

UMPQUA NATIONAL FOREST REVIEW

QUARTERLY SCHEDULE OF PROPOSED ACTIONS

APRIL 2002

The Schedule of Proposed Actions inside these pages cover environmental analyses in progress on the Umpqua National Forest. This publication is our way of keeping you informed and involved in our plans and progress. We focus these activities on protecting, conserving, using, and restoring forest ecosystems. Each activity lists a contact person if you want additional information or to share ideas.

The National Environmental Policy Act (NEPA) guides us in making informed decisions regarding the environment. Through NEPA, we complete environmental analyses so the public and responsible official for each project are aware of the effects on the environment. The objective of NEPA is to make better decisions and document those decisions. The process is dynamic and flexible. If new information is discovered, we will update the information in this quarterly report.

We hope this publication meets your needs. You will also find it on our Forest's website at www.fs.fed.us/r6/umpqua.

Sincerely,

James A. Caplan
Forest Supervisor

INSIDE:

- **Forest activities shown by district**
- **Map of activities**
- **Decisions made during the last planning quarter**

Do you want to receive the next issue of this report via email? Send your email address to crwalters@fs.fed.us.

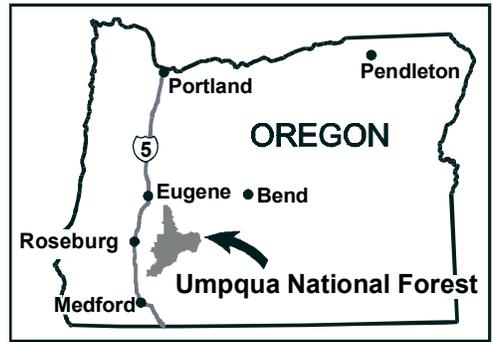

Do you want your name removed from our mailing list for future issues? Contact Dudley Watson at 541/496-3532 or dmwatson01@fs.fed.us.

SUPERVISOR'S OFFICE

Projects

Integrated Noxious Weed Management

Proposal: This Environmental Assessment defines the Integrated Weed Management Strategy for the Forest, including prevention of new infestations, identification of high priority weed infestation areas on the Forest, and recommendations of possible treatments of existing sites.

Location: Forest-wide

Public Input: Scoping began in October of 1995.

Status: The 30-day comment period has been completed.

Projected Decision Date: This decision is on hold pending a proposal to address noxious weeds with a Regional EIS.

Contact Person: Richard Helliwell

Forest Plan Amendment – Minerals Standards and Guidelines

Proposal: Amends Northwest Forest Plan Minerals Management-1 Standard and Guideline for the Umpqua National Forest. MM-1 requires a Plan of Operation for any activity within a Riparian Reserve. This Standard and Guideline conflicts with the Code of Federal Regulations. Under the Code of Federal Regulations, District Rangers have the authority to determine whether a Plan of Operation is necessary for activities within Riparian Reserves. The amendment would put the Umpqua National Forest in compliance with the Code of Federal Regulations.

Location: Forest-wide

Public Input: Scoping began in January of 1998.

Status: Input is still being accepted on this project.

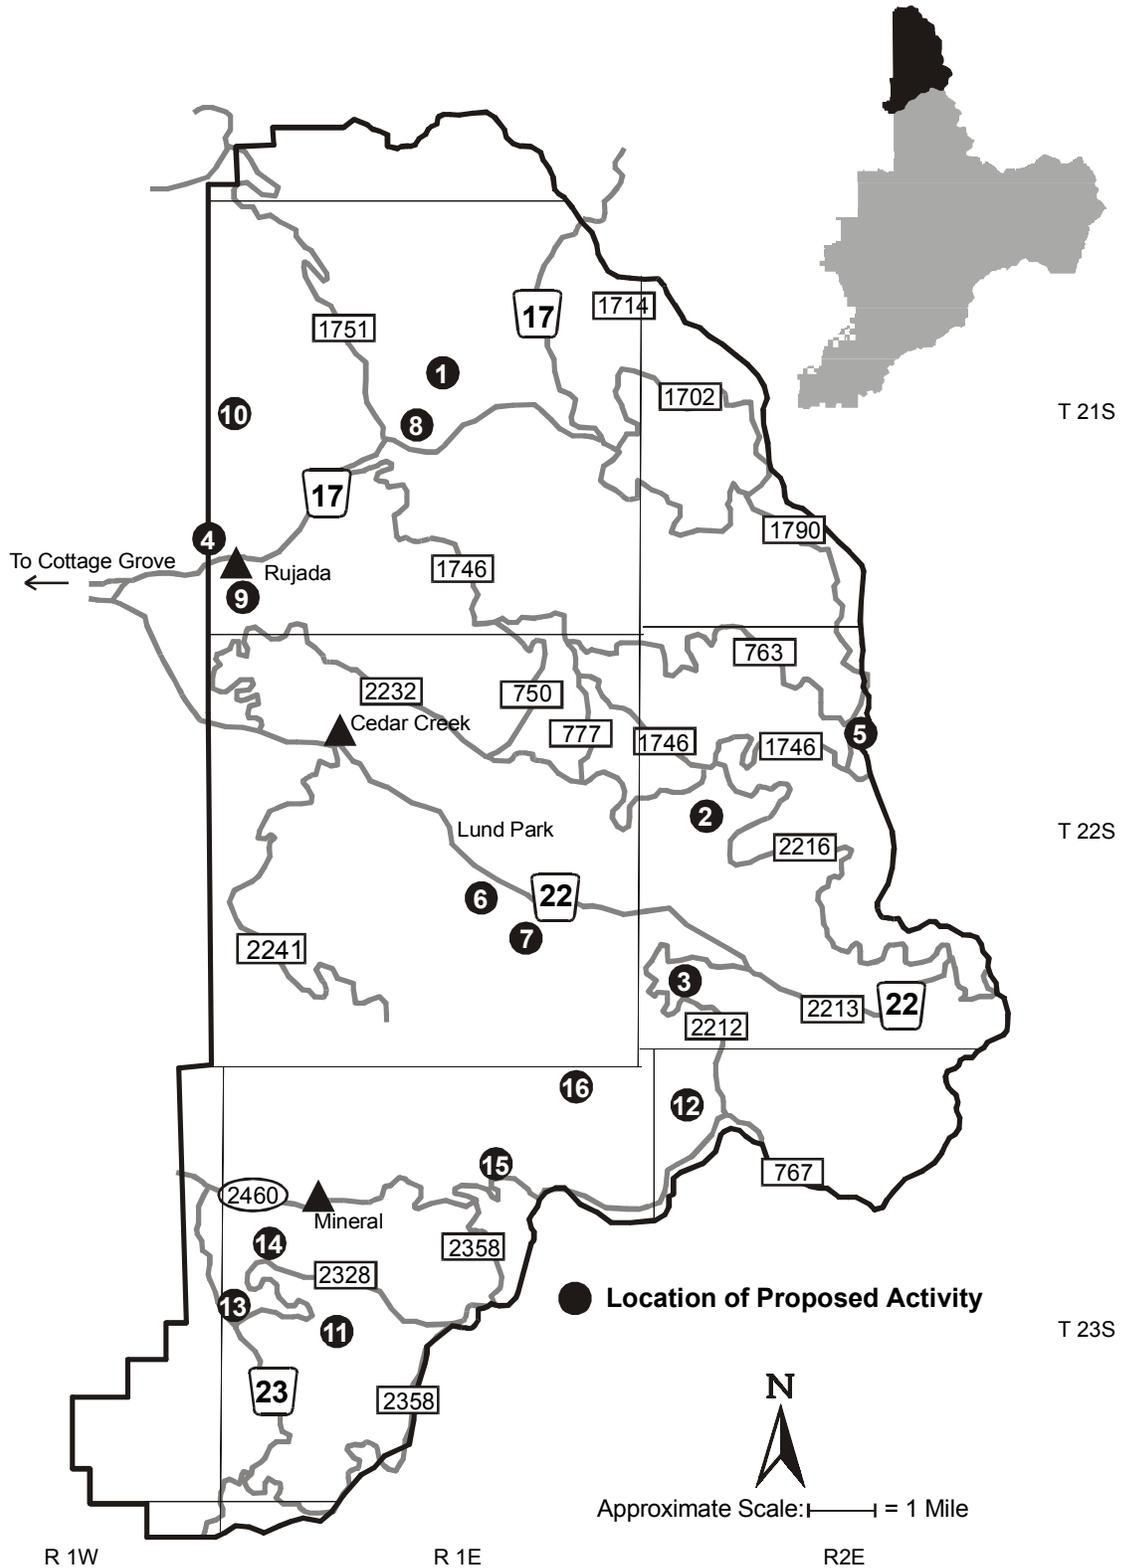

Projected Decision Date: This decision is on hold pending input from the Regional Office.

Contact Person: Jake O'Dowd

Projects with Decision Made During the Previous Quarter

None at this time.

Cottage Grove Ranger District

COTTAGE GROVE RANGER DISTRICT

Timber Stand Management Projects

1 Herman Thin Timber Sale

Proposal: To conduct commercial thinning (an intermediate harvest) on approximately 400 acres of overstocked timber stands. These stands will be prioritized for treatment based on conventional methods of estimating density. Timber stand exam information such as number of trees per acre, diameter increment growth, tree heights and diameters, and live crown ratios will be used in assessing tree growth compared to the site potential. Harvest treatments will consist of commercial thinning of 35-55 year old Douglas-fir stands in the Herman Creek, East Fork Junetta and Lower Junetta Creek, and Mid Layng East drainages.

Location: Layng Creek Watershed. T21S, R1E Sec. 3, 4, 8, 9, 10, 11, 15, 16, 21, and 22. The project is located within Matrix and Riparian Reserve land allocations.

Public Input: Scoping began in January 1999. Input is being accepted on this project.

Status: The environmental document was mailed on March 19, 2002, to the people who had requested a copy for review and comment prior a decision. In addition, notice was published in the Roseburg News Review on March 19, 2002, that the environmental document was available for public review and comment. The review and comment period ends on April 22, 2002. **Projected Decision Date:** May 2002

Contact Person: Susan Johnson (541) 767-5044

2 Wyatt Timber Sale

Proposal: The proposed action is to harvest timber from approximately 169 acres of National Forest Lands on the Cottage Grove Ranger District. The proposal is to partial harvest 149 acres by creating gaps in eight timber stands and have a regeneration harvest with 15% retention on approximately one 20 acre timber stand. Harvest will be accomplished by cable and aerial systems. This project will require road reconstruction and construction of approximately .5 miles of temporary roads. Temporary roads will be obliterated and/or rehabilitated after use. Wildlife habitat enhancements such as snag creation and installation of bird boxes will be included with this project. Other associated activities with this action will include reforestation, timber stand improvement projects, noxious weed/non-native species removal and fuels reduction activities. Fuels reduction activities being considered are underburning, burning of concentrations, and handpile and burn.

