

Tahoe National Forest

Nevada City, California

The Forest's Terrain

Located in California, in the north-central Sierra Nevada Range, the Tahoe National Forest lies between Lake Tahoe on the east and the Sacramento Valley on the west. The land rises from 1,500 feet on the west with steep-walled river canyons, to an elevation of 9,100 feet along the rugged peaks and ridges of the Sierra crest. The abundant and varied natural resources found on this forest provide countless opportunities for the Forest visitor.

Land Ownership

The Tahoe National Forest encompasses just over 1 million acres. Of these acres, approximately 841,000 are Forest System land. Privately owned land totaling 367,000 acres is scattered mostly in the central portion of the Forest. Lake Tahoe is not located within the Forest boundary, but on the Lake Tahoe Basin Management Unit.

Early day land grants to the railroads as well as mining claims and private timberland holdings account for the high percentage of privately owned land within the Forest and the peculiar checkerboard pattern of ownership. This complex land ownership pattern requires your attention. Please respect private property. Some activities on private land may require the written permission of the land owner. Maps and information you may need to make your visit more enjoyable can be obtained from a visit, a call, viewing the website or by written request to any of the Forest offices listed at the end of this publication.

History

Being a gateway to the Pacific, the Tahoe National Forest was first traversed by the Washoe and Maidu Native Americans and later, by many of the early pioneers crossing the plains in search of gold from California. These trails were traveled by thousands of emigrants until the late 1860's, when the Transcontinental Railroad was built over the snowy summit.

The rich history of the Forest is still much in evidence today. The Tahoe National Forest contains thousands of recognized historical sites; many of which attract loyal patrons from all over the West. In the more remote areas, age old Native American sites, Gold Rush mining camps, and dwindling traces of emigrant trails are among the thousands of sites being protected, interpreted, and managed by the Forest Service for the benefit of both current and future generations.

Recreational Opportunities

In the nation's top 20 for most visited National Forest, the Tahoe provides outdoor activities year round. During spring, summer and fall, the Forest offers camping and boating sites, equestrian, hiking, and OHV trails, and is popular for hunting, fishing or general sightseeing. In the winter months, the Forest's high Sierra terrain accommodates many Nordic and alpine skiers and boarders along with snowmobile or snow play enthusiasts.

The Tahoe National Forest boasts hundreds of miles of trail for riding or hiking, and an hundreds of miles of off-highway vehicle trails. In addition, portions of the trail system are signed and marked for Nordic skiing and snowmobiles. Since the trail system is continually being expanded and improved, more current and specific information is available on request from the individual Forest offices or on the web.

Camping opportunities in a variety of settings are abundant on the Forest. Some choices include wilderness camping with no constructed facilities or camping in one of the many designated campgrounds with assorted facilities. There are boat access only campgrounds at Bullards Bar Reservoir, and developed campgrounds that accommodate overnight equestrian use in several locations. Most of the campgrounds are reservation based, but many have first come/first serve sites available.

Day use areas offer picnic and boating opportunities, and in some locations, interpretive and nature trails or historical sites. In addition, old fire lookouts have been converted to facilities that are available for rent.

Managing for Multiple-Use

National Forests were created by Congress at the turn of the 20th century in order to provide a wide variety of resources for a growing Nation.

Managed to protect the forest ecosystems, the Forest provides lumber and wood products, grazing areas, recreation, water for downstream uses, minerals, and a host of wildlife habitats. The rivers on the Forest generally yield 2 million-acre feet of water for down stream drinking and irrigation. Thousands of mining claims are still active and produce many valuable minerals for various uses.

Helping timber stands become healthier by thinning reduces the threat of catastrophic fire. Timber harvesting removes dead trees and reduces some of the overly dense stands of trees throughout the forest. The Tahoe National Forest is working aggressively in consort with other agencies to reduce the potential for wildfires. All timber activities are carefully planned with an emphasis on protecting watershed values and wildlife habitat.

During your visit to the Tahoe National Forest, you may see forest management of the many resources such as timber harvesting or sheep grazing or a prescribed burn. If you have any questions about any aspect of the Tahoe National Forest operations, please give us a call.

All Are Welcome

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.
