

**Not R2 SS, But Should Be Considered for other  
Emphasis Species Lists**

**Recommendations and Evaluations**

**Common Name:** Yuma Myotis

**Scientific Name:** *Myotis yumanensis*

**Recommendation:** **Not R2 SS, be should be considered for other Emphasis Species Lists**

**Recommendation Rationale:**

Peripheral to R2, locally abundant where they are found (near water source usually). Very sensitive to human activities at maternity roosts. Roost in caves, mines, and buildings. Because of sensitivity to disturbance at roost and maternity sites, should be included on other, emphasis species lists to protect important roost and breeding habitats.