The purpose and needs for the timber sale(s) has been established based on the following:

- Provide wood fiber as a commodity in support of the local and regional economy.
- Manage for ecosystem health by providing for historic patterns of disturbance by management of patch sizes, creating early seral structure, snags and down woody material.
- Manage for fire resilience, habitat connectivity, refugia, pine species enhancement and control of noxious weed/non-native species.
- Maintain infrastructure access for road, trails, recreation and public safety through proper maintenance.
- Provide Alternative Timber Volume (ATV) for replacement of volume lost by cancellation of specific timber sales on the Siuslaw National Forest.

Location: Brice Creek Watershed. T22S, R2E, Sections 17, 18, 19, and 20. This project is located within a Matrix land allocation.

Public Input: Scoping begins with the publication of this project proposal in the current Umpqua National Forest Schedule of Proposed Actions (SOPA).

Status: An interdisciplinary team has been selected and the environmental analysis has been initiated. Issues are being identified.

Projected Decision Date: September 2002

Contact Person: Wayne Kleckner (541) 767-5060

3 Northnoon Timber Sale

Proposal: The proposed action is to harvest timber on approximately 306 acres of National Forest Lands on the Cottage Grove Ranger District and to implement road restoration. The area is matrix designation and is located within the Brice

Creek Drainage. The proposal is to partially harvest transitional-aged stands targeting trees in the smaller age classes. Small gaps will be left to enhance wildlife habitat. Other wildlife enhancements include snag creation and bird boxes where appropriate. Additional activities associated with the action may include planting, fuels reduction, prescribed burning and road reconstruction, upgrade and decommissioning.

The need for this timber sale has been established based on the following purposes:

- Provide wood fiber as a commodity to local communities
- Reduce the risk of fire and the effects of fire exclusion to forest stands
- Maintain an environmentally sound and affordable road network
- Restore native vegetation, and aquatic and wildlife habitat in Matrix, LSR and Riparian allocations
- Maintain public safety

Location: Brice Creek Watershed. T22S, R1E, Section 25; T22S, R2E, Sections 30 and 31. Project is located within a Matrix land allocation.

Public Input: Scoping begins with the publication of this project proposal in the current Umpqua National Forest Schedule of Proposed Actions (SOPA).

Status: An interdisciplinary team has been selected and the environmental analysis has been initiated. Issues are being identified.

Projected Decision Date: September 2002.

Contact Person: Terry Fairbanks (541) 767-5040

Watershed Restoration and Improvement Projects

4 Layng Creek Instream Structure Removal Project

Proposal: To remove or modify three concrete dams within the Layng Creek Watershed no longer needed for the City of Cottage Grove's municipal watershed operations. Two of these dams (Rujada and Dinner) were at one time used for the City of Cottage Grove's municipal watershed. The City has not used these dams for many years and has determined that they are no longer needed. The East Fork Prather Dam was built by the Forest Service. It has been breached and is no longer needed. In addition, four instream cement structures used to pool water for water drafting purposes will be removed or modified. These structures were created primarily for support of fire suppression operations. Two of these structures are no longer needed. The remaining two will be removed and replaced or modified to enhance Aquatic Conservation Strategy (ACS) Objectives and to retain drafting capabilities. The purpose of this project is to restore habitat connectivity for aquatic species, sediment regimes within the streams, and the physical integrity of the stream channels.

Location: Layng Creek Watershed. Rujada Dam is in Layng Creek at the Rujada Campground, T21S, R1E, Sec. 31; Dinner Dam is within Dinner Creek, T21S, R1E, Sec. 29; and East Fork Prather Dam is within an eastern tributary to Prather Creek, T21S, R1, Sec. 30. The project is located in Riparian Reserve land allocations

Public Input: Scoping began in March 1999. Input is being accepted on this project.

Status: Analysis is ongoing. Alternatives to the Proposed Action are being developed by the interdisciplinary team.

Projected Decision Date: June 2002

Contact Person: Laurie Bernstein (541) 767-5041

5 Holland Mosaic (Management ignited prescribed burn)

Proposal: To utilize management ignited prescribed fire to burn approximately 153 acres of brush fields and understory vegetation in Holland Meadows. The purpose of this project is to reintroduce fire to the ecosystem, and to release native plant seed banks, increase vigor of native plants, reduce non-native plant populations, enhance wildlife habitat and slow tree and shrub encroachment within identified areas.

Location: Layng Creek and Brice Creek Watersheds. Holland Meadows, T22S, R2E, Sec. 16. Project is located within a Matrix land allocation.

Public Input: Scoping began in April 1998. Input is still being accepted on this project.

Status: Analysis is continuing. Environmental effects are being documented. Estimated completion date for the environmental document is June 7, 2002.

Projected Decision Date: June 2002

Contact Person: Bev Reed (541) 767-5023

6 Precommercial Thinning 2002

Proposal: Conduct pre-commercial thinning on 342 acres. The project areas were originally planted 13 to 20 years ago. The purpose of the treatment is to distribute the growth potential of the site to the most vigorous growing trees by reducing stocking levels to a prescribed level consistent with the Forest Land and Resource Management Plan guidelines.

Location: District-wide. Project is located within Matrix and Riparian Reserve land allocations.

Public Input: Scoping began in October 2001. Input is still being accepted on this project.

Status: The project is currently under review by District staff specialists. Issues associated with the project are being identified.

Projected Decision Date: July 2002.

Contact Person: Paul Higgins (541) 767-5043

7 Unique Site Restoration

Proposal: Restore unique habitat sites damaged by vehicles and past management practices. Activities include obliterating skid roads, removing unwanted vegetation, restoring native plants and other site improvement activities.

Location: District-wide. Fifty sites have been identified in potential need of restoration. Project is located within Matrix and Riparian Reserve land allocations.

Public Input: Scoping began in October 2001. Input is still being accepted on this project.

Status: The project proposal has been developed. Sites are being reviewed, mapped and evaluated for restoration.

Project Decision Date: September 2002.

Contact Person: Rob Cox (541) 767-5042

8 Layng Creek Snag Enhancement Project

Proposal: To girdle approximately 9-30 trees per acre in previously harvested 40-55 year old stands, in order to create snags for wildlife habitat. Trees selected for girdling would be co-dominate or dominate Douglas-fir trees. Up to 650 acres may be treated.

Location: Layng Creek Watershed. T21S, R1E, Sec. 3, 4, 7, 10, 11, 15, 16, 21, and 22. This project is located within Riparian Reserve land allocations.

Public Input: Scoping began in October 2001. Input is being accepted on this project.

Status: Environmental effects are being documented. Analysis is continuing.

Projected Decision Date: July 2002

Contact Person: Rob Cox (541) 767-5042

Facilities – Repair and Development

9 Rujada Campground Vegetation Management Project

Proposal: To apply a density management treatment by removing specific trees within Rujada Campground, create 2-6 new campsites, redesign several existing camp sites to accommodate RV users, plant trees and shrubs, and remove hazardous trees and/or limbs. The purpose of this project is to promote a healthy timber stand within the campground, reduce insect and disease susceptibility, promote species and structural diversity, retain or enhance existing campsite characteristics, reduce potential hazards to users and enhance recreational experiences.

Location: Layng Creek Watershed. Rujada Campground, T21S, R1E, Sec. 31. Project is located within a Riparian Reserve.

Public Input: Scoping began in March 1999. Input is being accepted on this project.

Status: Analysis is ongoing. An environmental document is being prepared.

Projected Decision Date: June 2002

Contact Person: Cindy Pack (541) 767-5015

10 Stockpile of Crushed Aggregate

(This project has been approved for funding through the Secure Rural Schools and Community Self-Determination Act of 2000).

Proposal: Crush and stockpile aggregate to be placed on public access roads. The Currin Landing Quarry is an existing rock quarry that contains approximately 16,000 cubic yards of usable material. Five to ten trees within the existing quarry will need to be felled to facilitate this activity. These trees will be retained and be available for future restoration projects.

Location: Layng Creek Watershed. The Currin Landing Quarry is located in T. 22 S. R 01 E. Section 7. Project is located on Matrix lands.

Public Input: Input is being accepted on this project.

Status: Project analysis has been initiated.

Project Decision Date: July 2002

Contact Person: Ken Kimberling (541) 767-5010

Mining Projects

11 Star Group Lode Claims

Proposal: To conduct tunneling in one lode claim and mineral exploration in two claims and to process the mined ore.

Location: Sharps Creek Watershed, T23S, R1E, Sections 21 & 22. Project is located within Matrix and Riparian Reserve lands.

Public Input: Scoping began in January, 2001. Input is being accepted on this project.

Status: The environmental document was mailed on February 28, 2002, to the people who had requested a copy for review and comment prior a decision. In addition, notice was published in the Roseburg News Review on February 28, 2002, that the environmental document was available for public review and comment. The review and comment period ends on April 5, 2002.

Project Decision Date: April 2001

Contact Person: Ken Kimberling (541) 767-5010

12 Champion Mine Pond Repair Project

Proposal: To replace a culvert and repair a failed section of the pond embankment using rock material.

Location: Brice Creek Watershed, T 22 S.; R 01 E; Sec 12. Project is located within a Riparian Reserve.

Public Input: Scoping began in July 2001. Input is being accepted for this project.

Status: Resource information is being collected for the analysis of this project.

Project Decision Date: June 2002

Contact Person: Ken Kimberling (541) 767-5010

13 Climax I, II, III Placer Claims

Proposal: To conduct dredging and sluicing operations in Puddin Rock Creek.

Location: Sharps Creek watershed, T23S, R1E, Sec. 19. Project is within a Riparian Reserve.

Public Input: Input is being accepted on this project.

Status: Proposed Plan of Operation has been submitted. An interdisciplinary team has been selected and an environmental analysis has been initiated.

Project Decision Date: May 2002

Contact Person: Ken Kimberling (541) 767-5010

14 Birds Nest Lode Claims

Proposal: To conduct tunneling and exploration in one lode claim, and to process the mined ore.

Location: Sharps Creek watershed, T23S, R1E, Sec. 17 and 20. Project is located within Matrix and Riparian Reserve lands.

Public Input: Input is being accepted on this project

Status: Proposed Plan of Operation has been submitted. An interdisciplinary team has been selected and an environmental analysis has been initiated.

Project Decision Date: June 2002

Contact Person: Ken Kimberling (541) 767-5010

15 Three Brothers Lode Claim

Proposal: To conduct tunneling in one lode claim. Ore will be processed off-site.

Location: Sharps Creek Watershed, T23S, R1E, Sec. 10. Project is located within Matrix lands.

Public Input: Input is being accepted on this project.

Status: Proposed Plan of Operation has been submitted. An interdisciplinary has been selected and field analysis has been completed.

Project Decision Date: April 2002

Contact Person: Ken Kimberling (541) 767-5010

16 Utopia Lode Claim

Proposal: To conduct tunneling of one lode claim. Ore will be processed off-site.

Location: Brice Creek Watershed, T22S, R1E, Sec. 34. Project is located within Matrix lands.

Public Input: Input is being accepted on this project.

Status: A Plan of Operation has been submitted. An interdisciplinary team has been selected.

Project Decision Date: April 2002

Contact Person: Ken Kimberling (541) 767-5010

PROJECTS WITH DECISIONS IN THE PREVIOUS QUARTER

Norseman Placer Claim

Proposal: To conduct dredging and sluicing operation in Martin Creek.

