 - Proposed Night Lights
 - Proposed Underground Utilities
 - Proposed Glading
- Solid lines represent existing ski runs, dashed lines represent proposed ski runs. Skill level is indicated by the following symbols:*
- B Beginner
 - Novice
 - Low Intermediate
 - Intermediate
 - Advanced Intermediate
 - Expert
- Note: Streamcourses displayed on this map include intermittent (ephemeral) and perennial streamcourses and culverted drainages as defined by the Northwest Forest Plan.*

Digital orthophoto is a representation of aerial photographs (taken 1994) with ground features corrected to actual locations. Developed by Geospatial Service and Technology Center to USGS standards.

Contour map developed 1972, with Kelsh stereoplotter, photo scale 1:18,000
 USDA Forest Service Region 6
 Photogrammetric Section

Scale:
 300 0 300 600 Feet

Contour Interval: 100 feet

The USDA Forest Service uses the most current and complete data available. Existing resource data and existing and proposed boundaries and facility locations are approximate. They have been adjusted to coincide with known elevations and features observable on the orthographic photograph. Using GIS products for purposes other than those for which they were intended may yield inaccurate or misleading results.
