, trout fishing, and kayaking on the Watauga River.

Houseboat owners have been conducting a large annual July 4 Boat Parade on Watauga Lake since 2001. The Watauga Lake boat parade starts at 2:00 p.m.

## **Demographics**

As of the census[5] of 2000, there were 56,742 people, 23,486 households, and 16,346 families residing in the county. The population density was 166 people per square mile (64/km<sup>2</sup>). There were 25,920 housing units at an average density of 76 per square mile (29/km<sup>2</sup>). The racial makeup of the county was 97.49% White, 1.00% Black or African American, 0.20% Native American, 0.26% Asian, 0.01% Pacific Islander, 0.27% from other races, and 0.78% from two or more races. 0.89% of the population were Hispanic or Latino of any race.

There were 23,486 households out of which 28.50% had children under the age of 18 living with them, 54.90% were married couples living together, 11.00% had a female householder with no husband present, and 30.40% were non-families. 26.50% of all households were made up of individuals and 11.00% had someone

living alone who was 65 years of age or older. The average household size was 2.35 and the average family size was 2.83.

In the county the population was spread out with 21.40% under the age of 18, 9.20% from 18 to 24, 29.00% from 25 to 44, 25.40% from 45 to 64, and 15.00% who were 65 years of age or older. The median age was 38 years. For every 100 females there were 94.50 males. For every 100 females age 18 and over, there were 91.60 males.

The median income for a household in the county was \$27,371, and the median income for a family was \$33,825. Males had a median income of \$26,394 versus \$19,687 for females. The per capita income for the county was \$14,678. About 12.80% of families and 16.90% of the population were below the poverty line, including 23.00% of those under age 18 and 16.00% of those age 65 or over.

## City of Elizabethton

### Elizabethton, Tennessee

**Elizabethton** is the county seat of Carter County, Tennessee, United States.[3] Elizabethton is also the historical site both of the first independent American government known as the Watauga Association (1772), located west of both the Eastern Continental Divide and the original thirteen British colonies.

Elizabethton is also the historical site of the Transylvania Purchase (1775), and a major historic muster site for the Battle of Kings Mountain (1780) and a local community within the secessionist North Carolina "State of Franklin" territory (1784–1788).

The population of Elizabethton was enumerated at 13,372 during the 2000 U.S. Decennial Census

## **Northeast Tennessee location**

Elizabethton is centrally located within the "Tri-Cities" area (encompassed by Bristol, Johnson City, and Kingsport) of Northeast Tennessee.[5][6]

Time offset from Coordinated Universal Time (UTC): UTC-5 (Eastern Standard Time).

According to the United States Census Bureau, the city has a total area of 9.4 square miles (24.3 km), of which, 9.2 square miles (23.7 km) of it is land and 0.2 square miles (0.6 km) of it (2.35%) is water.[7]

The elevation at Elizabethton Municipal Airport is 1,593 feet (486 m) ASL (the highest point of elevation in Carter County is at Roan Mountain with an elevation of 6,285 feet (1,916 m) ASL) and the airport is located on the eastern side of the city along State Highway 91 Stoney Creek Exit.[8][9] Elizabethton is also connected to larger commercial, shuttle, and cargo flights out of Tri-Cities Regional Airport located adjacent to the main campus of Northeast State Technical Community College at nearby Blountville, Tennessee.

Lynn Mountain reaches 2,380 feet (730 m) ASL at the summit (36.350°N, 82.191°W) and is located directly across the U.S. Highway 19-E from the downtown Elizabethton business district.

Elizabethton also shares a contiguous western border with Johnson City.

Built in 1882, the Elizabethton Covered Bridge(spans 134 feet (41 m) across the Doe River.

## **Demographics**

As of the census of 2000,[12] there were 13,372 people, 5,454 households, and 3,512 families residing in the city. The population density was 1,459.3 people per square mile (563.6/km<sup>2</sup>). There were 5,964 housing units at an average density of 650.9/sq mi (251.4/km<sup>2</sup>). The racial makeup of the city was 95.30% White, 2.47% African American, 0.16% Native American, 0.55% Asian, 0.01% Pacific Islander, 0.49% from other races, and 1.02% from two or more races. Hispanic or Latino of any race were 1.18% of the population.

