 - High School diploma offered through Estacada School District
- **Community Partners:** Northwest Association of Accredited Schools, Mt. Hood National Forest, U.S. Military, Workforce Investment Board, Youth Council, Clackamas River Basin Council, Oregon Fish and Wildlife, City of Estacada, Clackamas County Parks and Recreation

Job Corps Civilian Conservation Center Mission

The mission of Forest Service Job Corps Civilian Conservation Centers (JCCCCs) is to train eligible youth, ages 16 to 24 with educational, social and vocational skills, while assisting in the conservation of the Nation's public natural resources. The Forest Service operates 27 JCCCCs that span 6 Forest Service Regions and 23 forests and grasslands. Job Corps students are most widely known for their program contributions in urban forestry, hazardous fuels reduction, construction and firefighting. Students are available for Forest Service projects ranging from forest and ecosystem activities to the rehabilitation and weatherization of facilities and developed recreation sites, hazardous fuels projects, and woody biomass conversion projects. Timber Lake Job Corps students have worked on the following community projects:

- 106 students deployed to 30 wildland fires and all-risk incidents, working 17,601 hours during the 2015 fire season, including hazardous fuels reduction projects on Mt. Hood National Forest
- Streamside restoration project on the Clackamas River to enhance the spawning areas of native salmon on the Mt. Hood National Forest, including tree planting and invasive species removal
- Painting decommissioned weight station on Mt. Hood National Forest
- Cutting fire wood and connecting drip watering irrigation systems for Clackamas County Parks and Recreation Department
- Line construction including small tree and brush removal in Dufur, Oregon
- Community Service projects throughout local community, including the Estacada School District, Estacada Garden Club, Solve River Clean up, Stop Oregon Litter and Vandalism and Clackamas River Basin Council
- Maintenance duties, including carpentry, electrical, plumbing, painting and carpet removal and laying at Pines Senior Village

<p style="text-align: center;">Research</p> <ul style="list-style-type: none"> Data collection Inventory

The Forest Service is facing critical shortages of workers. Job Corps is an ideal source from which to recruit and improve the diversity of its permanent workforce. The partnership between the Forest and JCCCCs can benefit both parties through development of Work-Based Learning (WBL) opportunities that provide on-the-job training for students and help the Forest Service meet mission critical project goals. Looking to add professional, trained, youthful, diverse staff to your project or office? Forest Service Job Corps Civilian Conservation Center students or Mobile Corps can be a valuable addition to your next project.

Mobile Corps projects are larger scale, multi-student and/or multi-center projects. These projects have ranged from painting/maintenance at Grey Towers National Historical Site, building smaller buildings and campsite projects, to the construction of ranger stations and staff housing. A formal application process must be completed for project consideration.

Job Corps students are eligible for federal employment. As students they can be hired using the Pathways Program. They may also qualify for the Public Lands Corps Act (PLC). Students are able to compete through the traditional federal hiring ; however, using these two authorities might expedite JCCCC student hiring. Contact Cyndi Szymanski at 303-275-5074 or e-mail at :ceszymanski@fs.fed.us for additional information.
