<b>Sensitive Species Recommendation</b> (Please check 1 box below)					
<input type="checkbox"/> <b>R2 Sensitive Species (SS)</b>		<input checked="" type="checkbox"/> <b>Not R2 SS, but should be considered for other Emphasis Species Lists</b>			
<input type="checkbox"/> <b>Not R2 SS and Not of Concern Now</b>			<input type="checkbox"/> <b>Insufficient Information Available to make a recommendation</b>		
<b>Recommendation Rationale</b>					
<p><b>Found on upland shortgrass prairie. Appears to be rather widespread in e CO and abundant in TX, probably secure throughout most of its range. At the northern edge of its range in R2. Species is rarely common in KS, where it is ranked S1. Habitat threatened by cropland conversion and grazing. Recommended for consideration as an emphasis species on the Comanche and Cimarron NGs.</b></p>