Location: Sharps Creek Watershed, T23S, R1W, Sec. 12. Project is within Matrix and Riparian Reserve land.

Public Input: Input on this project has concluded.

Status: Project will be implemented.

Project Decision Date: March 20, 2002.

Contact Person: Ken Kimberling (541) 767-5010

Eagle 1 Placer Claim

Proposal: To conduct dredging and sluicing operation in Clark Creek.

Location: Sharps Creek Watershed, T23S, R1W, Sec. 13. Project is within Matrix and Riparian Reserve land.

Public Input: Input on this project has concluded.

Status: Project will be implemented.

Project Decision Date: March 20, 2002

Contact Person: Ken Kimberling (541) 767-5010

Christo Countessa Placer

Proposal: To conduct dredging and sluicing operation in Sharps Creek.

Location: Sharps Creek Watershed, T23S, R1W, Sec. 12. Project is within Matrix and Riparian Reserve land.

Public Input: Input on this project has concluded.

Status: Project will be implemented.

Project Decision Date: March 20, 2002

Contact Person: Ken Kimberling (541) 767-5010

Timber Stand Management Projects

1 PJ Timber Sale and Project Area

Proposal: This project would implement recommendations from the Little River Watershed Analysis. Specifically, this project proposes thinning in stands prone to fire; enhancing stand growth by thinning in order to increase resiliency from snowdown and blowdown; retaining late seral characteristics in older stands by using uneven aged management; and improving water quality through road restoration and decommissioning. The proposal includes the following activities:

- Uneven-aged management of 400 acres of late seral forest. This action includes proportional thinning, thinning from below, and limits the harvest of the largest tree size classes.
- Thin and treat fuel accumulations on approximately 95 acres of previously unmanaged forest.
- Place large wood in the lower stretches of Pinnacle Creek and Junction Creek.
- Place large wood in the riparian areas of previously managed stands.
- Decommission approximately 8 miles of existing road.
- Stormproof the haul routes within and outside of the project area.

Location: The Little River Adaptive Management Area, specifically in the Pinnacle and Junction Creek subdrainages, T27S, R01E.

Public Input: Scoping began with the mailing of the July 1998 Schedule of Proposed Actions. Input is still being accepted on this project.

Status: Analysis is proceeding and surveys are underway. Awaiting Biological Opinions.

Projected Decision Date: The Environmental Assessment will be available for public comment following completion of surveys in FY 2002.

Contact Person: Barbara Fontaine/Debbie Anderson

2 Mjollnir Timber Sale and Project Area

Proposal: This project would implement recommendations from the Little River Watershed Analysis. Specifically, this project proposes thinning in stands prone to fire; enhancing young stands by thinning and pruning in order to promote tree growth and wood quality; and conducting watershed restoration activities such as road restoration and decommissioning, instream wood placement, and noxious weed control in order to improve watershed conditions. The proposal includes the following activities:

- Uneven-aged management of approximately 235 acres of late seral forest. This action includes proportional thinning, thinning from below, and limits the harvest of the largest tree size classes.
- Thin and treat fuel accumulations on approximately 350 acres of previously unmanaged forest.
- Decommission and close 6.2 miles of existing road, and stormproof and close 6.0 miles of existing road.
- Stormproof the haul routes within and outside of the project area.
- Place large wood in ½ mile of Emile Creek and adjacent riparian plantations.

Location: The Little River Adaptive Management Area, specifically in the Lower Emile, Taft Creek, Little Taft Creek subdrainages, T26S, R02W.

Public Input: Scoping began with the mailing of the October 1997 Schedule of Proposed Actions. Input is still being accepted on project.

Status: Analysis is proceeding; project was submitted for consultation. Awaiting Biological Opinions.

Projected Decision Date: The Environmental Assessment will be available for public comment following completion of surveys in FY 2002.

Contact Person: Barbara Fontaine

3 Exodus Timber Sale and Project Area

Proposal: This project would implement recommendations from the Little River Watershed Analysis. Specifically, this project proposes to: retain late-seral characteristics in older stands by using uneven-aged management; maintain at risk late-seral habitat by partially harvesting fire prone areas; accelerate development of late seral habitat by thinning in second growth stands; and restore natural processes and features including reintroducing fire into the ecosystem, promoting pine health and general forest health, maintaining and enhancing unique habitats, and maintaining late successional refugia and

riparian connectivity. The proposal also includes conducting watershed restoration activities such as road improvement and decommissioning, instream wood placement, and noxious weed control in order to improve watershed conditions.

The proposal includes the following activities:

- Uneven-aged management on approximately 1,019 acres of late-seral forest. This action includes proportional thinning and thinning from below, and also limits the harvest of the largest tree size classes.
- Even-aged management on approximately 42 acres of late-seral forest.
- Thinning on approximately 241 acres of mid seral forest.
- Treating fuel accumulations and/or logging slash.
- Underburning on approximately 135 acres to reduce hazardous fuels.
- Decommissioning and closure of approximately 11.5 miles of existing road.
- Stormproofing the haul routes within and outside of the project area.
- Placing large wood both instream and within riparian areas of Upper Black Creek and/or Dutch Creek.

Location: This proposal is in the Little River Adaptive Management Area, specifically in the Upper Black Creek and Dutch Creek subdrainages, T27S, R01W.

Public Input: The scoping period began with the mailing of the October 1999 Schedule of Proposed Actions. The Notice of Intent was published on August 20, 2001 in the Federal Register. A public meeting was held at the Douglas County Library on October 24, 2001.

Status: Issues and Alternatives are being developed; consultation is being initiated.

Projected Decision Date: March 2003 – Record of Decision.

Contact Person: Debbie Anderson

Mining Projects

None at this time.

Facilities – Repair and Development

10 Vault Toilet Replacements

Proposal: The proposal is to replace old (and leaky) 12A vault toilets with CXT concrete vault toilets at the Steamboat Falls Campground. The work would be completed using heavy equipment. An additional area approximately 6 by 6 feet would be disturbed around each toilet during installation. A Decision Memo was signed on March 22, 2001 and April 26, 2001 for 5 other toilets.

Location: Steamboat Falls Campground.

Public Input: The scoping period began with the mailing of the July 2000 Schedule of Proposed Actions.

Status: The Decision Memo will be signed following completion of archaeological surveys at Steamboat Falls.

Projected Decision Date: Spring of 2002 – Decision Memo.

Contact Person: Debbie Anderson

24 Horseshoe Bend Campground Water System and Campsite Modifications

Proposal: This project would replace deteriorated water distribution lines and water hydrants to meet accessibility standards, and modify seven campsites to provide access. The existing black plastic pipe water distribution lines would be replaced throughout the campground. Existing hydrants would be replaced with larger hydrants with wheelchair access. This would require movement or elimination of some hydrants. Beaver Flat and Deer Flat flush toilet buildings including the paved pathways, would be modified to meet accessibility standards. Three campsites on Beaver Flat, three campsites on Deer Flat, one campsite on Otter Flat, three wastewater sumps, and one fee station would be modified to meet accessibility standards. Up to ten trees 20 to 30 inches in diameter may require removal; however, tree removal would be avoided where possible.

Location: Horseshoe Bend Campground. T26S, R2E, Sec. 19.

Public Input: The scoping period began with the mailing of the July 2001 Schedule of Proposed Actions.

Status: Biological Evaluations are being completed.

Projected Decision Date: June 2002 – Decision Memo.

Contact Person: Dick Henbest

25 Deception Creek Bridge Replacement

Proposal: This project would replace the bridge destroyed by a tree that blew over during the winter of 2000-2001. Specifically, this project proposes replacing two laminated trail bridge stringers, 60+ feet long, and other bridge materials damaged during the winter storm, and removing the damaged material. Materials would be moved to the site by the use of a heavy lift helicopter and damaged materials would be removed by the same helicopter. The downed tree would be moved to a location determined by the District Fisheries Biologist using the helicopter. Minor shrubs cutting may be required, but no other trees would be removed.

Location: Marsters section of the North Umpqua Trail at the Deception Creek crossing, T26S, R2E, Sec. 21.

Public Input: The scoping period began with the mailing of the July 2001 Schedule of Proposed Actions.

Status: Biological Evaluations are being completed.

Projected Decision Date: June 2002 – Decision Memo.

Contact Person: Dick Henbest

26 Fire Warehouse Improvements at North Umpqua Ranger District

Proposal: The proposal is to reconstruct and improve the existing warehouse at the North Umpqua Ranger District to accommodate firefighting vehicles, equipment, and staff. The existing building would be remodeled to accommodate current and future needs and would be reconstructed to ADA standards. The warehouse is an existing facility located at the North Umpqua Ranger Station.

Location: T26S, R3W Sec. 19.

Public Input: Scoping began with the mailing of the October 2001 Schedule of Proposed Actions.

Status: Scoping. The project is on hold until funding can be secured.

Projected Decision Date: September 2002 – Decision Memo.

Contact Person: Dick Kreger

27 Red Butte Gate

Proposal: The project would place a gate on Road 2701-190, restricting access to the top of Red Butte. The gate would help prevent further vandalism to communication facilities and the fire lookout located on the Red Butte summit. Minor brush cutting may be required, but no trees would be removed.

Location: Red Butte summit; T28S, R02W, Sec. 1.

Public Input: The scoping period began with the mailing of the October 2001 Schedule of Proposed Actions.

Status: Biological Evaluations are being conducted.

Projected Decision Date: June 2002 – Decision Memo.

Contact Person: Dick Henbest

28 Vault Toilet Replacement at Apple Creek Campground

Proposal: The proposal is to replace three old 12A vault toilets with one new CXT concrete vault toilet at Apple Creek Campground. The work would be completed using heavy equipment. The old vaults would be removed and the vault pumped and filled in on site. A new CXT concrete vault would be placed between the campground road and Hwy. 138.

Location: Apple Creek Campground, T26S, R1E, Sec. 14.

Public Input: The scoping period began with the mailing of the October 2001 Schedule of Proposed Actions.

Status: Archaeological evaluations are being conducted.

Projected Decision Date: June 2002 – Decision Memo.

Contact Person: Wayne Brady

29 Horseshoe Bend Campground Road Improvement

Proposal: The proposal is to chip-seal the existing access road and campground loop roads to improve the existing road system. The existing road has begun to break down and potholes are forming where the chip-seal has separated. The work would be completed with heavy equipment.

Location: Horseshoe Bend Campground Access Road 4750-001. T26S, R2E, Sec. 19.

Public Input: The scoping period began with the mailing of the October 2001 Schedule of Proposed Actions.

Status: Biological Evaluations are being conducted.

Projected Decision Date: June 2002 – Decision Memo.

Contact Person: Dick Henbest

North Umpqua and Steamboat Creek Campground Improvements

Proposal: The proposal is to replace and/or enhance facilities at five heavily used campgrounds within the North Umpqua River and Steamboat Creek corridors. The project would improve the recreation facilities by repairing and replacing 30-year old, failing components of the campground infrastructure. Components of the project include replacing and repairing tables, vehicle barriers, tent pads, waste water collection basins, camping spurs, walking trails and walkways, garbage can pads, solar panels, diversion ditches and other miscellaneous structures within the campgrounds.

