Subject: Mike Horse

Attn: Kathy Bushnell

USFS & DEQ.

This letter is to re-enforce the short comment I made at the public hearing. The poor decision to move the tailing pond has already been made by the USFS. There is little or no opposition to the paymaster and first gulch site. The only one opposing it being the USFS. How much of the 5million deference is going to be wasted in litigation and delays cause by the opposition to sec. 35? We need the jobs now that moving this would create not 5 years from now and more money wasted from trying to convince the public to sec 35. Forget about it and move forward.

Lowell D. Cox (Lonny) 4th generation on Cadotte Creek Ranch and have worked at the mike horse over the years in various different jobs. I remember Shaue gulch, Dry creek, Sanborn gulch and Flora gulch, over the years the USFS has changed these names for reasons I could never get a sensible explanation why they did this. Looks like this repository site is going to be the same darn thing, the USFS is going to do it their way and to heck with the public and land owners in the area.
