

## Stoves, Lanterns and Heaters

Cool all stoves, lanterns and heaters before refueling. When filling, place them on the ground in a cleared area. If fuel spills, move the appliance to a new clearing before lighting it. Recap and store flammable liquid containers in a safe place. Never light lanterns or stoves inside a tent, trailer or camper. Always read and follow instructions provided by the manufacturer.

**REMEMBER TO PROPERLY DISPOSE OF USED OR EMPTY FUEL CONTAINERS**

These campers had their stoves and fuel too close to the surrounding vegetation. When operating these types of appliances,

**YOU MUST HAVE A 5-FOOT CLEARANCE FROM VEGETATION!**