There were 5,454 households out of which 26.6% had children under the age of 18 living with them, 46.6% were married couples living together, 14.7% had a female householder with no husband present, and 35.6% were non-families. 32.6% of all households were made up of individuals and 16.5% had someone living alone who was 65 years of age or older. The average household size was 2.24 and the average family size was 2.82.

In the city the population was spread out with 20.5% under the age of 18, 10.8% from 18 to 24, 24.5% from 25 to 44, 23.1% from 45 to 64, and 21.0% who were 65 years of age or older. The median age was 40 years. For every 100 females there were 82.3 males. For every 100 females age 18 and over, there were 76.8 males.

The median income for a household in the city was \$25,909, and the median income for a family was \$33,333. Males had a median income of \$26,890 versus \$20,190 for females. The per capita income for the city was \$14,578. About 15.2% of families and 19.4% of the population were

below the poverty line, including 29.8% of those under age 18 and 16.1% of those age 65 or over.

As of 2010, Elizabethton's population is 13,918 people. Since 2000, it has had a population growth of 4.10 percent.

The median home cost in Elizabethton is \$109,200. Home appreciation the last year has been - 0.60 percent.

Compared to the rest of the country, Elizabethton's cost of living is 19.00% Lower than the U.S. average.

Elizabethton public schools spend \$4,823 per student. The average school expenditure in the U.S. is \$5,678. There are about 14.5 students per teacher in Elizabethton.

The unemployment rate in Elizabethton is 9.50 percent(U.S. avg. is 10.20%). Recent job growth is Negative. Elizabethton jobs have Decreased by 5.60 percent

## **Water resources**

### **Doe River**

The Doe River forms in Carter County, Tennessee near the North Carolina line, just south of Roan Mountain State Park. The river initially flows north and is first paralleled by State Route 143; at the community of Roan Mountain, Tennessee, it then continues to flow west and is at this point paralleled by U.S. Route 19E. The Doe River flows to the east of Fork Mountain; the Little Doe River flows by the Fork Mountain to the west.

Below the confluence of both the Doe River and the Little Doe River at Hampton, the Doe River then travels roughly in a northern downstream direction through the Valley Forge community, and is rejoined near U.S. Route 19E. Pushing through a mountain gap just north of Hampton, the volume of the river is amplified by the waters flowing from McCathern Spring.

Further downstream, the Doe River flows by the East Side neighborhood and parallel with Tennessee State Route 67 and then underneath the historic Elizabethton Covered Bridge, built in 1882 and located within the Elizabethton downtown business district. Connecting 3rd Street and Hattie Avenue, the covered bridge is adjacent to a city park and spans the Doe River. The covered bridge, although now closed to motor traffic, is still open for bicycles and pedestrians.

Most of Elizabethton's downtown is listed on the National Register of Historic Places for its historical and architectural merits. The Elizabethton Historic District contains a variety of properties ranging in age from the late 18th century through the 1930s. However, the Elizabethton Covered Bridge is an important focal point and a well-known landmark in the state. In addition to the Covered Bridge, the downtown historical district also contains the 1928 Elk Avenue concrete arch bridge, and just a little further downstream on the Doe River, Tennessee State Route 67 passes another similar concrete arch bridge locally known as the Broad Street Bridge.

Elizabethton celebrates in the downtown business area for one week each June with the Elizabethton Covered Bridge Days featuring country and gospel music performances, activities for children, Elk Avenue car club show, and many food and crafts vendors.

### **Watauga River**

Two Tennessee Valley Authority reservoirs in Carter County — each impounded behind TVA Watauga Dam (forming Watauga Lake) and TVA Wilbur Dam (forming Wilbur Lake) — are located southeast and upstream of Elizabethton on the Watauga River. The Appalachian Trail crosses over both the Watauga River and the Tennessee Valley Authority reservation in Carter County to the southeast of Elizabethton.[13][14]

The Watauga River flows past Elizabethton. Elizabethton lies on the south bank of the Watauga and along either side of its principal tributary, the Doe River. The downtown business district is located approximately one-quarter mile upstream of the confluence of both the Doe River and the Watauga River. The Doe River flows underneath the historic wooden covered bridge that is located within the Elizabethton downtown business district.