Location: Horseshoe Bend, Apple Creek, Island, Steamboat Falls, and Boulder Flat Campgrounds.

Public Input: The scoping period began with the mailing of the October 2001 Schedule of Proposed Actions.

Status: Biological Evaluations are being conducted.

Projected Decision Date: June 2002 – Decision Memo.

Contact Person: Jerry Harryman

31 Boulder Flat Campground Modifications for Whitewater Rafting

Proposal: The project would modify portions of the Boulder Flat Campground to improve recreation opportunities and safety for whitewater rafters and to lessen conflicts between boaters and campers within the campground. Modifications would include improving the launch site, creating changing rooms, turning existing campsites into parking or staging areas, and installing signs for educating users. The area is located within the riparian reserve and 100 year floodplain of the North Umpqua Highway.

Location: Boulder Flat Campground; T26S, R02E, Sec. 13.

Public Input: The scoping period begins with the mailing of the April 2002 Schedule of Proposed Actions.

Status: Scoping.

Projected Decision Date: September 2002.

Contact Person: Barbara Fontaine.

Special Use Permits

None at this time.

Watershed Restoration and Improvement Projects

Pre-Commercial Thinning

Proposal: The purposes of these projects are to reduce tree stocking in young tree plantations. Plantations occur in all land allocations. The purpose of these projects is to maintain optimal growth and/or to encourage species and spacing diversity in existing managed stands. Slash generated during precommercial thinning would also be treated by chipping, piling, and/or burning in order to reduce existing and created fuel hazards. In total, approximately 2000 acres of young plantations would be thinned. Slash disposal may occur (dependant on funding and the amount of slash created) on approximately 6000 additional acres. These projects would occur over a 5 to 10 year time period.

Location: District-wide.

Public Input: The scoping period began with the mailing of the October 2001 Schedule of Proposed Actions.

Status: Biological Evaluations are being written.

Projected Decision Date: June 2002 – Decision Memo.

Contact Person: Ron Campbell/Sherri Chambers

30 Steamboat Creek Watershed Restoration Project

Proposal: The purpose and need for this project is to implement restoration projects that move the Steamboat Creek watershed toward the desired condition: placing large wood into approximately 16 miles of streams; improving riparian conditions by pulling or felling existing trees into the riparian corridor; and improving 86 miles of roads that are part of

the inventoried road system, decommissioning 53 miles of roads that are part of the inventoried road system, decommissioning 10.5 miles of roads that are not part of the inventoried road system, and improving less than ½ mile of road that is not part of the inventoried road system and adding it to the inventoried road system. System roads are those that are part of the Forest Development Transportation Plan. This project will implement the Forest Service Road Management Policy.

Location: Steamboat Creek Watershed; includes portions of T23S-25S, and R01E-03E.

Public Input: Scoping begins with the mailing of the April 2002 Schedule of Proposed Actions.

Status: Scoping.

Projected Decision Date: January 2003.

Contact Person: Ray Davis

Stand Improvement Projects

None at this time.

Projects Dropped from Consideration

None at this time.

Projects with Decisions Made During the Previous Quarter

5 Tomatillo Timber Sale and Project Area

Proposal: This project would implement recommendations from the Lower Steamboat Watershed Analysis. Specifically, this project proposes thinning in order to restore late successional refugia and accelerate the development of second growth stands via commercial thinning. The project would also analyze road restoration and decommissioning activities that are likely to occur when future funding becomes available. The proposal includes the following activities:

- Commercially thin approximately 250 acres of second growth stands (outside of riparian reserves) that were previously harvested. This action includes proportional thinning, thinning from below, and limits the harvest of the largest tree size classes. The thinning prescription follows Late Successional Reserve Assessment guidelines.
- Treat fuel accumulations that occur as a result of the thinning activities.
- Build and/or reconstruct approximately 1 mile of temporary spur road that would be decommissioned after use.
- Analyze the effects of decommissioning parts of Road 3816 (decommissioning would occur when funding is available).
- Stormproof portions of the haul routes.

Location: The Steamboat watershed, specifically in the Reynolds Creek subdrainage, T25S, R02E. The management direction for this area is Late Successional Reserve with overlapping direction of Key Watershed.

Public Input: Scoping began with the mailing of the July 2000 Schedule of Proposed Actions.

Status: The appeal period closed on March 18, 2002. No appeals were received. The project will move forward into implementation.

Decision Date: The Decision Notice was signed on January 30, 2002.

Contact Person: Debbie Anderson

21 Whitecap Soil Decompaction Study – Control of Competing Vegetation

Proposal: The purpose and need for this project is to complete a study that assesses the effectiveness of different methods of soil decompaction done in conjunction with the Whitecap Timber Sale. As part of the decompaction study, there is a need to control competing vegetation using herbicides (approved through the mediated agreement) to better assess the effectiveness of the soil treatments on the establishment and growth of planted conifer seedlings. The proposal is to hand spray Glyphosate (Roundup Original®) to control competing vegetation (woody stemmed species) on approximately 8 acres of land where soil was decompacted in the year 2000. Label specifications of the herbicide will be followed. One treatment per year would occur for two years.

Location: Portions of three units (1, 4a, and 8b) within the Whitecap Timber Sale would be treated. The legal description is T27S, R1W, Sec. 18, 19, and 20.

Public Input: Scoping began with the mailing of the January 2001 Schedule of Proposed Actions.

Status: The comment period closed on January 28, 2002. No comments were received. The project will move forward for implementation.

Decision Date: February 12, 2002 – Decision Notice.

Contact Person: Barbara Fontaine

Pre-Commercial Thinning

Proposal: The purposes of these projects are to reduce tree stocking in young tree plantations. Plantations occur in all land allocations. The purpose of these projects is to maintain optimal growth and/or to encourage species and spacing diversity in existing managed stands. These projects would occur over a 5 to 10 year time period.

Location: District-wide.

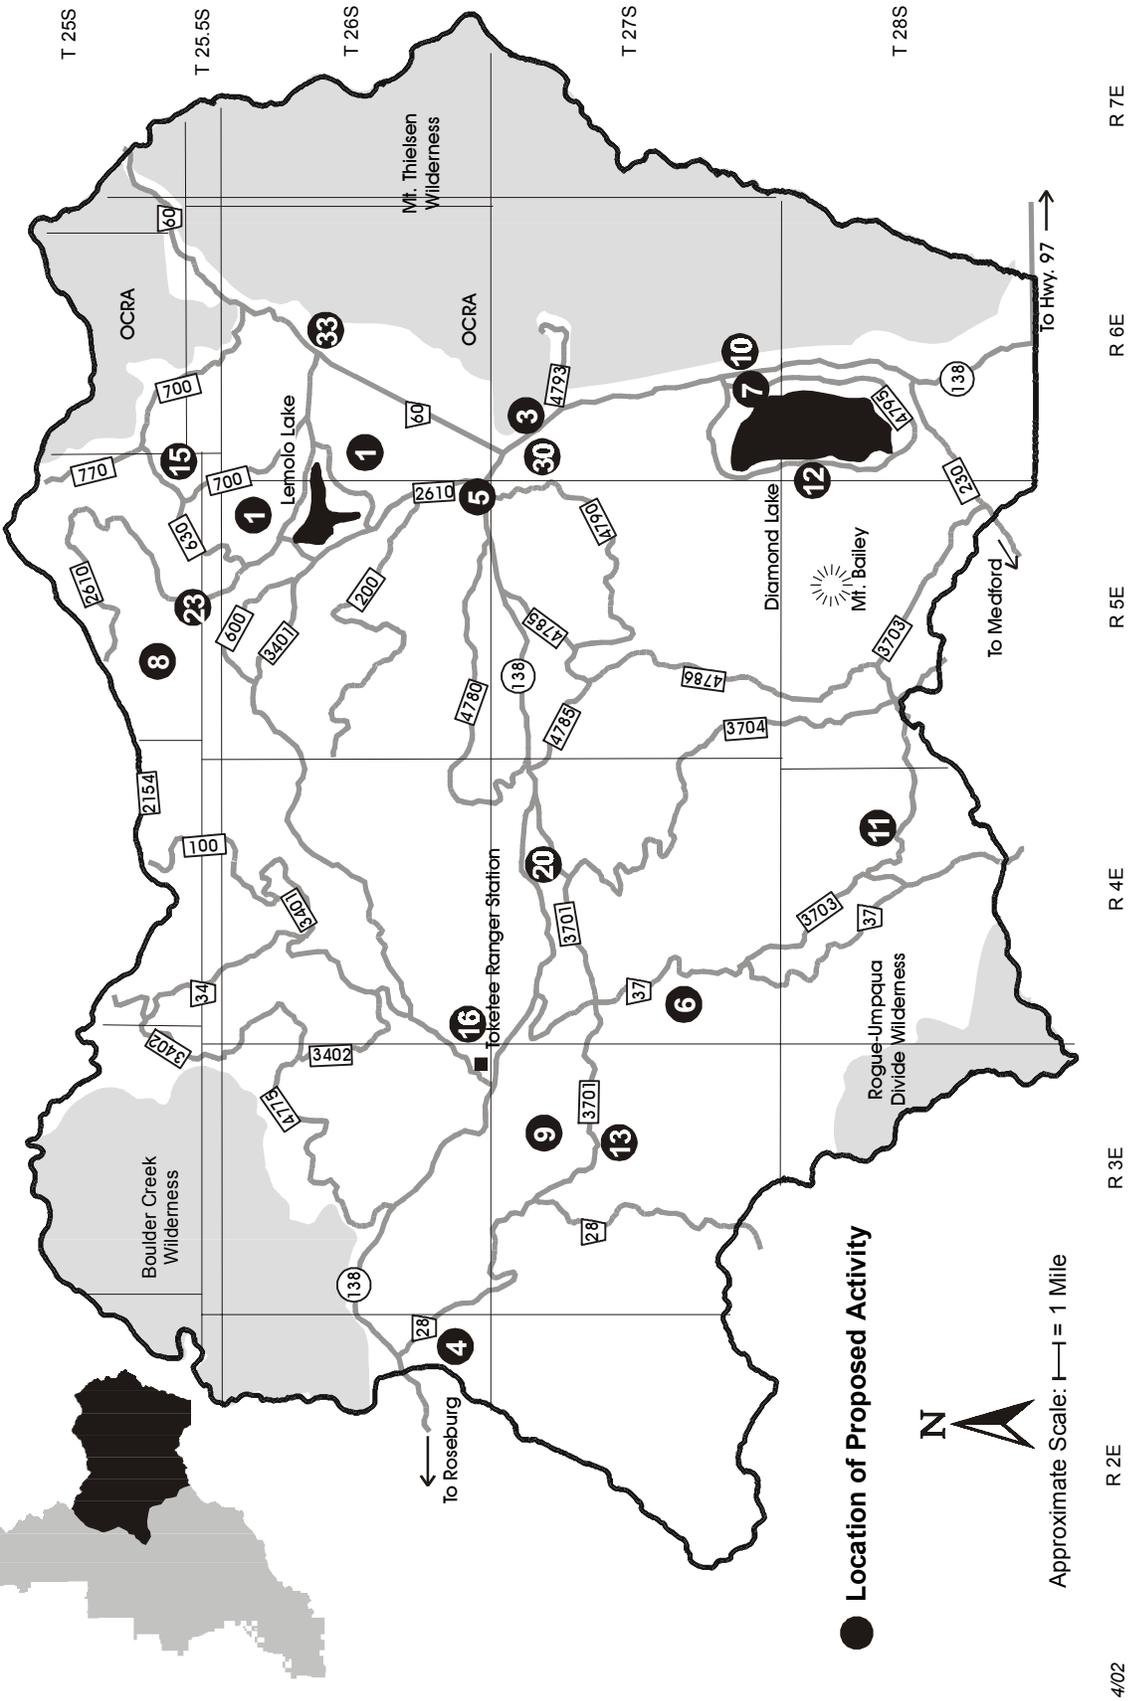

Public Input: The scoping period began with the mailing of the October 2001 Schedule of Proposed Actions.

