Barry Point Fire

Incident Action Plan

Thursday-Friday

August 16-17, 2012

Night Operational Period

1800-0600

OR-FWF-120680

FS - P6G47N

BLM - G47N

INCIDENT OBJECTIVES

1. Incident Name

Barry Point

2. Date Prepared

08/16/2012

3. Time Prepared

2100

4. Operational Period – 8/16-8/17/2012 NIGHT 1800-0600

Management Objective:

- Implement good risk management practices in order to provide for firefighter, other responder and public safety. Use good risk analysis processes, the principles of the 10 Standard Fire Orders, LCES and the 18 Watch-Out Situations as the foundation for risk decisions at all levels.
- Use aggressive outreach to insure timely and accurate dissemination of information regarding fire related activities is provided to the public, land owners, cooperators, elected officials and other stakeholders.
- Utilize efficient and effective business practices to manage the fire cost, which should be in alignment with the identified values to be protected. Cost to be tracked in accordance with the approved cost share agreement.
- Ensure that relationships are maintained or enhanced with local land owners, business owners, the general public and other key stakeholders.
- Coordinate with ODF, the District and Forests resources regarding resource considerations, and WFDSS inputs.
- Develop strategies that have high probability of success for the overall suppression efforts on the incident.

Operational Objectives:

- Continue to implement strategies for engaging the fire that will help ensure coordinated efforts for mission success.
 - Implement identified actions at the appropriate time to allow for the right operational tempo to accomplish mission and reduce risk to fire fighters.
 - Where it can be safely done, minimize acreage burned, damage to private property and improvements.
 - Utilize resource advisors for input to help minimize environmental concerns related to operational activities.
 - Assess daily the validity of the strategy and tactics and assure planned tactics will meet suppression objectives.
- Utilizing operational strategies and tactics that minimize, impacts to private lands and structures, resource damage, economic impacts, and minimize the disruption to local activities and businesses where practical:
- Provide timely initial attack assistance to the forest and local agencies within the TFR or as requested.

Commanders Intent: To meet the intent of these objectives to provide the highest level of customer services for all involved with or affected by the incident, all incident assigned personnel should be prepared to take the appropriate actions regarding:

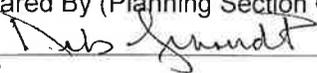

- Maintaining good situational awareness within the sphere of their established work areas.
- Personal interactions with others both inside and outside the incident management organization or incident operational areas.
- Managing an incident-within-an-incident and familiarities with medical extraction points.
- Establishing and maintaining good 360-degree communications structures to ensure all critical and important messages reach the appropriate people in a timely manner.

Strategy: The Barry Point incident management strategy is based on "Values at Risk." Firefighters, the public and other incident responders being the highest value. We will engage the fire on our terms at the appropriate tempo, where probability of success is high and the risk is acceptable. A combination of tactics will be employed with consideration of values at risk noted above as well as communities, private property, and infrastructure. Tactical actions are based on the principles of point defense and a mix direct / in-direct effort as dictated by the situation.

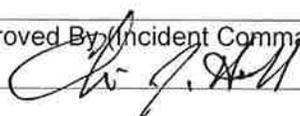

The following are guiding principles.

- The **Right Plan** (i.e., as informed by the Risk Decision Framework)
- In the **Right Place** (i.e., where we have a reasonable probability of success)
- At the **Right Time** (i.e., when we have favorable conditions for efficient and effective suppression)
- With the **Right Assets** (i.e., those suppression assets needed to safely implement tactics in support of reasonable objectives)
- For the **Right Duration** (i.e., release resources as soon as they are no longer needed)

INCIDENT Weather Forecast

FORECAST NO: 16

NAME OF FIRE: Barry Point

PREDICTION FOR: Night SHIFT

UNIT: Fremont-Winema NF

SHIFT DATE: Aug. 16, 2012

SIGNED: *Carl S Cerniglia Jr*

TIME AND DATE

Incident Meteorologist

FORECAST ISSUED: Aug. 16, 2012, 1200 PDT

WEATHER DISCUSSION: There remains a slight chance of a thunderstorm mainly north of the fire area until about midnight. However, even if a thunderstorm does not develop in the immediate vicinity of the fire, outflow winds could still impact the area. Overall, temperatures are expected to be a bit warmer than last night with somewhat lower maximum RH values than was observed last night. A general light westerly flow across the area this evening is expected to transition to a north to northeast flow after 2200 and then ease up toward dawn.

