Holyoak Land & Livestock LLC
c/o Don and Kathleen Holyoak
PO Box 82
Green River, UT 84525

**CERTIFIED MAIL – RETURN
RECEIPT REQUESTED**

Dear Mr. and Mrs. Holyoak:

This letter will serve as your Annual Operating Instructions (AOI) for the Bald Mesa C&H Allotment for the 2012 grazing season. This AOI is made part of your Term Grazing Permit consistent with Part 1, item 3 and Part 2, item 8(a). A failure to follow these instructions is a violation of your permit. The AOI complies with the standards and guidelines found in the Forest Plan. **Please read your instructions thoroughly.**

AUTHORIZED USE FOR 2012

| Allotment | Numbers | Kind | Class | Season | Permittee | Non-use | |
|-----------|---------|--------|----------|----------------|--------------------------------|---------------------|----------------------|
| | | | | | | Resource protection | Personal convenience |
| Bald Mesa | 291 | Cattle | Cow/calf | 06/01 to 10/21 | Holyoak Land and Livestock LLC | | |
| Bald Mesa | 8 | Horse | Mature | 07/01 to 09/30 | Holyoak Land and Livestock LLC | | |

GRAZING SYSTEM AND SCHEDULE

| Pasture | Number | Kind | Approximate Dates |
|---------------------------------------|--------|--------|-------------------|
| Maloy Park | 291 | Cattle | 06/01 - 06/15 |
| Loop Road | 291 | Cattle | 06/16 - 07/06 |
| North Hollow | 291 | Cattle | 07/07 - 08/06 |
| Wilcox Flat | 291 | Cattle | 08/07 - 09/06 |
| South Hollow | 291 | Cattle | 09/07- 09/30 |
| South Mesa | 291 | Cattle | 10/01- 10/10 |
| Jimmy Keen | 291 | Cattle | 10/11 – 10/21 |
| South Mesa | 291 | Cattle | 09/23 - 10/15 |
| North Hollow/Wilcox Flat/South Hollow | 8 | Horse | 07/01 – 09/30 |

Permitted pack and saddle stock authorized on the allotment for livestock management will not exceed four head. This does not include the 8 head that you are billed for each year.

Your allotment should be inspected for range readiness to determine forage growth and fence

and water improvement conditions. **The pasture move dates shown above are an estimate, and may change on the basis of actual range conditions.** Situations may develop during the grazing season which requires changes to these instructions. If this becomes necessary, or if you cannot comply with some part of these instructions, contact the District Ranger and obtain approval before initiating changes or deviating from these instructions.

PROPER GRAZING-USE INDICATORS

Utilization standards are tools used in achieving or moving towards desired rangeland conditions. Utilization standards are not the desired conditions or management objectives themselves, they are indicators. Desired conditions and objectives are discussed in the 1986 Forest Plan and/or the Allotment Management Plan.

Desired goals in the 1986 Forest Plan include:

- Bring livestock obligation in line with rangeland carrying capacity
- Maintain upward or stable trends in vegetation and soil condition.

Management Objectives in the 1995 Bald Mesa Allotment Management Plan include:

- Manage vegetative types in varying successional stages to provide for a high level of vegetative diversity and production.
- Maintain upward or stable trends in vegetation and soil condition.
- Vegetative cover within the riparian component ecosystems would be maintained.
- Maintain ground cover at a level sufficient to protect watershed values.

The 1990 Forest Plan Amendment for Range Proper-Use Criteria states proper use as ranging from 40-65% use of upland key species depending on the grazing system applied and from 30-60% use of riparian key species depending season of use. This amendment kept the existing provision that proper use criteria are to be established on an allotment by allotment basis.

