

SCNF Frank Church - River of No Return Wilderness Trail Conditions

14-Nov-22

Trails and Access Roads: Designation of a road, trail, or area, or the authorized uses, should not be interpreted as an implication that the road, trail, or area is passable, actively maintained, or safe for travel. Seasonal weather conditions and natural events may render designated roads, trails, and areas impassable for extended periods. Many designated roads may be passable only by high-clearance or four-wheel drive vehicles; some may not be passable at all. Some trails have been significantly affected by fire and natural events and may no longer exist or be extremely difficult to find. Maintenance of designated roads, trails, and areas will depend on available resources, and many may receive little or no maintenance. Forest visitors should carry a saw and a shovel as wind or other weather events may cause trees to block roads and/or trails at any time. Chainsaws are not allowed in designated wilderness, but can be used on the roads going to the trailheads.

Trail work on the Middle Fork Ranger District is being accomplished by a multi-purpose crew whose members are Forest wide resources based in Challis and North Fork. Work on trails is also being accomplished with help from South Zone Fire personnel, area Outfitters and Guides, Student Conservation Association, Montana Conservation Corps, The Selway Bitterroot Frank Church Foundation, The Treasure Valley Back Country Horsemen, Idaho Trails Association, The Pulaski Users Group and others. The land area is roughly 800,000 acres with over 800 miles of trails. In addition to routine trail maintenance, improvement and signing, this crew is responsible for: trail condition assessment and database management; campsite inventory and monitoring; campsite naturalization and pack out of garbage left behind by visitors; airstrip management and maintenance; wilderness access management and maintenance that includes 8 road portals, 26 primary trailheads and associated signing; public contact, education and law enforcement; outfitter and guide camp inspections; winter patrols; support and coordination of resource related work.

Trail work on the Middle Fork Ranger District in the Cape Horn Area (#6) is being accomplished by the South Zone trail crew.

Middle Fork Ranger Distrit Trails							
4001	001	MIDDLE FORK	73.3	4	2022	Special Order restrictions apply to all users within the river corridor - >>>	2022: Trail cleared from Big Hole to Dagger Falls, damaged tread 1/4 miles below Big Hole. Fall Cr. to Prospect Cr. burned in August 2021. 2020: Trail has been cleared of trees, loose rock and some brushing from Big Hole(mile 0) to Camas Creek(mile 83). NOTE: There are still many small active slides between Elkhorn and Dome Creeks and also just downstream of Indian Creek Guard Station, which will continue to slide and may cause stock users some trouble. There are also sections of trail near Sheepsteater Hot Springs that are very narrow due to cliffs and may present problems for stock, especially those with wide loads. These sections should only be attempted by advanced stock users. SPECIAL ORDER: No fires without a FIREPAN. TOILET REQUIRED - everything gets packed out, including human waste.
4001.1	001.1	MIDDLE FORK EAST	12.7	2	2020	Special Order restrictions apply to all users within the river corridor - >>>	2020: Portions cleared by Middle Fork Lodge. 2019: Cleared in September from Little Creek G.S. to White Creek Bridge. Section at Whitey Cox Hot Springs needs retreat or rerouted to make a distinct trail. Trees will need to be cleared in that section as well. 2017: Cleared in May, some rock fall remains in trail. 2016: Portions cleared to Whitey Cox Hot Springs. 2011: Trail leaves from Little Creek Guard station and continues to the White Creek pack bridge. Good trail with moderate grade, it has more vertical relief than the west side trail. SPECIAL ORDER: No fires without a FIREPAN. TOILET REQUIRED - everything gets packed out, including human waste.
