<b>Sensitive Species Recommendation</b> (Please check 1 box below)					
<input type="checkbox"/> R2 Sensitive Species (SS)		<input type="checkbox"/> Not R2 SS, but should be considered for other Emphasis Species Lists			
<input type="checkbox"/> Not R2 SS and Not of Concern Now		<input checked="" type="checkbox"/> Insufficient Information Available to make a recommendation			
<b>Recommendation Rationale</b>					
<p><b>Lycopodium dubium is no longer accepted as a species by Weber and H. Wagner, a fern expert from Michigan. The former “dubium” species in CO are filed as Lycopodium annotinum. All state floras and lists now include L. dubium as a synonym for L. annotinum. The evaluator did not prepare the form because it is now difficult to ascertain which specimens of L.annotinum might have been assigned to L.dubium. Since this is not a good taxon, it does not qualify for status as TES.</b></p>					

<b>Name/Title</b>	Kevin Atchley, Range Management Specialist Benjamin Madsen, Botanist	<b>Date</b>	October 4, 2002