For the Bald Mesa allotment proper use criteria for 2012 is:

| | |
|-----------------------------|----------------------------------|
| <u>Upland Areas:</u> | <u>Use of Key Species</u> |
| Spring/Summer | *45-50% |
| Fall | *50-60% |

***Though the 1995 AMP sets proper use between 55-65%, this is based on a rest rotation system. The Bald Mesa allotment is and has been functioning as a deferred rotation system which sets 45-60% as proper use.**

| | |
|---------------------------------|--|
| <u>Riparian Areas:</u> | <u>Use of Key Species</u> |
| Spring (Early and rapid growth) | 50-60% |
| Summer (Moderate growth) | 45-50% |
| Fall (Slow growth) | 30-40% or 4-5 inches stubble or regrowth |

There is a difference between where percentage utilized is applied and where stubble height is applied to determine proper use in riparian areas. Percent utilized is used for plant species that are within the larger riparian area (the area that is influenced by the stream and the water table) but not along the greenline. The greenline is the first perennial vegetation on or near the stream's edge that is at least one foot wide. Stubble height measurements are used to determine proper use along the greenline. The plant species considered are typically water loving species (hydric species) such as sedges.

It is your responsibility as the permittee to recognize when proper use has been reached and promptly move all cattle as necessary. If you need some assistance, or methods and tools for determining proper use, please contact Tina Marian.

When proper use has been reached in the unit being grazed, your cattle are to be herded to the next scheduled unit. **When proper use is reached in the last unit grazed, all cattle are to be removed from the allotment, even if this date is prior to the end of your grazing season.** Cattle found on the Allotment before or after the permitted grazing season will be billed at the unauthorized use rate and permit non-compliance actions will be initiated.

You should be aware that Forest Service policy provides that “an authorized officer may require the permittee to monitor and report information on compliance with the grazing permit, allotment management plan and annual operation instructions as a term and condition of your permit.”

To facilitate livestock moves, gates may be opened a few days prior to the scheduled move date only when moving into an adjacent pasture. Gates must be closed and the grazed pasture entirely cleaned of livestock no later than five days following the scheduled move date. Grazed pastures must be kept clean of livestock following the pasture move.

IMPROVEMENTS

Thank you for the heavy maintenance that you did on your 2011 agreements, however to complete the agreement you still need to finish the enclosure on the South Hollow East bench spring **before June 1st** in order to be authorized to enter the allotment.

FENCE AGREEMENT: For 2012, the fence agreement will be the new fence that is proposed to be built west and north of the La Sal Loop Rd., it is not expected that the entire fence will be built this year.

POND AGREEMENTS: For 2012, depending on the time and money taken up building the proposed fence, you have also agreed to clean out some silted ponds in the South Hollow pasture as approximately shown on the map included.

When you complete your fence and spring agreements you must fill out and sign the Improvement Agreement Form (pink) that is found in your folder. I suggest that you provide photographs of before and after conditions to assist in documenting compliance with maintenance requirements. I also encourage you to contact Tina when you complete your maintenance so she can schedule a timely inspection.

If you fail to bring the above agreed improvements up to standard by **Oct 21st, 2012** you will not be allowed to stock the allotment in 2013 until the agreement is fulfilled.

Range improvements are essential in ensuring that livestock are well distributed and that Forest standards and guides are met.

- Improvements are to be maintained to standard prior to livestock entering the pasture and that failure to do so is a violation of their permit and action will be taken when violations are documented.
- If improvements have not been maintained, then develop a schedule to bring them up to standard.
- Until all improvements are functional it is not appropriate to authorize full numbers or season of use, unless assurances can be made that utilization standards will not be exceeded.

The maintenance of all structural improvements listed under part 3 of your Term Grazing Permit, Special Terms and Conditions: *Construction and Maintenance of Structural Improvements* is a requirement and should be completed prior to your entry into each pasture. The allotment permittee or permittees are responsible for the maintenance of all structural range improvements on this allotment. For allotments managed by an Association or Herd Manager specific maintenance responsibilities may be assigned to individual permittees by the Association President or Herd Manager.

If you wish to use forest products (trees and oak brush) from the National Forest to maintain your fences/spring exclosures on your allotment, you must receive authorization from either the Moab or Monticello Office prior to cutting.

NEPA and PLANNED PROJECTS

As discussed during the AOI meeting, an Environmental Assessment is currently in progress that will enable implementation of the proposed fence. Construction will not begin on the fence until NEPA and Archaeological clearance is completed.

Construction on the Loop Road will be taking place this summer. This could include closures of the road at Mill Creek and Miners Basin. The Forest Service will keep you informed of when the closures will be in place during the summer.