WEATHER FORECAST: Tonight

WEATHER: Partly cloudy. Slight chance of a thunderstorm until around midnight.

MIN TEMPERATURE: 53-58.

MAX HUMIDITY: 35-45%.

20 FT WINDS:

BRANCH II: West to northwest 2 to 5 mph becoming light.

BRANCH III: West to northwest 4 to 7 mph becoming north-northeast after 2200.

BRANCH I & IV: West wind 5 to 9 mph easing this evening then becoming north to northeast 5 to 10 mph aft 2200. Wind easing again after 0300.

HAINES INDEX: 4 (Low).

MIXING HEIGHT: 1500-2000 ft. AGL.

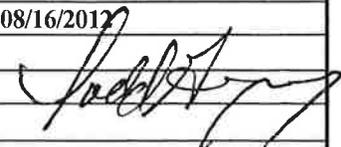

OUTLOOK FOR FRIDAY: Sunny then becoming partly cloudy with a slight chance of showers and thunderstorms late in the day. Highs 89-94. Minimum RH around 12-17%. Northeast wind 3 to 6 mph becoming southwest 4 to 9 mph.

EXTENDED FORECAST:

SATURDAY: Mostly cloudy. Chance of showers and thunderstorms. Lows 58-63. Highs 82-87. Minimum RH around 20%. South to southwest wind 7 to 15 mph and gusty.

SUNDAY: Partly cloudy. Lows 49-54. Highs 80-85. Minimum RH around 20%. Southwest winds 5 to 15 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #16	TYPE OF FIRE: Wildland
FIRE NAME: Barry Point	OPERATIONAL PERIOD: Night 08/16/2012
DATE ISSUED 08/16/2012	TIME ISSUED: 1200
UNIT: FRF	SIGNED: /s/ Todd Gregory FBAN 

INPUTS

FUELS

Fuels in the fire area are primarily composed of **cured grass**, mixed **grass and brush** (less than 2 ft. tall), and timber **with understory**. Primary timber species include mixed-sized Ponderosa Pine, Western Juniper, and True Fir (at higher elevations). Brush and understory includes Mountain Mahogany, Bitterbrush, conifer dog-hair thickets, sagebrush, and Ceonothus (at higher elevations). Snags are common throughout timbered areas and may contribute to spotting. Live fuels will contribute to fire intensity and rate of spread.

WEATHER SUMMARY

See fire weather forecast for detailed information.

FIRE BEHAVIOR INPUTS

Higher humidity recovery tonight will cause the fire to lose intensity sooner in the absence of wind. As we move towards a more normal diurnal pattern, wind will have a larger role in fire behavior than it has up to now. Fine fuel moistures will approach maximums of 15% during night operations and this increase will significantly decrease fire behavior in those fuels. Expect continued open burning in concentrations of heavier down fuels. This will continue producing pockets of unburned fuel along the perimeter. Relative Humidity above 50% will

*** Fine fuel moisture near 15%***

Bitterbrush moisture 90%, Sagebrush 50%-60% Probability of Ignition (PIG) 15-35%

Fuel Type	Rate of Spread	Flame Length	Spotting Distance
Grass (GR2)	8-20 ch/hr.	2-3 feet	0.1 mile
Grass with mixed shrub (GS2)	3-11 ch/hr	1-2 feet	0.3mile
Timber with Understory (TU5)	2-4 ch/hr	1-3 feet	0.3 mile
*GS2 - primary spread fuel type	*forecasted winds		*from flare-ups

SPECIFIC:

DIV A, B, AA, N, Z Patrol and Mop-up.

DIV C, D Variable winds will change the direction of smoke dispersal but no direct impact on established lines is expected with the exception of the very southern portion of Division D. If winds do swing to NE late in the period, there is potential for heat crossing lines near the D-E division break.

