

Help Keep Our Caves Open

SAVE OUR BATS

Stop the Spread of a Deadly Fungus

- **White-Nose Syndrome (WNS), has killed millions of bats**
Thousand of caves across the country are being closed to public use to help stop the spread of this deadly fungus.
- **Bats eat more than their weight in insects nightly**
Bats save farmers and consumers billions of dollars annually in insect control.
- **Don't be the one to spread this deadly fungus**
Decontaminate clothing and gear before entering a cave if you've previously visited another cave.
