

PCT Fire Warning: Detour & Alternatives

October, 2012

Heavy smoke from the Icy Fire is threatening to make hiking the PCT in lower Agnes Creek unpleasant, undesirable, and possibly hazardous. The PCT in lower Agnes Creek is still open to public use at this time. However should the Icy Fire continue to spread towards the PCT, creating a dangerous situation, the PCT between Hemlock Camp and High Bridge Trailhead will be temporarily closed to protect hiker's safety.

Consider using the "PCT Detour" or "Alternatives" shown on the map below. More detailed maps and information are available at Holden on the Holden Trails bulletin board or in the Holden Village Hike Haus.
