<b>Sensitive Species Recommendation</b> <span style="float: right;">(Please check 1 box below)</span>					
<input checked="" type="checkbox"/>	R2 Sensitive Species (SS)	Not R2 SS, but should be considered for other Emphasis Species Lists			
	Not R2 SS and Not of Concern Now	Insufficient Information Available to make a recommendation			
<b>Recommendation Rationale</b>					
<p>Patchy and somewhat disjunct distribution in R2, much more widely distributed across arctic Canada and central Siberia. Known from a single occurrence in WY, on the Shoshone NF, with about 15 occurrences in CO. Habitat is marl wetlands and calcareous fens. The site in WY is in a Botanical Area, but the sites in CO are not protected. Population trend is not known. Habitat is vulnerable to a number of ongoing land management activities. <b>Sensitive</b> status is warranted.</p>
