### Notice of herbicide application in Eagle Rock fire area

WILLIAMS, Ariz. – Kaibab National Forest employees plan to apply herbicide in the 2010 Eagle Rock fire area, north of Sitgreaves Mountain, during the weeks of July 9 and July 16, subject to appropriate weather conditions.

The herbicide treatment is intended to control bull thistle, an exotic invasive species.

Crews will use an herbicide called Milestone mixed with seed oil surfactant and blue dye. The dye is used to mark the sprayed vegetation. Signs will be posted in treated areas.

For additional information, please contact Rangeland Management Specialist Jason Stevens at (928) 635-5625.
