Undergraduate Research Assistant

Grew native corn in grow bags containing local soil, compost tea, and different amounts of pinon charcoal (native). Collected soil samples at set intervals and tested for amounts of microorganisms of each sample by using a Soil DNA Extraction Kit.

Education

New Mexico State University, Las Cruces, NM
Pursuing a Bachelor of Science in Forestry, expected graduation: May 2014
GPA: 3.6 on a 4.0

Job Related Training Courses

National Hispanic Environmental Council Minority Youth Training Institute

August 2011

Participated in intensive science-based, environmental activities. Tested water quality by using water test kits and by capturing macroinvertebrates. Tested soils by using soil test kits. Compared plant vegetation and health at different locations. Learned key concepts on identifying bird species and their habitats. Given multiple presentations from different agencies: US Fish and Wildlife, National Park Service, US Forest Service, NRCS, EPA, Attorneys, Hydrologists, and Biologists.

Quivira Coalition Conference

November 8-10, 2011

Attended the 10th annual conference for new agrarians. Learned how the next generation of leaders must tackle 21st century challenges such as: degraded landscapes, loss of resources, and pollution. Gained knowledge on how to create sustainable agriculture and farming practices. Acquired proper restoration techniques for both small and large scale ranches. Learned about effects of global warming, and what to expect from it in the future.

Forest Health Management

June 14-15, 2011

Completed Forest Insect and Disease Training Workshop on tree diseases and insects, their relationships with one another, and what signs to look for if they are present. Determined what trees were hazards or at risk of injuring someone, and what caused them to be hazardous.

Quivira Coalition Training Workshop

May 7 & May 8, 2011

Transplanted willows and cottonwoods and planted native grass seed to restore the vegetation along the Mora River. Built fences around the cottonwoods to increase their chances of survival. Performed cross sections to monitor the geomorphology of the stream.

Science and Agriculture Summer Experience Program

June 2010

Assessed streams and gullies by using surveying equipment. Tested the Mora River, running through the Wind River Ranch, for E. coli and cultivated bacteria samples by incubating them in petri dishes.

Forestry Career Development Event Contest, Future Farmers of America

2006 - 2010

Learned to identify trees, their scientific names and general distribution, their wood product value and value to wildlife and livestock Identified forestry equipment, insects, and tree diseases, parts of a chainsaw and how to operate a chainsaw, read azimuths, measure tree heights, and to accurately determine the distance between points by pacing.