DIV E, F, G Humidity recovery and fairly light winds will again assist control efforts in these divisions. Westerly winds will continue to transport heat parallel to control lines until later in the period when winds may shift around to North- Northeast. No organized fire spread is expected to the south tonight. The D-E division break could potentially have heat impacts on the lines if winds switch to NE tonight.

DIV J, L Humidity will not be as good as last night but expect similar fire behavior. Grassy areas will be more resistant to burning until mid-flame wind speeds reach 12 mph. Expect fingers to develop where open lines exist as the fire progresses through heavier fuel types around grassy meadows and openings.

DIV M Diurnal winds will return to more normal tonight. Diurnal winds out of the northeast will help control operations.

- All Division watch for gusty outflow winds if T-storms develop in the area.**

AIR OPERATIONS: Visibility be hampered by dense smoke in the east and south portions of the fire until dark.. Thunderstorm development is possible in the afternoon.

FIRE BEHAVIOR SAFETY

Know what your fire is doing at all times. Some divisions have large pockets and fingers....a watchout on any fire!

Safety Message

PNW Team 2

INCIDENT: Barry Point Fire	OPERATIONAL PERIOD: Night 08-16-12
----------------------------	------------------------------------

TOPICS:

Ten Standard Fire Orders Emergency Medical Response

NARRATIVE:

The 10 Standard Fire Orders are broken into three groups:

- A. Gathering information about the fire,
 - B. Putting safety measures in place, and
 - C. Fireline leadership.
- A. **The fire information group deals with what the firefighter will encounter - weather, fire status, fire behavior.**
- 1. Keep informed on fire weather conditions and forecasts.
 - 2. Know what your fire is doing at all times.
 - 3. Base all actions on current and expected behavior of the fire.
- Did you receive or request an adequate weather briefing, current and predicted fire behavior, wind direction, predicted humidity, fuel moisture and local factors?
 - Do you have map of the fire? Do you know what to expect for topography, type of fuels and direction of the fire spread?
- B. **The fireline safety group emphasizes personal safety.**
- 4. Identify escape routes and safety zones and make them known.
 - 5. Post lookouts when there is possible danger.
 - 6. Be alert. Keep calm. Think clearly. Act decisively.
- Make sure LCES is in place before engaging the fire.
 - Review factors that could disrupt your primary plan and develop alternate, contingency, and emergency plans.
- C. **The fireline leadership group is centered around tactical decisions.**
- 7. Maintain prompt communications with your forces, your supervisor and adjoining forces.
 - 8. Give clear instructions and insure they are understood.
 - 9. Maintain control of your forces at all time.
- When giving instructions, describe the task, purpose, and end state.

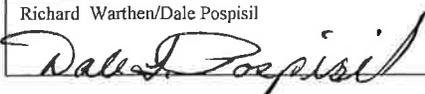

After you have considered, discussed and acted on the previous nine orders:

- 10. Fight fire aggressively, having provided for safety first.

Emergency Medical Response

- Review Block 8 of the medical plan with your crew. Knowing ahead of time what you will do, who you will call, and where you will go in the event of a serious injury will save time and potentially save a life.

