

**File Code:** 2210/2230  
**Date:** June 10, 2013

Bruce, Dave or Tom McFarland

Carmen, ID 83462

Dear Tom, Dave, and Bruce,

The following letter will document your meeting with Concetta Brown and Ingrid Drieling on February 27, 2013 and will serve as your Annual Operating Instructions (AOI) on the Burns Basin C&H and Carmen Creek C&H allotments for the 2013 grazing season. The authorized use for the Burns Basin C&H and Carmen Creek C&H allotments for cattle with the  and  brands will be as follows:

**Permitted Use:**

<u>Allotment</u>	<u>Permittee</u>	<u>Number/Class</u>	<u>H.M.</u>	<u>Dates</u>
Burns Basin C&H	Bruce, Tom or Dave McFarland	126 c/c	381	6/1-8/31
Carmen Creek C&H***	Bruce, Tom or Dave McFarland	55 c/c	193	6/16-9/30*

\*Permitted season will be equivalent to 2 months with in the period of use as specified in the annual operating instructions.

**Authorized Use for the 2013 Grazing Season:**

<u>Allotment</u>	<u>Permittee</u>	<u>Number/Class</u>	<u>H.M.</u>	<u>Dates</u>
Burns Basin C&H	Bruce, Tom or Dave McFarland	126 c/c	381	6/1-8/31
Carmen Creek C&H	Bruce, Tom or Dave McFarland	55 c/c	87	7/15-8/15 and 9/15-9/30

<u>Allotment</u>	<u>Unit</u>	<u>Number/ Class</u>	<u>H.M.</u>	<u>Dates</u>
Burns Basin C&H	Lower Wagonhammer and Little 4th	126 c/c	87	6/1-6/21
	Burns Basin	126 c/c	116	6/22-7/19
	Lower Silverleads	126 c/c	29	7/20-7/26
	Upper Silverleads and Upper Wagonhammer	126 c/c	145	7/27-8/30
	Middle Wagonhammer		Incidental Use	
Carmen Creek	Carmen Creek	55 c/c	58	7/15-8/15
	Carmen Face	55 c/c	29	9/15-9/30

Only cattle with the  and  brands are authorized to graze on the Burns Basin C&H and Carmen Creek C&H allotments. The Annual Operating Instructions are made part of your Term Grazing Permit as per Part 2, Item 8(a) of the General Provisions and Regulations. Situations may develop during the grazing season which requires changes to these instructions. If this becomes necessary, or if you cannot comply with some part of these instructions, contact Concetta Brown and obtain approval before initiating changes or deviating from these instructions. Changes can be made based on resource objectives, provided the changes are first approved and documented by an authorized officer.

The dates listed in the authorized use section may vary based on management needs or range readiness and proper use standards. If a change is necessary, please notify Concetta Brown at (208) 768-2503 as soon as you are aware of the need for changes in the planned use schedule. Any extension of use beyond the permitted dates will not be authorized.

### Allowable Use

The allowable use standards for the Burns Basin C&H and Carmen Creek C&H are listed below. It is your responsibility to monitor utilization levels and to move your livestock to the next unit planned or off the allotment when the standards have been met. If you need assistance determining utilization levels please contact Concetta Brown and she will assist you. Cattle removed from a unit after utilization levels have been reached are not allowed to return to the unit. The Forest Service is responsible for monitoring your compliance with allowable use standards.

#### Burns Basin C&H:

Riparian sites:

A minimum stubble height of **5 inches** on the current year's growth of key riparian species

Upland sites:

Maximum of **50%** use of current annual growth of key herbaceous species

Carmen Creek C&H:

Key Area Location # Unit Name / Creek Name <sup>2</sup>	Monitoring Attribute <sup>1</sup>	Use Indicator	Key Species	Trigger
<b>MIM*</b> This site was converted to a photo point in 2011  Baseline data will be collected in 2013	Browse Use	50%	Willow	45%
		30%	Alder	25%
	Greenline stubble	4 in.	Hydric spp	5 in.
	Bank Alteration	20%	n/a	15%
<b>Upland Sites-All Units</b>	Utilization	50%	Upland Grasses	45%
<b>Riparian Areas-All Units</b>	Utilization by key Species	50%	Rip. grass species	45%

\*The site did not meet the guidelines for establishment of a MIM. Photo points were established.

<sup>1</sup>Browse use/bank alteration and greenline stubble will be used until next trend reading is completed.  
To determine which attribute will be best suited to for attaining long term objectives.

<sup>2</sup>Carmen Creek Face Unit is extremely steep terrain and totally inaccessible by livestock.  
No riparian monitoring will occur.

The Biological Opinion for the **Carmen Creek C&H Allotment** laid out the following measures to be implemented to avoid and reduce potential impacts to ESA listed fish. The measures are as follows:

1. The on date will be varied so that livestock will be placed on the allotment at range readiness. This will reduce the potential for bank alteration. This will help meet our long term riparian resource objective for bank stability.
2. Annual use indicators will dictate when livestock are moved between units or off the allotment within the terms of the term grazing permit including moves in response to fish spawning. Annual use indicators will be monitored by Forest Service personnel.
3. Permittees will continue to salt at least ¼ mile away from creeks. This will continue to reduce potential impacts on spawning areas and designated critical habitat.
4. Permittees will continue to distribute livestock away from streams and associated riparian areas (ride) at least once every two weeks reducing potential impacts on spawning areas and designated critical habitat.
5. Fences and water developments have been placed to reduce livestock use on streams and their associated riparian areas. This will continue to reduce impacts on spawning areas and designated critical habitat.

