<b>Sensitive Species Recommendation</b> <span style="float: right;">(Please check 1 box below)</span>						
<input type="checkbox"/>	<b>R2 Sensitive Species (SS)</b>		<b>Not R2 SS, but should be considered for other Emphasis Species Lists</b>			
<input checked="" type="checkbox"/>	<b>Not R2 SS and Not of Concern Now</b>		<b>Insufficient Information Available to make a recommendation</b>			
<b>Recommendation Rationale</b>						
<p>Adiantum pedatum is widespread in the East and Midwest, but there is a single historical record for the species in R2 (in the Black Hills of SD). Considerable effort has been made to relocate the plant in the Black Hills, but nobody has been successful (Reed Crook, pers. comm. 10/1/02). Therefore, we recommend that the species NOT be designated as a sensitive species.</p>
