Subject: Order No. 12-05
Los Padres National Forest
Fire Use Restriction

To: File

From: Peggy Hernandez, Forest Supervisor

Due to rising temperatures, the seasonal drying of fuel moistures and predicted fire weather forecasts the forest now needs to limit fire use. In order to protect the natural resources and public safety, the Forest Supervisor is imposing fire restrictions throughout the forest on August 8, 2012 through the end of the official 2012 fire season.

By restricting open fires it is less likely that an escaped campfire will accidentally cause a wildland fire. Therefore, I will restrict fire use to those designated campfire use sites listed on Exhibit A.

In addition, I will restrict smoking, except within an enclosed vehicle or building, or a designated campfire use sites on Exhibit A.

I will also restrict operating or using any internal or external combustion engine without a spark arresting device properly installed, maintained and in effective working order.

Zone "A" rifle deer season which includes the majority of the Los Padres National Forest opens August 08, 2012. Due to the numerous shooting related fires this season, recreational shooting is not permitted unless specifically authorized to do so. However, a person hunting during the open hunting season for a bird or mammal as specified in the laws of the State of California, and having a valid California hunting license in his or her possession may discharge a firearm at the legal game bird or mammal.

These restrictions are effective as of August 8, 2012 and will remain in effect until fire danger conditions no longer exist.

Implementation of this Forest Order is in compliance with current NEPA policy and direction as stated in the Forest Service Handbook, Categorical Exclusion from Documentation, Section 31.12 (Closing an area during a period of extreme fire danger). This action is administrative in nature and does not implement any ground disturbing action. Therefore, this action does not pose any significant impacts on forest resources. Based on current conditions regarding potential fire danger the Forest Supervisor has determined that implementation of this Forest Order is necessary. This is not a project or activity implementing a land and resource management plan that is documented in a decision memo, decision notice, or record of decision.
