<input type="checkbox"/> Not R2 SS and Not of Concern Now			<input type="checkbox"/> Insufficient Information Available to make a recommendation			
Recommendation Rationale						
<p>--Only 3 known pops in WY and uncommon in SD despite association with common habitat defined as grasslands and open woods on dry, stony or sandy sites. Also occurs in KS, NE, and CO.</p> <p>--Widely distributed from eastern provinces south to Florida and Texas and New Mexico</p> <p>--Habitats generally too steep and rocky for livestock or plowing so no apparent pervasive threats, except possibly invasives.</p> <p>--Taxonomy may be changing in forthcoming publication on Flora of NAm (Freckmann & Lelong)</p>						

Name/Title	Sheila Lamb/Peter McDonald	Date	10/2/02