## **Range Improvements**

Range improvements listed in part three of your grazing permit must be maintained prior to livestock entering the allotment.

Part 2, Section 8(i) of your term grazing permit states:

“This permit is issued and accepted with the provision that the permittee will maintain all range improvements, whether private or government-owned, that are assigned for maintenance to standards of repair, orderliness, and safety acceptable to the Forest Service. Improvements to be maintained are specified in Part 3 of this permit. The Government may maintain or otherwise improve said improvements when, in its opinion, such action will be to its advantage.”

The following is a list of improvements for the **Burns Basin C&H** Allotment that were discussed in the meeting:

You inquired on the possibility reconstructing trough # 2023 approximately 50 ft onto a bench south of its current location. By moving this trough it would become functional again by increasing the slope of the pipeline. Concetta will need to go out with Tom and Seth to look at the trough and see if the move is possible.

Tom would like to look at drift fence #2049 in the Lower Wagonhammer Unit and discuss possibly extending it  $\frac{3}{4}$  mile. Tom mentioned extending the fence would prevent drift into the private to the East of the allotment.

Trough #2221 is no longer functional but could be reconstructed or have a liner installed. Concetta will look into purchasing a liner.

The following is a list of improvements for the **Carmen Creek C&H** Allotment that were discussed in the meeting:

Tom would like to remove fence #2046 which serves as a boundary fence between their FS allotment and their BLM allotments. Since these units are run in conjunction the fence no longer serves a purpose. Concetta will look into why the fence was originally established and the possibility for its removal. The YCC crew may be available to assist with this.

You would like to have a cattle guard installed at the gate separating the Carman Creek and Carmen Face units. This gate is often left open and a cattle guard would help prevent drift into the adjacent unit.

## **General Management**

The Salmon-Challis Travel Management Record of Decision was signed December 24, 2009. With the issuance of this decision, all roads and trails designated for motor vehicle use map (MVUM). As

detailed in 36 CFR 261.13; 36 CFR 212.51a the prohibitions on motor vehicle use will not apply to motor vehicle use that is specifically authorized under a written authorization issued under Federal law or regulation. ATVs may be used off of designated routes for improvement maintenance prior to livestock entering Forest lands. This means, once livestock are on the allotment, ATV use off of designated routes should be limited to the unit cattle are currently in and the unit scheduled to be grazed next only for managing your livestock and/or maintaining improvements.

Dead livestock must be moved at least 100 yards from water, roads, and trails. Place salt at least ¼ mile from water sources and in areas lightly grazed to encourage an even distribution of utilization on the range. In situations where terrain does not allow proper placement of salt, please contact Concetta and she will determine a suitable location with your input.

Invasive weeds are becoming a serious threat to the welfare of our rangelands. Your assistance is needed to identify new outbreaks of weed populations and to prevent the establishment of weeds on the forest. Pay particular attention to areas where stock are concentrated such as loading/unloading areas, water developments, and salting areas. We have implemented a Noxious Weed Free Hay order on our Forest. This will require any hay that is brought onto the National Forest to be certified free from noxious weeds. All livestock entering the National Forest are recommended to be fed **Certified Noxious Weed Free Forage** for at least 2 days prior to entering the Forest.

The grazing fees for 2013 are the base rate of \$1.35 per head month.

Payment of your grazing bill is due five days prior to your earliest turnout date to allow time for processing. The Forest Service is required to give permittees a minimum of 30 days to pay their grazing fees. The Forest Service is requesting that permittees schedule their AOI meeting **a minimum of 35 days prior** to their earliest on date to provide adequate time to plan for the upcoming grazing season.

If you spot a wild fire, report it immediately to the Central Idaho Interagency Dispatch Center in Salmon, ID at **(208) 756-5157**.

Actual use and range improvement maintenance forms have been included for you to complete and return within **30 days** of the end of the grazing season.

You have received a letter explaining the Salmon-Challis National Forest concerns with the predicted below average precipitation levels and predicted above average temperatures. During the 2013 grazing season you should be prepared to be vigilantly monitoring forage conditions and stock water availability, and plan for prompt livestock moves to meet allowable forage and riparian browse use standards identified. In dry years it is critical to meet identified annual use indicators for resource health. We appreciate your ongoing cooperation and flexibility in this matter. If you have any questions or concerns do not hesitate to contact Concetta Brown, Ingrid Drieling or myself.

In addition, approval of requests for personal convenience and resource protection nonuse is not automatic and the authorized officer should discuss the reasons for the nonuse request with the permittee. Requests for non-use must be done in writing and the approval of a request for non-use must be in writing by the authorized officer. Full or partial permittee convenience nonuse may be approved by the authorized officer for no more than three consecutive years and not more than four years in any ten year period.

We look forward to working with you and solicit your cooperation and involvement in bringing about sound range and livestock management practices that will enhance all of the allotment resources. If you have any ideas or suggestions that will improve the management of the allotment, we would like to hear from you.

If you have any questions regarding any of the allotments for which you have permits, please call Concetta at (208) 768-2503, Ingrid Drieling at (208) 768-2516 or myself at (208) 756-5247.

Sincerely,

Jay Winfield  
District Ranger
