I. INTRODUCTION

Through the authorities of the CFMA, CAL FIRE and the USFS work cooperatively in wildland fire management and other national domestic incidents. This cooperative relationship improves the efficiency of these programs by facilitating the coordination and exchange of personnel, equipment, supplies, services and funds among the Agencies to the Agreement. The CFMA authorizes the cooperative use of agency resources for the purposes of performing prescribed fire or other fuels management related projects (Section 31).

This Supplemental Project Plan is to document the cooperation between the parties to utilize CAL FIRE Type I Fire Crews, otherwise known as inmate or ward crews of the Conservation Camp Program to perform prescribed fire or other fuels management work on National Forest Systems land.

II. SCOPE AND DURATION

This Supplemental Project Plan will be in effect for the term of the CFMA. The scope of this supplemental project plan is outlined in under item IV. Project Description.
