

## **Current Research**

Rocky Mountain Research Station (RMRS) - Willow Creek Sediment study (Fire Effects)  
NASA - Satellite Imagery

## **Proposed Research**

PNW - Morrison Johnson - Revisit 167 monitoring plots within the Wallow fire.  
Northern - Impacts of large fire on public - Social Science (PROPOSED)  
Timeline of fire with effects (fire/veg/watershed) burned where @ times - AM/PM  
ADEQ - Watershed recovery in fire area  
Effects not just WUI/WMS, Horton T.S., Paradise Fire  
Sexton and Pam Bostwick- Fuels effectiveness  
RMRS - Stream temperature monitoring and national temperature database  
Scott Bonar UA - Apache trout and the fire  
Peter Reinthal UA - Pre and Post Fire Macroinvertebrates  
RMRS/USGS - sediment delivery, water quality, debris flows, fire and aquatics  
John Rinne - Fire/Fish  
NAU - Small mammal and bat surveys

## **Some Research Needs**

Aspen regeneration response from fire  
Aspen regen. - wildlife  
NAU - plots for white pine  
Gooding onion/willows and T&E (fire effects)  
Mistletoe situation  
noxious weeds  
Defining/refining identification of eminent mortality trees for salvage sales  
Ecotone change  
Insects and disease
