Ref: Mike House Complex

DEQ & USFS,

*In my opinion and experience in drilling in the Upper Blackfoot Valley, to remove and relocate the tailings from the Mike Horse mine to another location seems a mistake to myself.*

*A complete EIS needs to be done to insure the safety of the Blackfoot Valley.*

*I also believe Bear Creek should be rerouted and contained as to where the old dam is isolated and free of surface water and run off water.*

Sincerely,

*Mark Christian*