There are several bike races that will occur during the grazing season within the Bald Mesa Allotment. Please let us know if there are any impacts to your schedule as a result of these races.

1. Durango to Moab Mountain bike race will occur the week of June 24th. Racers will be using the Loop Road and Sand Flats Rd for the race.
2. Moab Century- Road bike race the will occur in September. Racers will be using the Loop Road.

3. Whole Enchilada Mountain Bike race will occur Sept 29th and 30th. Racers will be the Warner Lake Rd, Hazard County Trail, Kokopelli Trail and the UPS trail, all of which travel through the Bald Mesa allotment. Maps of the race route for this race is attached.

MISCELLANEOUS

Refer to Special Terms and Conditions in Part 3 of Term Grazing Permit for specific instructions pertaining to maintenance standards for range stock water developments, range fences, corrals, and herding standards.

All permitted livestock must be branded with your registered brand as documented in your Term Permit before they enter the National Forest.

Place salt blocks away from water, roads, meadows and other open areas so as to draw livestock into areas that receive light utilization. When livestock leave a pasture move the salt out of the pasture as well.

You will furnish sufficient riders or herders to achieve proper distribution of livestock.

Certified Weed Free Hay must be used if you do any supplemental feeding of horses on the allotment while gathering or moving cattle.

If you find the need to use mechanical clearing (tractors, bulldozers etc.) of fence lines or to clean ponds or other water improvements, you must have proper archeological clearance and permission from the District Ranger.

Enclosed in your AOI folder you will find an Actual Use Record sheet. As your 2012 grazing season progresses, please fill out this form in detail and return it promptly at the end of the grazing season. There are also extra sheets included in the folder where you are encouraged to document management on your allotment.

