

Wolf Pen Gap Off-Highway Vehicle Trail System Collaborative Rehabilitation work - 2011-2012

A specialized trail dozer and excavator conduct trail reconstruction at Wolf Pen Gap. The dozer, donated by AR Trailblazers with help from the Ouachita ATV Club, is a valuable tool used by employees and volunteers to conduct important work at the trail system.

(Left and below left)

Arch culverts protect streams and allow free flow of water and aquatic species.

Before

After

The Trails Unlimited Enterprise Team illustrates the benefits of Best Management Practices, commonly called BMPs, to partners, volunteers, and Forest employees.

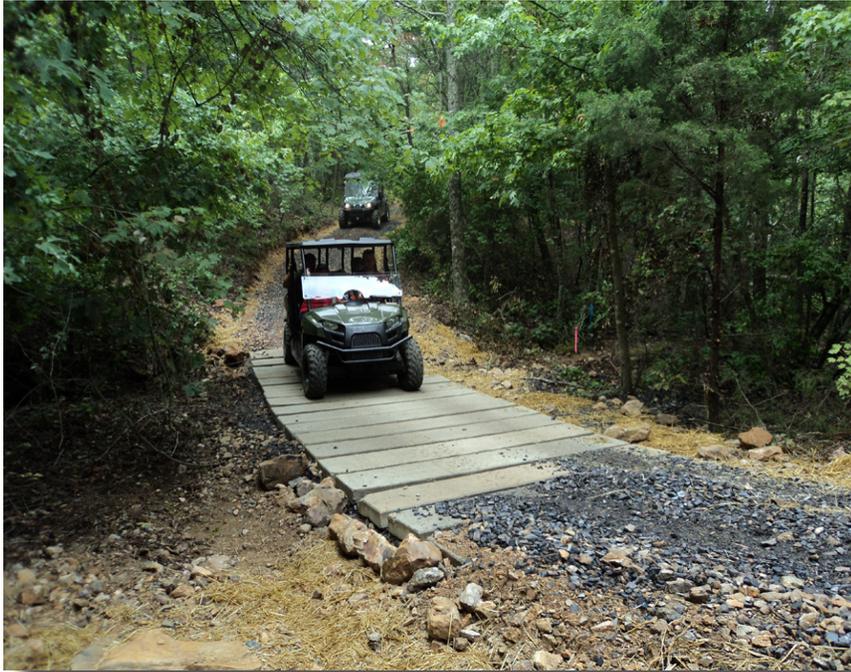

Ouachita ATV Club members, Trails Unlimited, and Ouachita National Forest employees construct an arch culvert to minimize sedimentation.

Youth Conservation Corps (YCC) crewmembers assist with trail restoration.

Ouachita Job Corps Center students build planks for installation at stream crossings at Wolf Pen Gap.

An off-highway vehicle traverses a new and improved stream crossing at Wolf Pen Gap.
