

Measuring your firewood

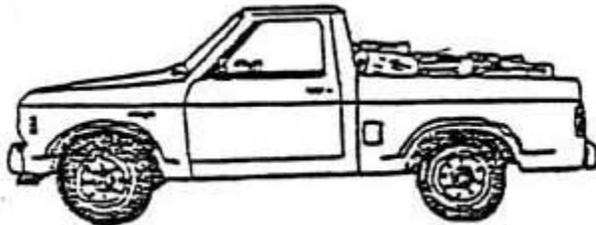

A standard, full cord of wood is a volume of 128 cubic feet, measured as a pile 8 feet long, 4 feet high and 4 feet wide. A full cord can weigh up to 5,000 pounds.

Small Pickup -- 1/4 ton With or without racks this truck bed holds approximately 1/2 (one-half) cord of wood. Two load tickets required.

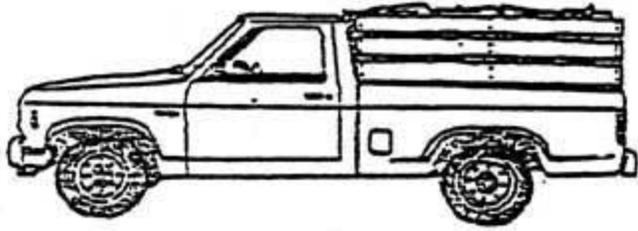

Short Bed Pickup -- 1/2 ton With or without racks this truck bed holds approximately 1/2 (one-half) cord of wood. Two load tickets required.

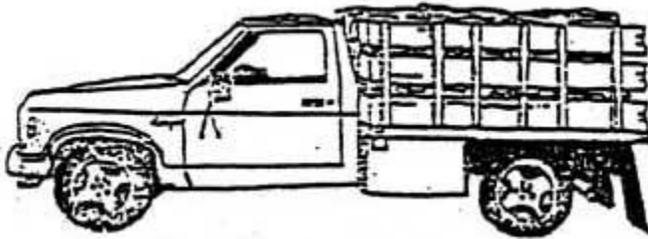

Long Bed Pickup -- 1/2 or 3/4 ton Without racks this truck bed holds approximately 1/2 (one-half) cord of wood. Two load tickets required.

With racks this truck bed holds approximately 1 (one) cord of wood. Four load tickets required.

Standard Truck -- 1 ton With high racks this truck bed holds approximately 1 1/2 (one and a half) cords of wood. Six load tickets required.

Please note that trucks may be overloaded when filled with wood. Check the owner's manual for your vehicle to see what load weights the truck can safely haul and make sure your vehicle is licensed for the weight you will be hauling.
