

Not R2 Sensitive Species and Not of Concern

Recommendations and Evaluations

Common Name: American Bison

Scientific Name: *Bos bison*

Recommendation: Not R2 Sensitive Species and Not of Concern

Recommendation Rationale:

Where it still occurs, bison population appear to be stable to increasing. Unoccupied habitat in R2 appears to be stable. FS management would not be expected to negatively affect habitat quality or quantity, while the species may warrant restoration as an ecological keystone species, it does not warrant sensitive status.
