

Not R2 Sensitive Species and Not of Concern

Recommendations and Evaluations

Common Name: Pinon Mouse

Scientific Name: *Peromyscus truei*

Recommendation: Not R2 Sensitive Species and Not of Concern

Recommendation Rationale:

Restricted to pinyon juniper, in very rocky habitats. Unlikely that FS affects its habitat much. Evaluator indicates that restoration projects (thinning and Rx burn) likely could have positive effects. Appears to be abundant in suitable habitat. No evidence to support listing as sensitive.
