<input type="checkbox"/> Not R2 SS and Not of Concern Now		<input checked="" type="checkbox"/> Insufficient Information Available to make a recommendation				
Recommendation Rationale						
<p>This species is at the southwestern limit of its distribution in R2. It's found in BHNF in WY and likely in SD; and occurs in Oglala NG in NE. This species is undercollected in this region, but is probably uncommon or infrequent. Members of this genus are comparatively difficult to collect and identify, and are frequently passed over by casual botanizers. Even though there are few reported occurrences in R2, we believe this species has Insufficient Information to make a recommendation. More survey work to determine true distribution/abundance.</p>
