Sensitive Species Recommendation (Please check 1 box below)						
<input type="checkbox"/> R2 Sensitive Species (SS)		<input type="checkbox"/> Not R2 SS, but should be considered for other Emphasis Species Lists				
<input type="checkbox"/> Not R2 SS and Not of Concern Now		<input checked="" type="checkbox"/> Insufficient Information Available to make a recommendation				
Recommendation Rationale						
<p>Distributed from Alaska to Hudson Bay, extending south to OR (S1), UT (S1), and CO (S2). In WY, it is found in wet rich soils under Douglas-fir forests and spruce-pine swamp forests as well as shady streambanks at 6,300-10,200 ft. In CO, it is found in moist spruce forests at 8,700-10,800 ft. Its moist habitats are patchily distributed. Population and habitat trends are not known. At this time, there is insufficient information available to determine whether the species merits sensitive status.</p>
