

# Printing and User Guide

## Wallowa-Whitman National Forest

## What do I need to know?

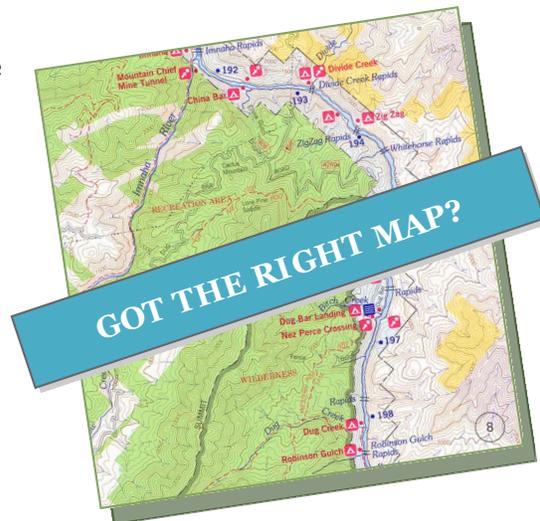

Thank you for your interest in the forest! Beginning June 2012, the Wallowa-Whitman National Forest will have new rules for motorized travel called a Travel Management Plan (TMP).

This guide will help you print and use TMP materials. You must have Adobe Reader to view and print these maps and materials. A free download is available at: <http://get.adobe.com/reader/>

## How do I print my own maps?

### To print a PDF map from the Wallowa-Whitman website:

1. Click on the map you wish to view and the map will open in your browser window. Use the Scroll Bar on the right to move the map up and down.
2. To print from the browser, hold your cursor over the bottom/middle of the screen. A toolbar will appear, select the Print option. This will produce a full version of the map, uncheck Choose paper Source by PDF Size Range (you may have change paper size under Page Setup) then print.
3. To zoom and print a smaller section of the map, use the Save option on the toolbar and save the map as an Adobe PDF file.
4. Open the PDF file and right-click in the gray area at the top of the page. Move the cursor to Edit and select Take Snapshot.
5. Scroll to the portion of the map you wish to Snapshot, use the cursor to highlight that area. Proceed to File at the top of the page and select Print. Uncheck Choose paper Source by PDF Size Range (you may have change paper size under Page Setup) then print.

**Travel Management applies to all motor vehicles, except for snowmobiles and over-snow machines, on the Wallowa-Whitman National Forest. Please visit the web at [www.fs.usda.gov/wallowa-whitman](http://www.fs.usda.gov/wallowa-whitman) for more information or download the free Motor Vehicle Use Map (available June 2012).**

## How do I use the TMP ROD or FEIS?

### To use the TMP Record of Decision (ROD) or Final Environmental Impact Statement (FEIS) PDFs from the Wallowa-Whitman website:

1. Find the Table of Contents (TOC) on page 5 of the document. Each line of the TOC is linked to a page in the document. By dragging a cursor over the TOC a small “hand” will appear, replacing the “arrow” cursor. When the “hand” appears click on the TOC and the document will move to the desired location.
2. On page 8 of the document is a list of the Tables located throughout the document. The lines in the TOC for the Tables are not linked to their location in the document. However, the page number is provided on the right-hand side of the page.
3. At the top, left-hand, side of the PDF document is a white square. By entering the page number that you wish to view and pressing enter, the document will move to the selected page.

## How can I see site specific comments?

### Purpose of site specific comments in the TMP process:

A data table containing all site-specific comments received during the comment period on the TMP Draft Environmental Impact Statement comment period is available online. The intent of this table is to describe what route was commented on, what the commenter was requesting in relation to that route (designate as open or closed and for what uses), why a specific action was requested if given, display what the Selected Alternative did with those routes and provide a simple reason for why it was either designated or not designated for motor vehicle use (resource protection, recreation access, etc).

### To use the site specific comment data table:

1. Find your name or the Commenter’s name that you are looking for under the “Commenters” tab at the bottom of the Excel spreadsheet (third tab from the left). Then scroll to the left and see the associated comment number in column A.
2. Select the “Comments” tab (first tab on the left) and scroll to the appropriate comment number in Column B. From left to right, each column provides additional information:

Col- umn:	Denotes:
<b>C</b>	<b>Affected Route Number</b> (in some instances the comment affects more than one route as noted by additional rows pertaining to the same comment)
<b>D</b>	<b>Area</b> if relevant to the comment
<b>E</b>	<b>Action Abbreviation</b> (abbreviations are spelled out on the Tab at bottom of the spreadsheet)
<b>F</b>	<b>Reason Abbreviation</b>
<b>G</b>	<b>Remark</b> if applicable
<b>H</b>	<b>Status</b> of the route in the Selected Alternative
<b>I</b>	<b>Reason</b> for the status as stated in the Travel Management Plan