Status: Environmental analysis was completed on 762 acres, comprising 33 units.

Decision Date: January 23, 2002 – Decision Memo.

Contact Person: Ron Campbell/Sherri Chambers

DIAMOND LAKE RANGER DISTRICT

Timber Management and Special Forest Products

1 Lemolo Watershed Projects EIS

Purpose and Need: This project would implement recommendations from the Diamond Lake/Lemolo Lake Watershed Analysis. Specifically, this project proposes to approximate natural disturbance processes such as large scale disturbance (stand replacement fire), light ground fires and insect attacks, and localized natural disturbances caused by small lightning fires, insects, and root disease, through even and uneven aged silvicultural prescriptions, while meeting Forest Plan probable sale quantity objectives for matrix lands. Additional projects are designed to improve water quality through road reconstruction, road decommissioning and rehabilitation of soils through subsoiling; reduce fire hazard by reintroducing fire into the ecosystem; improve long term site productivity of managed stands that have been adversely affected by past management practices, through subsoiling of main skid trails and temporary haul roads; and provide for special forest products (posts, poles, and house logs).

Proposal: The proposal includes the following activities:

- 468 acres of regeneration harvest;
- 926 acres of commercial thinning;
- 259 acres of uneven aged management prescriptions;
- 5 timber sales are planned to be sold in 2002 -2003;
- 515 acres of natural fuel treatment (underburn);
- 5.4 miles of new system road construction;
- 3.5 miles of temporary road construction and subsequent obliteration;
- 12 miles of road decommissioning;
- 30.5 miles of road reconstruction;
- 2 acres of permanent helicopter landing construction;
- 91 acres of subsoiling within existing plantations.

Location: T25S, R5.5E and R6E; T25.5S, R5.5E and R6E; T26S, R5E, R5.5E, and R6E; T27S, R5E, R5.5E, and R6E; T28S, R5.5E.

Public Input: The scoping period began with the mailing of the April 1999 Schedule of Proposed Actions. An open house was held at the Roseburg Library and a field trip was held in June of 1999. Another open house is scheduled for April 24 at the Umpqua Valley Arts Center from 4pm to 7pm, to inform the public on recently developed alternatives.

Status: Draft Environmental Impact Statement to be published in July.

Projected Decision Date: October 2002-Record of Decision.

Contact Person: Pat Williams

3 Electric Salvage

Purpose and Need: The purpose and need for this project is to recover wood fiber from previously felled hazard trees along Pacific Power Powerlines, to reduce the fire hazard along the highway corridor, keep the powerline right-of-way free of obstructions, and maintain visual quality objectives.

Proposal: This project would recover approximately 209 CCF (hundred cubic feet) [80 MBF] of wood fiber from an estimated 46 acres in four units. No standing trees would be felled unless additional hazard trees are found prior to or during harvest activities. Proposed harvest method would be a combination of log loader and skidder. Slash would be treated by lopping and scattering, or handpiled and burned. Areas of disturbed soil would be returned to previous contours and revegetated if needed in order to maintain visual quality objectives. No harvest is planned in riparian areas. No new road construction or reconstruction would be required.

Location: T27S, R5½ E; T28S, R5½E.

Public Input: The scoping period began with the mailing of the July 1999 Schedule of Proposed Actions.

Status: 30 day comment period planned in April.

Projected Decision Date: June 2002 -Decision Notice.

Contact Person: Steve Nelson

6 Fish Creek Watershed Projects

Purpose and Need: This project would implement recommendations from the Fish Creek Watershed Analysis. Specifically, this project proposes to approximate natural disturbance processes such as large scale disturbance (stand replacement fire), light ground fires and insect attacks, and localized natural disturbances caused by small lightning fires, insects, and root disease, through even and uneven aged silvicultural prescriptions, while meeting Forest Plan probable sale quantity objectives for matrix lands. Additional projects are designed to improve water quality through road reconstruction, road decommissioning, rehabilitation of soils through subsoiling, spring rehabilitation, trailhead relocation, in-stream wood placement; reduce fire hazard by reintroducing fire into the ecosystem; improve long term site productivity of managed stands that have been adversely affected by past management practices, through subsoiling of main skid trails and temporary haul roads; precommercial thin overstocked managed stands to improve health and vigor; and wildlife enhancement projects.

Proposal: The proposal includes the following activities:

- 422 acres of regeneration harvest;
- 834 acres of commercial thinning;
- 145 acres of uneven aged management prescriptions;
- 5 timber sales are planned to be sold in 2002-2003;
- 700 acres of natural fuel treatment (underburn);
- 3.5 miles of temporary road construction and subsequent obliteration;
- 35.2 miles of road decommissioning;
- 61 miles of road reconstruction/maintenance;
- 12 acres of permanent helicopter landing construction;
- Relocation of three trail heads;
- Wildlife enhancement projects;
- Rock source development;
- Spring rehabilitation;
- 1130 acres of subsoiling within existing plantations;
- 2644 acres of precommercial thinning;
- 8 miles of in-stream wood placement;

Location: T26S, R3E; T27S, R3E, R4E, and R5E; T28S, R3E, R4E, and R5E

Public Input: The scoping period began with the mailing of the April 2001 Schedule of Proposed Actions and the publishing of the Notice of Intent in the Federal Register. An open house was held at the Douglas County Library on May 9th, 2001 and a field trip was held on June 9th 2001.

Status: Alternative Development.

Projected Decision Date: April 2003 - Record of Decision.

Contact Person: Pat Williams

20 Long Term Soil Productivity Projects

Purpose and Need #1: The purpose of the following proposed actions is to provide the opportunity to study and evaluate how changes in site organic matter and soil porosity affect fundamental site processes controlling forest health, productivity, and sustainability, as outlined in the National Long-term Soil Productivity Study (LTSP) Plan. The Upper Clearwater Watershed Analysis, page 127, recommended “The Long Term Soil Productivity Study should continue to be funded and implemented on the District in order to learn more about the effects of compaction on site productivity.”

Proposal: The proposal includes the following activities:

- Replace plots 3, 15, and 16;
- Increase plot buffer size to a minimum of 20 meters and recruit snags for wildlife;
- Maintain complete and continuous vegetation control until crown closure on half of each study plot;

Purpose and Need #2: The purpose of the following proposed actions are to provide the opportunity to study and evaluate the effectiveness of restoration techniques on detrimentally impacted soils, as defined in the Soil Organic Amendment Restoration Study (SOAR) Plan.

Proposal: The proposal includes the following activities:

- Implement and monitor the study treatments based on the study design;

- Subsoil for compaction, land apply a Class A biosolid and chipped slash for soil conditioning, and reforest the study plots with a mixture of Douglas-fir and ponderosa pine;

Location: T27S, R4E, Sections 3, 7, 9, 10.

Public Input: The scoping period began with the mailing of the January 2001 Schedule of Proposed Actions. **Status:** Analysis proceeding.

Projected Decision Date: October 2002, Decision Notice.

Contact Person: Jim Archuleta or Rick Abbott

Facilities – Repair and Development

5 Windigo Cabin

Proposal: The Cascade Connection Snowmobile Club of Roseburg has proposed to construct a winter shelter in the vicinity of Windigo Snowpark (the junction of Hwy 138 and FS Road 60). The structure will be a single-story log cabin style shelter with wood stove. The shelter will provide an overnight facility for winter recreationists. A FS pit toilet is already in place. Scheduled for construction in the summer of 2002.

Location: T26S, R5.5E, Sec.6.

Public Input: The scoping period began with the mailing of the April 1999 Schedule of Proposed Action.

Status: Addressing comments from 30 day comment period.

Projected Decision Date: May 2002-Decision Notice

Contact Person: Terry Klingenberg

10 Diamond Lake-Mt. Bailey Viewpoint Construction

Proposal: Proposed project is to construct a viewpoint off of State Hwy 138 of Diamond Lake and Mt. Bailey as part of the Rogue-Umpqua Scenic Byway enhancement project. The proposed development area is approximately 5 acres. Construction would include an access road, parking, accessible toilet, picnic tables, and interpretive signage.

Location: T28S, R5.5E, Sec. 32.

Public Input: The scoping period began with the mailing of the April 1999 Schedule of Proposed Action

Status: 30 day comment period planned in April.

Projected Decision Date: June 2002 – Decision Notice.

Contact Person: John Wallig

15 Diamond Drive Reconstruction (formerly West Cascade Exploration Route Link)

Purpose and Need: This project would provide a safe, scenic route from Oakridge to Highway 138 for passenger cars, bicycles, and RV's that would meet the criteria for designation as a Scenic Byway. The byway would expand recreational driving opportunities and tourism within the concept of a scenic "less than 65 mph" route from Estacada to Ashland.

Proposal: Convert single lane routes (portions of roads 2154, 6000-770 and 6000-700) on the Willamette and Umpqua National Forests to double lane paved. Complete geotechnical investigation, design, construction, striping, and traffic control devices. Existing partnerships between the Forest Service, Oregon Department of Transportation and Federal Highway Administration are coordinating and funding completion of gateway and information portals at Estacada, McKenzie Ranger Station, Blue River and Westfir.

Location: Willamette side – T24S, R5E, Sec. 21,22,26,27,35, & 36. T25S, R5E, Sec. 1,12, & 13. T25S, R5 1/2E, Sec. 4, 5, 9, 10, 15, 16, & 17.

Umpqua side – T25S, R5E, Sec.13,24,25,36, & 35.

T25 1/2S, R5E, Sec.36. T26S, R5E, Sec. 1. T26S, R6E, Sec. 6,7,8, & 17.

Public Input: The scoping period began with the mailing of the April 2001 Schedule of Proposed Actions.

Status: Alternative development.

Projected Decision Date: October 2002 – Decision Notice.

Contact Person: Steve Nelson or Keith Bond

7 Boat Ramp Extensions

Proposal: The proposed project is to extend the C and M Loop boat ramps in Diamond Lake Campground. The existing ramps are too short to accommodate many boat trailers and often trailer wheels drop off the end of the ramp. The project

would extend the 2 boat ramps in Diamond Lake Campground eight feet each by adding 2 four feet pre-cast concrete sections to each ramp. Very little ground disturbance is anticipated. The proposed completion date is June 2003.

