

## Region 2 Other Emphasis Species List

### **Rocky Mountain Elk (*Cervus elaphus nelsoni*)**

Recommendation Rationale: **Not R2 SS, But Should Be Considered For Other Emphasis Species Lists**

Common with high economic value. Strong interest from State wildlife agencies and by the public both for hunting and viewing purposes. It's importance is tied to economics, high public interest and response to road densities. Should be used in planning for those purposes. Not justified for sensitive species status but should be included on other emphasis species lists, such as demand species.
