Project Name: Trail Timber Sale – Deck and Remove Material
Location: Paisley Ranger District – Chewaucan River Watershed/Jakabe Restoration EA
Map: Trail Biomass
Project Contact: Megan Johnson – 541-943-4469

Description
The Forest Service would remove decks of material created during the Trail Stewardship Timber Sale. Tops and non-saw material were placed into decks during implementation. Material could be utilized as firewood or chipped. Remaining piles would be burned in place when possible. By removing these decks we will be able to reintroduce fire and subsequently close and decommission roads outlined in the Jakabe Decision Notice and Finding of No Significant Impact and fully achieve the project goals and objectives of that decision.