Location: T28S, R5.51/2E, Sec.9 &16.

Public Input: The scoping period begins with the mailing of the October 2001 Schedule of Proposed Actions.

Status: Scoping.

Projected Decision Date: June 2002, Decision Memo.

Contact Person: John Wallig.

8 Warm Springs Falls

Proposal: Under this proposal a safety railing with viewing platform would be installed on the Warm Springs Trail. In addition the trail would be brought to Accessible Standards. A parking area, toilet, and trail bridge would be necessary to meet these standards. This site is included in the UNF waterfalls brochure.

Location: This project is located in T25S R5E section 32

Public Input: Scoping begins with the mailing of the April 2002 Schedule of Proposed Actions.

Status: Proposed Action

Projected Decision Date: 2002– Decision Memo.

Contact Person: Mike Kinney

Special Use Permits

12 Diamond Lake Summer Homes

Proposal: Project is within the Diamond Lake Summer Home Tract for activities requested by permit holders for construction projects within their permit area. Requested projects are typically additions to existing cabins, construction of storage sheds, less than 130 square feet, and repair of septic or water systems.

Location: T28S, R5E, Sec. 1 and 12.

Public Input: The scoping period began with the mailing of the January 2000 Schedule of Proposed Actions.

Status: The project is in the developmental stage.

Projected Decision Date: 2002-Decision Memo.

Contact Person: John Wallig

13 Ramcell Communications Sites

Proposal: Proposed project is in response to a permit request from Ramcell Communications to construct and install two communication sites. The purpose of the proposed project is for Ramcell to provide cellular communications along State Hwy 138 where cellular service does not currently exist. The proposed communication sites would include a tower, equipment building, power supply, and security fence. Proposed sites are approximately 1/8 acre each. One site is located along an existing roadway and the second site is approximately 350 feet beyond an existing road.

Location: T26S, R1E Sec 7 and 8; T26S, R3E, Sec. 34 and 35; T26S, R3E, Sec. 26.

Public Input: The scoping period began with the mailing of the April 1999 Schedule of Proposed Actions.

Status: 30 day comment ended March 25, 2002.

Projected Decision Date: April 2002-Decision Notice.

Contact Person: Pat Williams

30 ODOT Storage Tank

Proposal: The purpose and need for the project is for storage of road de-icing compound at the Oregon Department of Transportation (ODOT) Lemolo Maintenance Station. The compound is to be used for winter highway maintenance. The proposal is to construct a pad and spill containment area for a 6000-gallon tank for the storage of magnesium chloride de-icing solution.

Location: T26S, R5½E Sec. 36.

Public Input: The scoping period began with the mailing of the July 2000 Schedule of Proposed Actions.

Status: Proposed action.

Projected Decision Date: On hold.

Contact Person: John Wallig

33 Kelsay Point Red Cinder Pit Use

Proposal: The allow removal of 6000 to 7000 cubic yards of red cinders from the Kelsay Point Red Cinder Pit by the Oregon Department of Transportation (ODOT) for winter use as sanding material on State Hwys. 97, 138, & 230.

Location: Kelsay Point Red Cinder Pit; T26S, R6E, Sec.21, W.M.

Public Input: The scoping period begins with the mailing of the October 2001 Schedule of Proposed Action. ODOT's request was received in July of 2000.

Status: Ready to sign.

Projected Decision Date: April 2002-Decision Memo.

Contact Person: Mark Tacheny

Watershed Restoration and Improvement

16 Toketee/Bull Hazardous Fuels

Purpose and Need: Reduce the fire hazard and create defensible space around structures in the Toketee Administrative Site, Toketee Campground, Clearwater Village and Lemolo #2; restore components and processes of the historic fire regime to some portions of the planning area.

Proposal: Use a combination of handpile and burning, removing hazardous fuels, and underburn up to 1500 acres within the planning area.

Location: T26S, R3E, Sec. 13, 25, 35, and 36.

Public Input: Scoping began with the mailing of the October 1999 Schedule of Proposed Actions

Status: Analysis proceeding.

Projected Decision Date: April 2002- Decision Notice.

Contact Person: Jill Napper

23 Lemolo 2 Canal Roads

Proposal: This project will upgrade drainage and stabilize fillslopes on roads 3400.078, 3400.077, 3400.072, and 2610.000. This project is necessary to reduce the likelihood of damage to the Lemolo 2 Canal. The project will repair or replace culverts, install gabions, lower fill heights, install riprap, and install erosion control matting. Reduced sediment production and transport will be an additional benefit.

Location: T25S, R5E, Sec. 31-33; T25S, R4E, Sec. 36; T25.5S, R4E, Sec. 36.

Public Input: The scoping period began with the mailing of the April 1999 Schedule of Proposed Actions.

Status: Reinstated, analysis proceeding.

Projected Decision Date: April 2002, Decision Memo

Contact Person: Mike Kinney

Wildlife Habitat Improvement Projects for 2002

Proposal : Several small mitigation and habitat enhancement projects are proposed within the District. Proposed treatment include forage seeding or plantings to improve big game habitat conditions, wildlife nesting or denning structure creation, road closures, mechanical weed treatment, mechanical regeneration of browse species, wetland enhancements and restoration, removal of old fencing, conifer control in meadows, and a water development. Other actions include the application of State of Oregon approved biological controls to Thorn Prairie to combat St. Johnswort, and the development of wildlife interpretive signs along the Dellenback Bike Trail.

Location : Multiple locations across the Diamond Lake District.

Public Input : The scoping period begins with the mailing of the October 2001 Schedule of Proposed Actions.

Status : Scoping.

Projected Decision Date: May 2002, Decision Memo

Contact Person: Jeff Bohler

11 Skookum Bog Restoration Project

Purpose and Need: The Alkali Cattle Allotment administered by the Rogue/Siskiyou Forest currently has cattle on the Diamond Lake RD that are negatively impacting a unique Sphagnum bog ecosystem at the headwaters of Skookum creek.

Excluding the cattle from the area along with restoring the native plant community is necessary to conserve the unique area.

Proposal: Fence the entire area where the plant Sphagnum is the dominant vegetation. If deemed necessary restore through propagation the Sphagnum and other native plants growing on site.

Location: T 28S R 4E Section 11

Public Input: The scoping period begins with the mailing of the October 2001 Schedule of Proposed Actions.

Status: Scoping.

Projected Decision Date: July 2002 – Decision Memo.

Contact Person: Clint Emerson

4 Rush Skeleton Weed Removal

Purpose and Need: Rush Skeleton Weed (*Chondrila juncea*), a high priority noxious weed on the Umpqua National Forest, has infested a 30 acre plantation in the Copeland Creek watershed. This species has high potential to rapidly spread throughout other nearby ecosystems like Oak Flats.

Proposal: The proposal is to interplant the plantation with quick growing, densely canopied trees which in theory will shade out the Rush Skeleton Weed over time. In addition it is proposed to decommission the last .7 miles of the 700 rd. and the 720 rd. that acted as logging operation roads in the 30 acre unit.

Location: . T 26S R 2E section 24

Public Input: The scoping period begins with the mailing of the October 2001 Schedule of Proposed Actions.

Status: Surveys pending, based on funding.

Projected Decision Date: March 2003 – Decision Memo.

Contact Person: Clint Emerson

Diamond Lake Ranger District Precommercial Thinning and White Pine Pruning

Proposal: This project will precommercial thin approximately 4927 acres of overstocked managed stands in matrix lands and 638 acres within the late successional reserve allocation in Copeland Creek over the next five years. It will prune western white pine over 200 acres of managed stands to reduce the risk of white pine blister rust.

Location: District wide.

Public Input: The scoping period began with the mailing of the January 2002 Schedule of Proposed **Actions**. Status: Analysis.

Projected Decision Date: May 2002 – Decision Memo.

Contact Person: Randy Menke

9 Fish Creek Road Decommissioning and 3701-220 Road Maintenance

Proposal: The proposal includes the following activities: decommission the entire length of roads 3701-230 (0.27 miles); 3701-233 (0.43 miles); a portion of road 3701-220 (1.39 miles); and perform road maintenance work on the 3701-220 road. Roads proposed for decommissioning will include the following activities: sub soiling with a winged ripper to a twenty inch depth, culvert removal and bank stabilization, and planting a variety of native tree and shrub species. Road maintenance work on the 3701-220 road will include restoration of 300 feet of the road prism ditch to original design standards and diverting water in a ditch back into a stream channel which will subsequently reduce sediment delivery into a stream channel tributary to Fish Creek. All of these activities are included in the Settlement Agreement for the Relicensing of the North Umpqua Hydroelectric Project FERC Project # 1927-008 in Sections 15.2 “Maintenance Responsibility” and 15.4 “Road Decommissioning”.

Location: T26S R3E Section 34, T27S R3E Sec. 3,10

Public Input: Scoping begins with the mailing of the April 2002 Schedule of Proposed Actions.

Status: Proposed Action.

Projected Decision Date: June 2002 – Decision Memo.

Contact Person: Stuart Carlson

Projects with Decisions Made During the Previous Quarter

8 Watson Falls Trail Reconstruction

Proposal: Reconstruction of the Watson Falls Trail is necessary to provide user safety, stability of the trail tread, and protection of the site. Upgrading of the Watson Falls Rest Area has increased use of the Watson Falls Trail. Replacement of deteriorated railing on the bridge is needed for user safety. Installation of railing is necessary to prevent people from cutting across switchbacks, thereby damaging soil and vegetation. Trail tread will be stabilized, smoothed out, and widened to specification as needed.

Location: T27S, R4E, Sec.6.

Public Input: The scoping period began with the mailing of the April 1999 Schedule of Proposed Action.

Status: Decision Memo signed January 17, 2002.

Contact Person: Mike Kinney

9 Whitehorse Falls Campground Reconstruction

Proposal: Proposed project is to reconstruct the Whitehorse Falls Viewpoint as part of the Rogue- Umpqua Scenic Byway enhancement project. Proposed project is within the current developed recreation site. Proposed improvements to the day use area are paved entrance road and parking, accessible trail and toilet, picnic tables, viewing platform and interpretive signage.

Location: T26S, R4E, Sec.2.

Public Input: The scoping period began with the mailing of the April 1999 Schedule of Proposed Actions.

Status: Decision Memo signed on February 11, 2002.

Contact Person: John Wallig

Campground Toilet Replacement

Proposal: The purpose and need for this project is to provide accessible and more sanitary vault toilets in public campgrounds. The proposal is to remove existing old and inadequate vault toilets in campgrounds and replace them with new accessible vault toilets.

