

Elden Pueblo Coconino National Forest

How Has Life Changed?

Sinagua Daily Life Activity

The Sinagua learned how to survive at Elden Pueblo by adapting to their environment and using what nature provided. Sinaguan life at Elden Pueblo was very different from your everyday life. Unlike today, children did not go to school, but learned valuable lessons on how to survive in the Arizona climate. They learned how to hunt, grow crops, make pottery, and build houses. They also learned about their history and important life lessons through stories passed down through the generations. Draw a line from each image in the left column (things we use or do today) with an image in the right column (things the Sinagua used or did then).
