Acronyms & Abbreviations

Definitions

Abbreviation: A shortened form of a word, term or phrase used chiefly in writing to represent the full form (for example: °C for degree centigrade, N for nitrogen, ha for hectare, etc.)

Acronym: More commonly used in writing and conversation, an acronym is formed by taking the initial letters of a name, term, or title (such as WO for Washington Office, NFS for National Forest Systems, R&D for Research and Development, S&PF for State and Private Forestry, and so on); or by combining initial letters or parts of a name or title (such as "COLA" for cost of living adjustment, "AGRICOLA" for Agriculture Online Access, "asap" for as soon as possible, etc.) to shorten long titles and make them easier to remember. Some acronyms may have more than one meaning and are so noted in the list.

This is an alphabetical listing of acronyms and abbreviations you may encounter in Forest Service documents and publications or websites, or those materials (e.g., correspondence) that may have impact on your work or situation, whether you're a scientist, wildlife biologist, administrative assistant, etc. When available, matter in parentheses indicates the deputy area, staff, program, computer system, or office, and other pertinent information.

For a complete list of acronyms used across all agencies in the US Government, please go to http://www.firstgov.gov/Topics/Reference_Shelf.shtml (click on Abbreviations and Acronyms).

You are welcome to participate in constructing and improving this list.

If you can't find what you're looking for, or have a question and comment, disagree with any item, or wish to add to the list, please contact leav@fs.fed.us; (202) 205-3818.

To move from one letter of the alphabet to another, highlight that letter and simultaneously press **[Ctrl]** (e.g., **[press CTRL-A]** to go to listings under letter A, and so on.