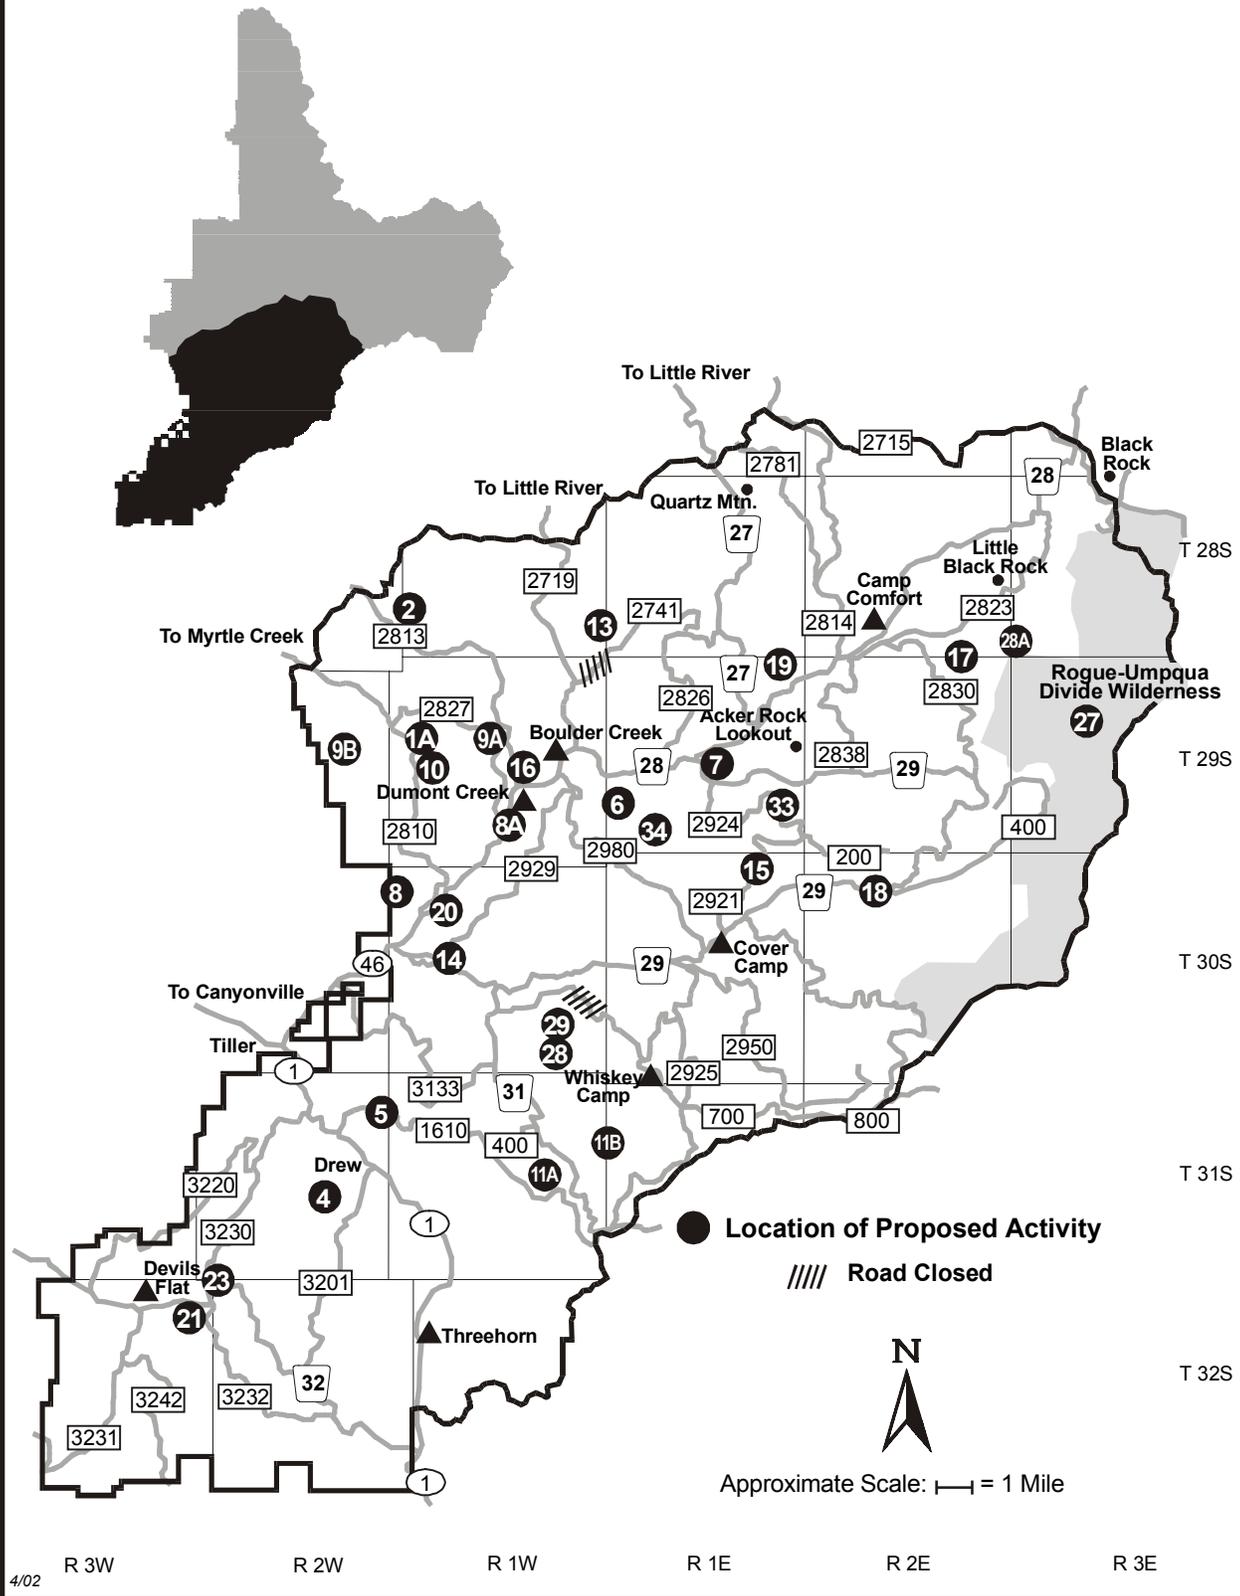

Location: District-wide.

Public Input: The scoping period began with the mailing of the July 2000 Schedule of Proposed Actions.

Status: Decision Memo signed on February 11, 2002.

Contact Person: John Wallig

Tiller Ranger District

4/02

TILLER RANGER DISTRICT

Watershed Restoration

1A Dumont Creek Forest Road 2827-500 Uplands

Proposal: Improve hydrologic function of area by treating ground impacts from past logging and other forest management activities. Treatments include fixing damaged pond outlets, correcting stream diversions, and subsoiling compacted skidroads.

Location: This project area is situated in T. 29S, R. 1W, Sec. 9, W.M.

Public Input: Scoping began in 1996.

Status: Analysis completed and awaiting decision.

Projected Decision Date: February 2002

Contact Person: Wes Yamamoto

2 Podunk Pond Wetland Restoration

Proposal: Restore approximately 1 acre of ash (hardwoods) wetlands through drainage and reconfiguration of the pond bottom. Includes the removal of the non-native fish and non-native invasive weeds.

Location: T. 28S, R. 1W, Sec. 30

Status: Monitoring and analysis of the situation indicates a Decision will be made based on the original Environmental Assessment for this project area. Original Decision selected other than the preferred alternative and that action did not meet the project's objective or purpose and need.

Projected New Decision Date: June 2002

Contact: Kris Rutledge

Range

4 Range Permit Reissuance

Proposal: Reissue term grazing permits reducing allowable cow/calf pairs from 670 to 216 on the three grazing allotments of Drew Creek, Diamond Rock, and Divide.

Location: These allotments are on the south end of the District.

Public Input: Scoping began August 1996.

Status: Public comment period ended July 2001 indicated a need to develop a new alternative. New alternative development in progress.

Projected Decision Date: September 2002

Contact Person: Wes Yamamoto

Vegetation Management

5 Summit Timber Sale

Proposal: Commercial thin 823 acres utilizing group selection, thinning around large pines to maintain their health, and salvage treatments on Matrix land allocations. Fuels created by the treatments will be hand piled or the area underburned. In addition, prescribed burning is proposed for 112 acres of Matrix and Riparian Reserve land allocations on dry meadows and oak woodlands to maintain habitat diversity. Under this proposal there would be 0.85 miles of road construction, 0.70 miles of reconstruction, 32.02 miles of road upgrades, 8.89 miles of road inactivation, and 2.85 miles of road obliteration.

Location: T. 30S, R. 2W; T. 31S, R. 2W; and T. 31S, R. 1W.

Public Input: The scoping period began with the mailing of the October 1997 Schedule of Proposed Actions.

Status: Consultation complete. Needs more red tree vole survey work.

Projected Decision Date: Pending Rothstein II decision.

Contact Person: Alan Baumann

6 Zinc Timber Sale

Proposal: Commercial thin 465 acres on Matrix and Riparian Reserve land allocations using understory removal, thinning around large pines to maintain their health, and regeneration treatments. Fuels created by the treatments will be hand piled or the area underburned. Under this proposal there would be 0.48 miles of non-system road constructed and then obliterated after use, 1.15 miles reconstructed and obliterated after use, an additional 0.63 miles of road would be obliterated, 2.3 miles of road inactivated, and 17.62 miles of road drainage upgrades.

Location: T. 29S, R. 1W and T. 29S, R. 1E.

Public Input: The scoping period began with the mailing of the October 1997 Schedule of Proposed Actions. The 30-day comment period ended August 31, 1999.

Status: Consultation complete. Needs more red tree vole survey work.

Projected Decision Date: Pending Rothstein II decision.

Contact Person: Alan Baumann

7 Bucky Timber Sale

Proposal: Manage 281 acres of Matrix land allocation in the Bucky Planning Area using activities such as commercial thinning and thinning around large pines to maintain their health, road construction, road obliteration, road drainage upgrades, road inactivation and closure, timber stand improvement activities such as precommercial thinning of plantations, and noxious weed treatment. Activities are in support of the Buckeye/Zinc Watershed Analysis.

Location: Buckeye Creek drainage of the South Umpqua River. The area overlaps portions or all of T. 29S, R. 1E, Sec 13-15, and 22; and T. 29S, R. 2E, Sec 8, 17, and 18.

Public Input: Public involvement with this proposed action started with the October 1997 Schedule of Proposed Actions.

Status: Consultation complete. Needs more red tree vole survey work.

Projected Decision Date: Pending Rothstein II decision.

Contact Person: Alan Baumann

8 Spam Timber Sale

Proposal: Harvest timber on 312 acres in the Spam Planning Area using partial cutting methods to meet ecological and pine health objectives. Fuels created by the treatments would be hand piled or the area underburned. In addition, prescribed burning would occur on approximately 20 acres of an oak woodland/meadow complex to maintain habitat diversity. Other associated activities would include the expansion of an existing rock quarry, reconstruction/upgrade of 20.43 miles of system roads, 0.73 miles of road inactivation, and 2.07 miles of road obliteration. These activities would occur on Matrix land, with no vegetation manipulation in Riparian Reserves.

Location: T. 29S and T. 30S, R. 1W and R. 2W.

Public Input: Scoping began with the mailing of the October 1997 Schedule of Proposed Action.

