

# Middle Fork District Trail Conditions - Updated October 23, 2017

Trails and Access Roads: Designation of a road, trail, or area, or the authorized uses, should not be interpreted as an implication that the road, trail, or area is passable, actively maintained, or safe for travel. Seasonal weather conditions and natural events may render designated roads, trails, and areas impassable for extended periods. Many designated roads may be passable only by high-clearance or four-wheel drive vehicles; some may not be passable at all. Some trails have been significantly affected by fire and natural events and may no longer exist or be extremely difficult to find. Maintenance of designated roads, trails, and areas will depend on available resources, and many may receive little or no maintenance. Forest visitors should carry a saw and a shovel as wind or other weather events may cause trees to block roads and/or trails at any time. Chainsaws are not allowed in designated wilderness, but can be used on the roads going to the trailheads.
