Color (or Expectation):

FINAL REPORT for 2012

This is the final weekly fall color report for 2012.
It was a great fall foliage viewing season.

Estimated Peak Period:

Current Conditions:

Although the peak of fall foliage viewing season has past, there are still some pockets of color scattered throughout the Cherokee National Forest.

Wind and rain have taken their toll on leaves. Some areas of color remain in isolated pockets at lower elevations.

Weather:

[Current weather conditions from the National Weather Service](#) are updated continually. Weather information is derived from National Weather Service data. [Chattanooga](#) [Knoxville](#) [Johnson City](#)

Remarks:

Visit your Cherokee National Forest

The Cherokee National Forest is a special place. Each year people come from near and far to visit this unique area.