PAYMENT OF FEES

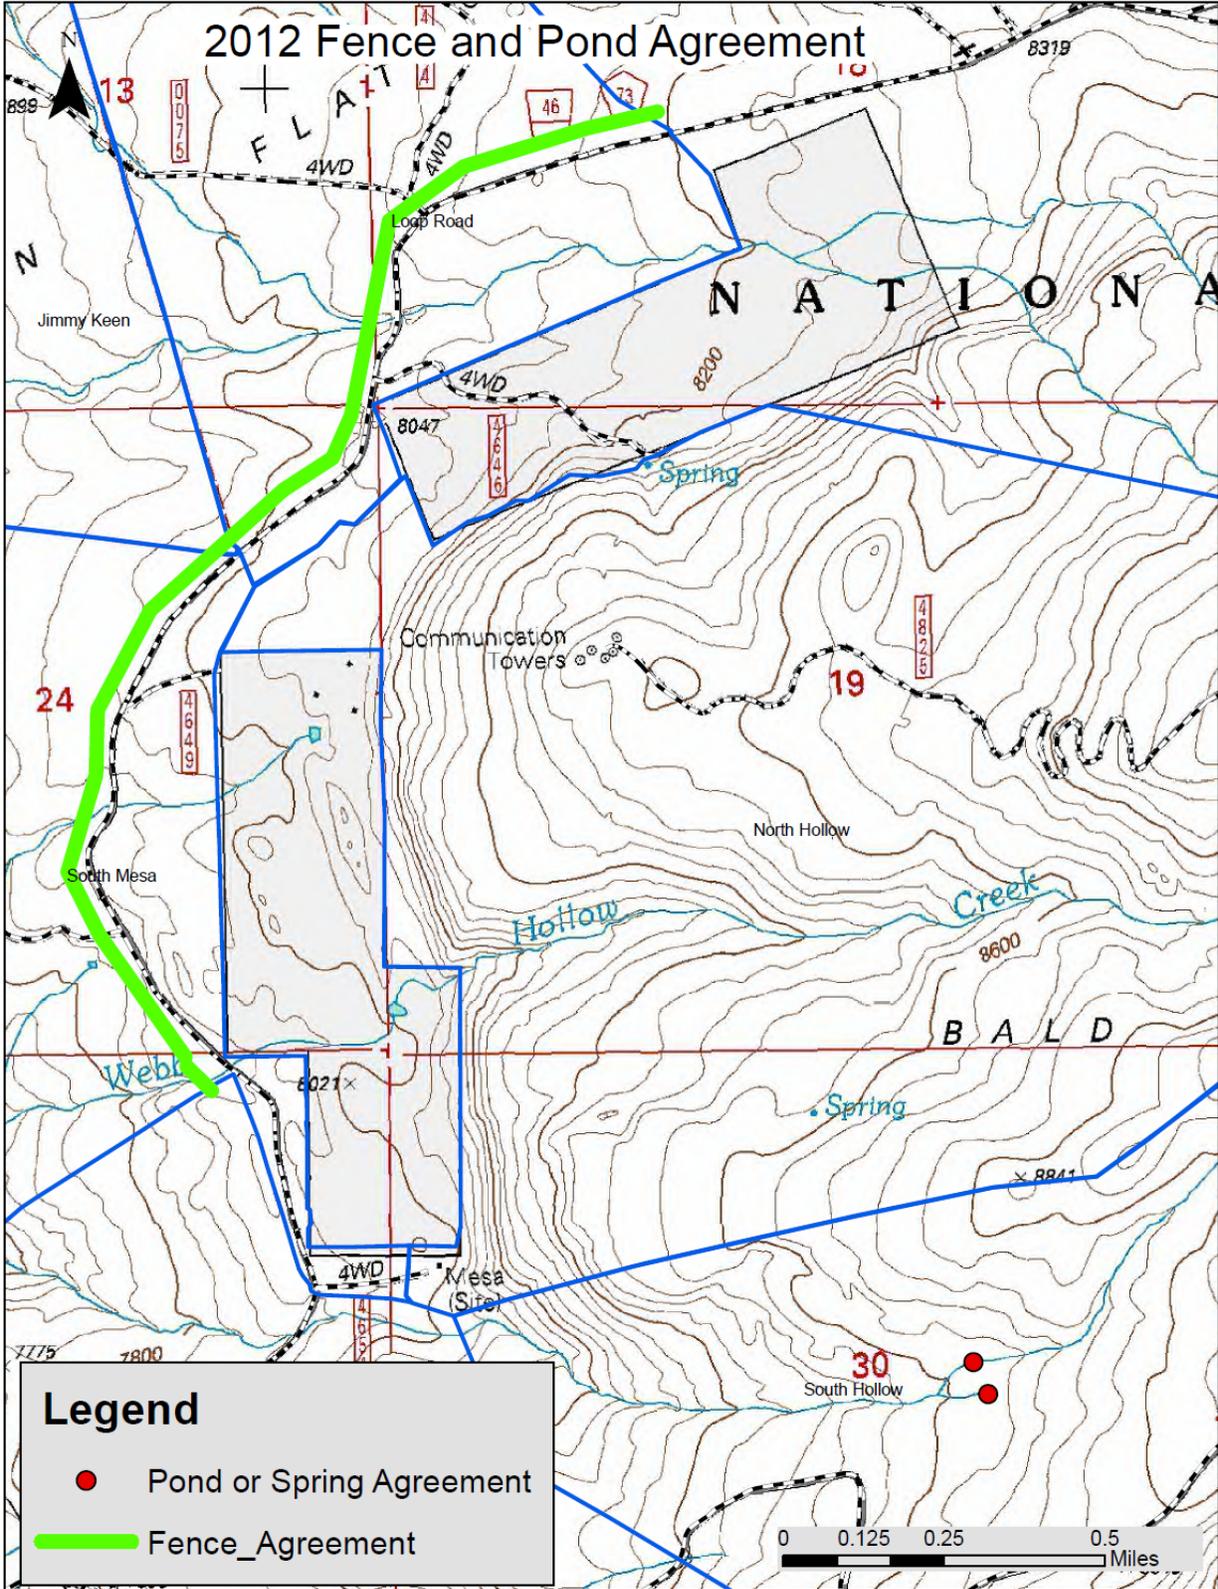

The permittee will not allow owned or controlled livestock to be on Forest Service-administered lands unless the fees specified in the Bill for Collection are paid and confirmation of payment through the "lock box" process is received prior to livestock entering NFS lands.

I am looking forward to working with you this summer. Please don't hesitate to call Tina Marian (435-636-3368) if you have any questions or if we can be of assistance.

Sincerely,

for MICHAEL DIEM
District Ranger