The Bee Cliff Rapids — a popular summer destination on the Watauga River for whitewater rafters during the summer months — are located southeast of Elizabethton and downstream of the TVA Wilbur Dam.

The Watauga River downstream of the western side of Elizabethton has one of the only two sections of trophy trout streams across the entire state of Tennessee.

### **Holston Mountain Communication Towers**

Elizabethton itself lies within a river valley basin mostly surrounded by mountain ridges and significant hills, such as Holston Mountain, the southern end of which lies just northeast of Elizabethton. Panhandle Road is located off State Highway 91 in Carter County and ascends Holston Mountain for three miles (5 km) from the eastern side and ends four miles (6.5 km) along the ridge southwest of *Holston High Point*. During periods of heavy snow and ice, the National Forest Service closes off Panhandle Road with an iron gate.

Located near the Cherokee National Forest boundary and to the left of Panhandle Road is a parking area and foot trail that leads down the slope to the Blue Hole Falls (approximately 45 feet (14 m) high). The last three miles (5 km) of Panhandle Road are filled with washouts, steep drop-offs, and no turnarounds. Vehicle travel on those last three miles (5 km) is at the driver's risk.

Early broadcasters in the 1950s and 1960s quickly realized Holston Mountain would be a prime radio-television transmission location because it is the highest visible point that faces most of the major cities in Northeast Tennessee in the surrounding valley between Knoxville, Tennessee, to southwest of Roanoke, Virginia. As a result, the Holston Mountain ridge is the transmitter site for three television stations in the Tri-Cities, Tennessee Television Designated Market Area (DMA). The broadcasting antenna for WCYB-TV, Channel 5, Bristol, Virginia is on *Rye Patch Knob*, with the top of the antenna 341 feet (104 m) above ground, 2,431 feet (741 m) above the surrounding valley floor, and 4,533 feet (1381.6 m) above mean sea level. The single tower that antenna sits on, is the highest and tallest man-made structure on the mountain. The television

towers for WJHL-TV, Channel 11, Johnson City, Tennessee, and WKPT-TV, Channel 19, Kingsport, Tennessee, are standing side by side in a common broadcasting antenna farm on the southwest slope of *Holston High Point*, one mile (1.5 km) southwest of *Rye Patch Knob*. The antenna for WJHL-TV stands 200 feet (61m) above ground, 2,319 feet (707m) above the surrounding valley floor, and 4,370 feet (1,332m) above mean sea level. The antenna for WKPT-TV next door stands 193 feet (58.8m) above ground, also 2,319 feet (707m) above the valley floor, and 4,366 feet (1,331m) above mean sea level. The stations' digital antennas are also on their respective towers.

Holston Mountain is also the transmitting site for three FM Class C radio stations: WTFM-FM 98.5, Kingsport, Tennessee; WXBQ-FM 96.9, Bristol, Virginia and WETS-FM 89.5, Johnson City, Tennessee. All three antennas and the backup antennas are located at the antenna farm on the southwest slope of *Holston High Point*. Also located on the ridge are the antenna for one FM Class C1 radio station, WHCB-FM 91.5, Bristol, Tennessee, located at *Rye Patch Knob*; one FM Class C2 antenna for radio station WCQR-FM 88.3, Kingsport, Tennessee, and one FM Class D antenna for radio station W214AP-FM 90.7, Johnson City, Tennessee, both transmitting from the antenna farm on the southwest slope of *Holston High Point*. Various U.S. federal, Tennessee state, Sullivan, Washington and Carter County governmental agencies, along with utility microwave relay stations, also transmit base-to-mobile communications from the *Holston High Point* antenna farm and *Rye Patch Knob*.

The Federal Aviation Administration also maintains a navigational beacon at the Holston Mountain summit.
