<b>Sensitive Species Recommendation</b>			<b>(Please check 1 box below)</b>		
<input type="checkbox"/>	<b>R2 Sensitive Species (SS)</b>	<input checked="" type="checkbox"/>	<b>Not R2 SS, but should be considered for other Emphasis Species Lists</b>		
<input type="checkbox"/>	<b>Not R2 SS and Not of Concern Now</b>		<b>Insufficient Information Available to make a recommendation</b>		
<b>Recommendation Rationale</b>					
<p>--Sometimes confined to discrete zone or microhabitat and is probably localized and patchy on the landscape (wet marshes and meadows, bogs, fens, sloughs)</p> <p>--Small pops and not particularly abundant where it occurs; distributed across CO, SD, NE, and WY, not known from KS</p> <p>--Low elevation wetland habitats have historically declined but relatively stable under current mgmt</p>