Status: Public comment period ended August 31, 1999.

Projected Decision Date: Pending Rothstein II decision.

Contact Person: Alan Baumann

8A Middle South Umpqua Vegetation Management: Ash & Collins

Proposal: Manage Ash Creek and Collins Planning Areas based on the objectives and desired future condition discussed in the Middle South Umpqua Landscape Analysis and Design. Activities such as timber harvest, timber stand improvement activities such as precommercial thinning of plantations, prescribed fire and fuels hazard reduction, road construction, road decommissioning, road drainage upgrades, road inactivation and closure, and noxious weed treatments.

Location: Ash Creek Planning Area is located in the Ash Creek drainage and a portion of Zinc Creek Facial. The area overlaps portions or all of T. 28S, R. 1E, Sec 27-29, 32-34, W.M.; T. 29S, R. 1E, Sec 3-9, 16-18, W.M., and T. 29S, R. 1W, Sec. 13 and 14, W.M.

Collins Planning Area is located in Francis Facial drainage. The area overlaps portions or all of T. 29S, R. 1W, Sec. 26, 27, 33-35, W.M.; and T. 30S, R. 1W, Sec 2-5, 7-11, and 17-18, W.M.

Public Input: Proposed Action will be available to the public by

Status: Scoping

Projected Decision Date: December 2002

Contact Person: Pauline Montgomery-Borg

9A & 9B Off-site Pine Plantation Stand Management and Restoration Project

Proposal: Develop and restore native plant communities now occupied by approximately 460 acres off-site pine plantations. Vegetation management treatment activities such as variable-density thinning and removal of some dominant off-site ponderosa pine for density control, stand structure development, and stand composition management are focused to decrease non-native plants and to increase stand heterogeneity. Underplanting of shade-tolerant species may also occur.

Location: T. 29S, R. 1W, Sec. 20, 26, 30, 32, 33, 34; T. 29S, R. 2W, Sec. 13.

Public Input: Scoping begins with the publishing of the January 2002 Schedule of Proposed Actions.

Status: Scoping

Projected Decision Date: June 30, 2002

Contact Person: Chris Rusch

10 2002-2012 Timber Stand Improvement (TSI)

Proposal: A long-term program of work to improve the health and sustainability of young stands. Proposed treatments will include early stand thinning, vegetation competition release, and pruning. These TSI treatments would occur on approximately 9,000 acres of 10 to 18 year old stands over a 10-year period. The proposed TSI treatments will be scheduled as the treatment areas reach optimum conditions in terms of tree size and stand density.

Location: Throughout the South Umpqua River watershed on Late-Successional Reserves, Riparian Reserves, and Matrix land allocations.

Public Input: The scoping period will begin with the January 2002 Schedule of Proposed Actions.

Status: Analysis on-going; consultation packet to be submitted February 1, 2002.

Projected Decision Date: April 30, 2002.

Contact Person: Pauline Montgomery-Borg

11A & 11B Fawn Helo Salvage Timber Sale

Proposal: Harvest approximately 150 acres from blowdown that has occurred since 1995. All snags and green trees that are not safety hazards will be retained on site. Maintaining minimal Forest levels of down wood will be ensured. Fuels created by the treatments will be hand piles as needed. No new road construction will occur with this project, but there will be 3.0 miles of resurfacing and 0.7 mile designated for drainage improvement. Proposal may include road inactivation or road obliteration. Proposal may also include 160 acres of precommercial thinning.

Location: T. 31S, R. 1W, Sections 13, 14, 23, 24, and 25, and T. 30S, R. 1E, Sections 18 and 19.

Public Input: The scoping period began with the mailing of the October 1996 Schedule of Proposed Actions and continued with the publication in the Tiller Times in February, 1997. A District Open House for this project was held February 1997.

Status: Consultation completed 1999; Biological Opinions issued 1998 and 1999.

Projected Decision Date: Pending Rothstein II decision.

Contact Person: Alan Baumann

Bridge Repair

19 Quartz Creek Bridge Repair

Proposal: Repair a bridge approach road fill being washed out by high water.

Location: T. 29S, R. 2E, Sec. 1.

Public Input: Scoping began October 1999.

Status: Preparing Decision Notice.

Projected Decision Date: September 2002

Contact Person: Dean Kenyon

Water Transmission Lines

20 Freeman Water Transmission Line

Proposal: Evaluation of an application by a private landowner to transport water from National Forest System lands to private property.

Location: T. 30S, R. 1W, Sec. 4.

Public Input: Scoping began October 1999.

Status: Scoping

Projected Decision Date: September 2002

Contact Person: Russ Groves

Private Road Access

21 Kirby Road Proposal

Proposal: Evaluation of a proposal by a private landowner to construct approximately three hundred feet of road across National Forest System land to access private property.

Location: T. 32S, R. 3W, Sec. 15.

Public Input: Scoping began June 1999.

Status: Waiting for Biological Opinion.

Projected Decision Date: May 2002

Contact Person: Dean Kenyon

Trails

28 Beaver Creek and Bunchgrass

Trails Relocation & Restoration

Proposal: Relocate portions of both the Beaver Creek and Bunchgrass Trails as follows:

Relocate Beaver Creek Trail #1426 to the north and east side of Beaver Creek, thus eliminating four creek crossings of Beaver Creek. Eliminate $\frac{1}{4}$ to $\frac{1}{2}$ mile of storm-damaged flooded trail along Beaver Creek in the NE $\frac{1}{4}$ of Section 3 and the SW $\frac{1}{4}$ of Sec 34; Eliminate those sections of both the Beaver Creek Trail and the Bunchgrass Trail that are on private property; and Relocate the lower section of the Bunchgrass Trail #1575 that has excessive grades of over 25% on steep, unstable, and slumped out soils.

Location: T. 30S, R. 1W, Sec. 34, and T. 31S, R. 1W, Sec. 2.

Public Input: Scoping began October 1998. Public comment period ended January 21, 2002.

Status: Preparing the Decision Notice.

Projected Decision Date: April 2002

Contact Person: Karrin Howell

28A Rogue-Umpqua Divide Wilderness Trail Access Reconstruction

Proposal: The proposal involves bringing ten trailheads up to standard by adding primitive toilets, information board/registration boxes, new trail signs, picnic tables, and horse facilities, such as hitching posts or high lines, as well as defining and improving parking and turnarounds for horse trailers. Trail segments from these trailheads leading into the wilderness will also be brought up to standard to eliminate erosion and resource damage.

Location: T. 28, 29, 30S, R. 2, 3, 4E

Public Input: Scoping began July 2001

Status: Scoping

Projected Decision Date: May 2003

Contact Person: Lori Depew

Mining

23 Red Hill Mine

Proposal: Evaluation of the Plan of Operations submitted by the claimant for Red Hill Mine.

Location: T. 32S, R. 2W.

Public Input: Scoping began March 1998.

Status: Finalizing the E.A.

Projected Decision Date: September 2002

Contact Person: Russ Groves

Prescribed Burning

29 North Beaver Prescribed Burn Plan

Proposal: Reintroduce fire by prescribed underburning of approximately 200-300 acres. This would decrease fuel loading and kill understory trees and brush that would normally be killed and/or burned during naturally occurring wildfires.

Some individual areas proposed for treatment have high fuel loading and ladder fuels such that pretreatment by manual slashing, handpiling, and burning is necessary to prevent the underburns from being excessively hot and destructive. The underburning will kill some standing green trees, a result consistent with natural fire processes. In some areas of heavy reproduction, this may necessitate another pile and burn treatment to further reduce fuel loading.

Location: T. 30S and T. 31S, R. 1W and 1E, within the Beaver Creek drainage North of Beaver Creek.

Public Input: Scoping began August 1997.

Status: Final surveys for red tree voles and mollusks needed Spring 2002.

Projected Decision Date: September 2002

Contact Person: Kathy Minor or Emily Sands

Projects with Decisions Made During the Previous Quarter

18 Jackson Creek Road Right-of-Way Wood Projects

Proposal: These projects capture an opportunity to utilize decked logs from a road relocation project to enhance fish habitat, improve conditions in the Riparian Reserves of Jackson Creek, and provide commercial timber to the local community. The proposal is to offer approximately 125 MBF for sale, stockpile the 55 MBF of trees or tree segments with rootwads attached for use in instream fish habitat structures within the Middle South Umpqua or Jackson Creek 5th field watersheds, and scatter approximately 50 MBF along the obliterated 1.59-mile segment of road along Jackson Creek to meet coarse woody debris recommendations in the Jackson Creek Watershed Analysis. The logs for commercial timber sale may need to be moved to a temporary decking location if they are not sold prior to the completion of the contract for the Jackson Creek Road Relocation project.

Location: The decked logs are located along Forest Road 2900 in T. 30 S, R. 2 E, Sec. 4 and 5; and T. 29S, R. 2E, Sec. 31, 32, and 33, W.M. The project area is within the Upper Jackson Facial 6th field subwatershed within the Jackson Creek 5th field watershed.

Public Input: Scoping began in February 2001.

Decision Date: June 6, 2001

Contact Person: Kathy Minor

34 South Umpqua Experimental Forest Weir Maintenance

Proposed Action: Clean out sediment from two of four existing instream weirs in the South Umpqua Experimental Forest. Sediment will be removed from catch basins in Watershed #1 and #2 using a small excavator or other similar equipment, loaded into a dump truck, and hauled approximately 1 mile to an existing quarry (Weir #231203) where material will be spread across the floor of a quarry. The estimated quantity of sediment is approximately 10 dump truck trips to the quarry. Weir cleanout would occur during low flow, instream work period between July 1st and September 15th. Water will be routed around the weir sites while the cleanout operation is being implemented.

Location: The two weir sites are located in T. 29S, R. 1E, Sec. 28 SW 1/4, W.M.

Public Input: Scoping began in April 2001.

Status: Decision Notice signed. Appeal period closed November 4, 2001.

Contact Person: Kathy Minor

RELEASE OF NAMES – FREEDOM OF INFORMATION ACT

Please Note: The Office of General Council in the Department of Agriculture determined that the names and addresses of persons who respond to solicitations for comments for Forest Service projects are subject to the Freedom of Information Act and subject to public review. Comments received in response to the actions in this publication, including names and addresses of those who comment, will be considered part of the public record on the proposed action and will be available for public inspection. Comments received anonymously will be accepted and considered; however, those who submit anonymous comments will not have standing to appeal the subsequent decision under 36 CFR part 215. Additionally, pursuant to 7 CFR 1.27(d), any person may request the agency to withhold a submission from the public record by showing how the Freedom of Information Act (FOIA) permits such confidentiality. Persons requesting such confidentiality should be aware that, under FOIA, confidentiality may be granted only in very limited circumstances, such as to protect trade secrets. The Forest Service will inform the requester of the agency's decision regarding the request for confidentiality, and where the request is denied, the agency will return the submission and notify the requester that the comments may be resubmitted with or without name and address within 15 days.

Prohibits Discrimination

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) Should contact USDA's TARGET Center at 202-720-2600 (voice and TDD). To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 14th and Independence Avenue SW, Washington, DC 20250-9410 or call 202-720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.
