Wayne and Melodie Baker
East Fork Ranches LLC

Clayton, ID 83227

Dear Wayne and Melodie,

This letter serves as your 2013 Annual Operating Instructions for the Spud Creek and Marco Creek allotments, and should be considered as an extension of your Term Grazing Permit #30014. Prior approval by the District Ranger is required to amend or change these instructions.

Permitted Use

Permittee	No. and Class Forest Service/BLM	Permit Type	Season of Use	Head Months
Doug Baker	30 cow/calf	Term	May 21-June 21	30*
Wayne Baker	136 cow/calf	Term	May 21-June 21	136

*50% Percent of Head Months are billed by the Bureau of Land Management (BLM)

Authorized Use for 2013

Permittee	No. and Class	Permit Type	Season of Use	Head Months
Doug Baker	30 cow/calves	Term	May 21-June 21	30*
Wayne Baker	136 cow/calves	Term	May 21-June 21	136

*50% Percent of Head Months are billed by the Bureau of Land Management (BLM)

Pasture Rotation

Unit	Number	On-Date	Off-Date
Joe Jump	166cow/calf	May 21	June 21
Spud Creek	166 cow/calf	May 21	June 21
Marco Creek	166 cow/calf	May 21	June 21
Woods Basin	Rest	Rest	Rest

The on-date is only a guide since actual turn out will be when range readiness occurs. Moves from unit to unit will occur before forage utilization standards have been met and no later than the schedule off-date.

Utilization Standards

Upland Forage	Riparian Greenline	Woody Browse
50%	4 inch stubble height (end of season)	50%

Permittee's Management Responsibilities

1. *Please inform the authorized officer in charge 3 days prior to initial cattle turn-out.* If you move onto the Allotment late and want to stay past your off date, you must make arrangements early in the grazing season and obtain prior approval from the District Ranger.
2. *Do not wait for the authorized officer to tell you it is time to move to the next unit.* It is the Permittee's responsibility to insure livestock are moved before utilization levels are exceeded and to notify the Forest Officer of this move.
3. Riding and herding is necessary to properly distribute livestock. The Permittee will provide a rider throughout the grazing season to maintain proper distribution of cattle, reduce use in riparian areas, and prevent concentrated use by livestock that could result in portions of the pasture becoming over-utilized. Use of riparian areas needs to be carefully monitored to ensure that utilization standards are met. Range personnel will monitor riparian and upland forage utilization.
4. Salt should be placed on suitable range at least ¼ mile from permanently located watering places, riparian zones, meadows and other areas where cattle naturally congregate. Placement should be in upland areas where additional forage utilization is desired. Salting areas should be moved annually to avoid permanent damage around salting grounds. Do not use the same salting grounds year after year.
5. With multiple-uses on the forest, gates are often left open and cattle stray into the wrong pasture. We realize this is a problem and an inconvenience. However, it is still the *Permittee's* responsibility to keep their animals in the proper unit. Cattle found in the wrong units or allotments should be returned immediately to the correct pasture within 24 hours of notification by phone or letter. Early use or repeated use of unauthorized pastures could result in an early move or off-date, or cancellation or suspension of your permit. Routine checks need to be made by you and/or your rider.
6. Any carcass or animals remains will be moved at least 100 yards from water, trails and roads within 24 hours of notification by a forest officer.
7. Under Special Order # 04-00-097 all hay, straw or mulch brought onto the forest for the feeding of horses must be Certified Weed Free.
8. The agency requests that you (the Permittee) be a pro-active partner in the inventory, management and treatment of noxious weeds on your allotment and adjacent National Forest System lands. All equipment which is used off of open roads on federal lands (for range improvement maintenance, or other management activities) should be cleaned and free of noxious weeds and their seeds prior to coming onto National Forest System lands. Please share your knowledge of known noxious weed infestations with your Range Management Specialist. Inspect and clean motorized and mechanized trail vehicles of weeds and their seeds before and after using Forest roads and trails.
9. *The move-off date is the date you must have all cattle off the grazing Allotment, not the day to start moving cattle off the Allotment.*

Range Improvements

Thank you for your efforts to continue maintenance/reconstruction to structural improvements on your allotment.

All annual maintenance on assigned improvements must be completed per your Term Grazing Permit. Range improvements will be maintained *before cattle enter a pasture or the allotment*. They should be kept to a standard of repair which is functional, safe, and acceptable to the Forest Service. Improvements are listed in your Term Grazing Permit and are shown on the Allotment map. If you have questions regarding what improvements are your responsibilities, please contact your Range Management Specialist. *Failure to complete necessary maintenance may result in the initiation of permit suspension or cancellation procedures in whole or in part.*

No ground disturbing activities or new construction should be conducted on the Forest by the Permittee or their personnel without approval from the District Ranger. Materials for replacement and heavy maintenance will be provided to the Permittee by the Forest Service whenever possible. Materials for normal yearly maintenance are the responsibility of the Permittee.

Other Considerations

Range inspections may occur several times during the grazing season to check maintenance of range improvements, forage utilization, and compliance with this year's grazing rotation. You are invited to participate in inspections conducted on the Allotment. We will try to contact you a few days in advance to let you know when we will be looking at your Allotment.

Enclosed are your 2013 Grazing bill and a Year End Grazing Report for you to record Actual Use data for 2013 and range improvement needs for future grazing seasons. Please record the date and number of cattle turned onto the allotment, the dates cattle are moved to and from each pasture, and the date cattle are removed off allotment. Accurate records of these dates, maintenance work completed, and future range improvement needs should be returned to our office at the end of the grazing season. The Forest Service uses these records to help allocate Range Betterment Funds, which are used to purchase materials for improvement reconstruction.

If you have any questions regarding these Annual Operating Instructions, please call me or Barry Dopp Range Management Specialist, at 208-879-4100. We are looking forward to working with you this grazing season.

Sincerely,

KRIS STEIN
District Ranger
