<input type="checkbox"/> Not R2 SS and Not of Concern Now		<input type="checkbox"/> Insufficient Information Available to make a recommendation			
Recommendation Rationale					
<p>A species of the southwestern US, it occurs in a scattered distribution. Found on cracks and cliff ledges in montane areas. Likely under-reported. Does not appear to have any major threats to habitat or species viability. The limited number of occurrences in WY indicate it should be considered there for other Emphasis Species lists.</p>					

Name/Title	Nancy Warren & Jeff Redders	Date	Oct. 4, 2002