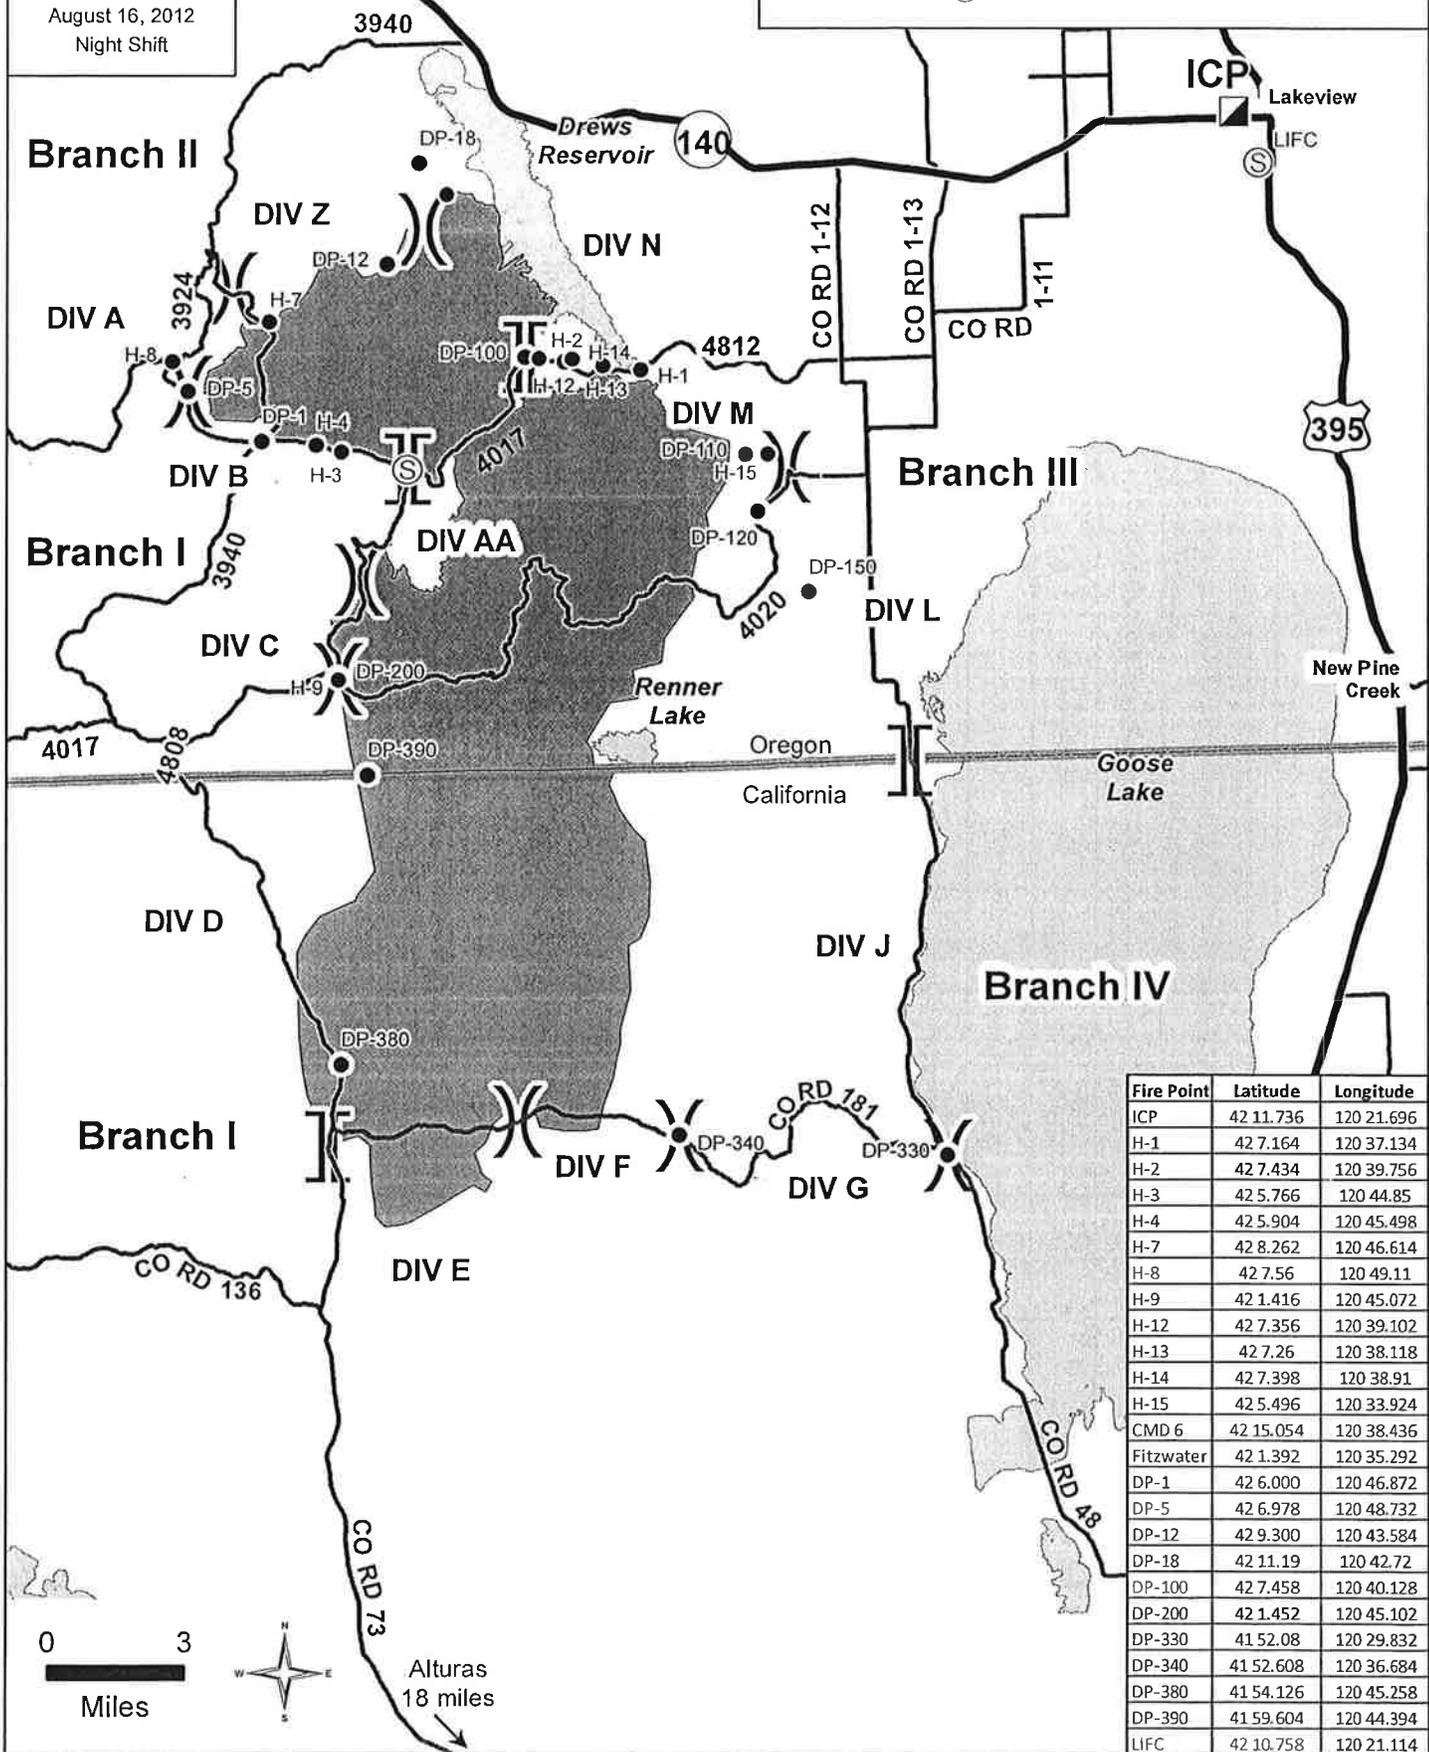

SAFETY OFFICER	Craig Dixon & Sam Phillips SOF (t)

Dinner 1700-2230

Human Resource Message

PREVENT SEXUAL HARASSMENT

SEXUAL HARASSMENT at work, including emergency incidents, occurs whenever unwelcome conduct on the basis of gender, adversely affects a person's ability to do their job, and contributes to a hostile work environment. Sexual harassment includes, but is not limited to, the following types of conduct:

- ✚ Unwelcome sexual advances
- ✚ Requests for sexual favors
- ✚ Discussing sexual activities
- ✚ Telling off-color jokes
- ✚ Unnecessary touching
- ✚ Displaying sexually suggestive pictures
- ✚ Using demeaning or inappropriate terms
- ✚ Using indecent gestures
- ✚ Using crude and offensive language
- ✚ Commenting on physical attributes

"Inappropriate behavior is harassment including sexual and racial harassment and shall not be tolerated". Fireline Handbook, Chapter 6, Common Responsibilities.

/s/ Mike Morcom

Incident IC Signature

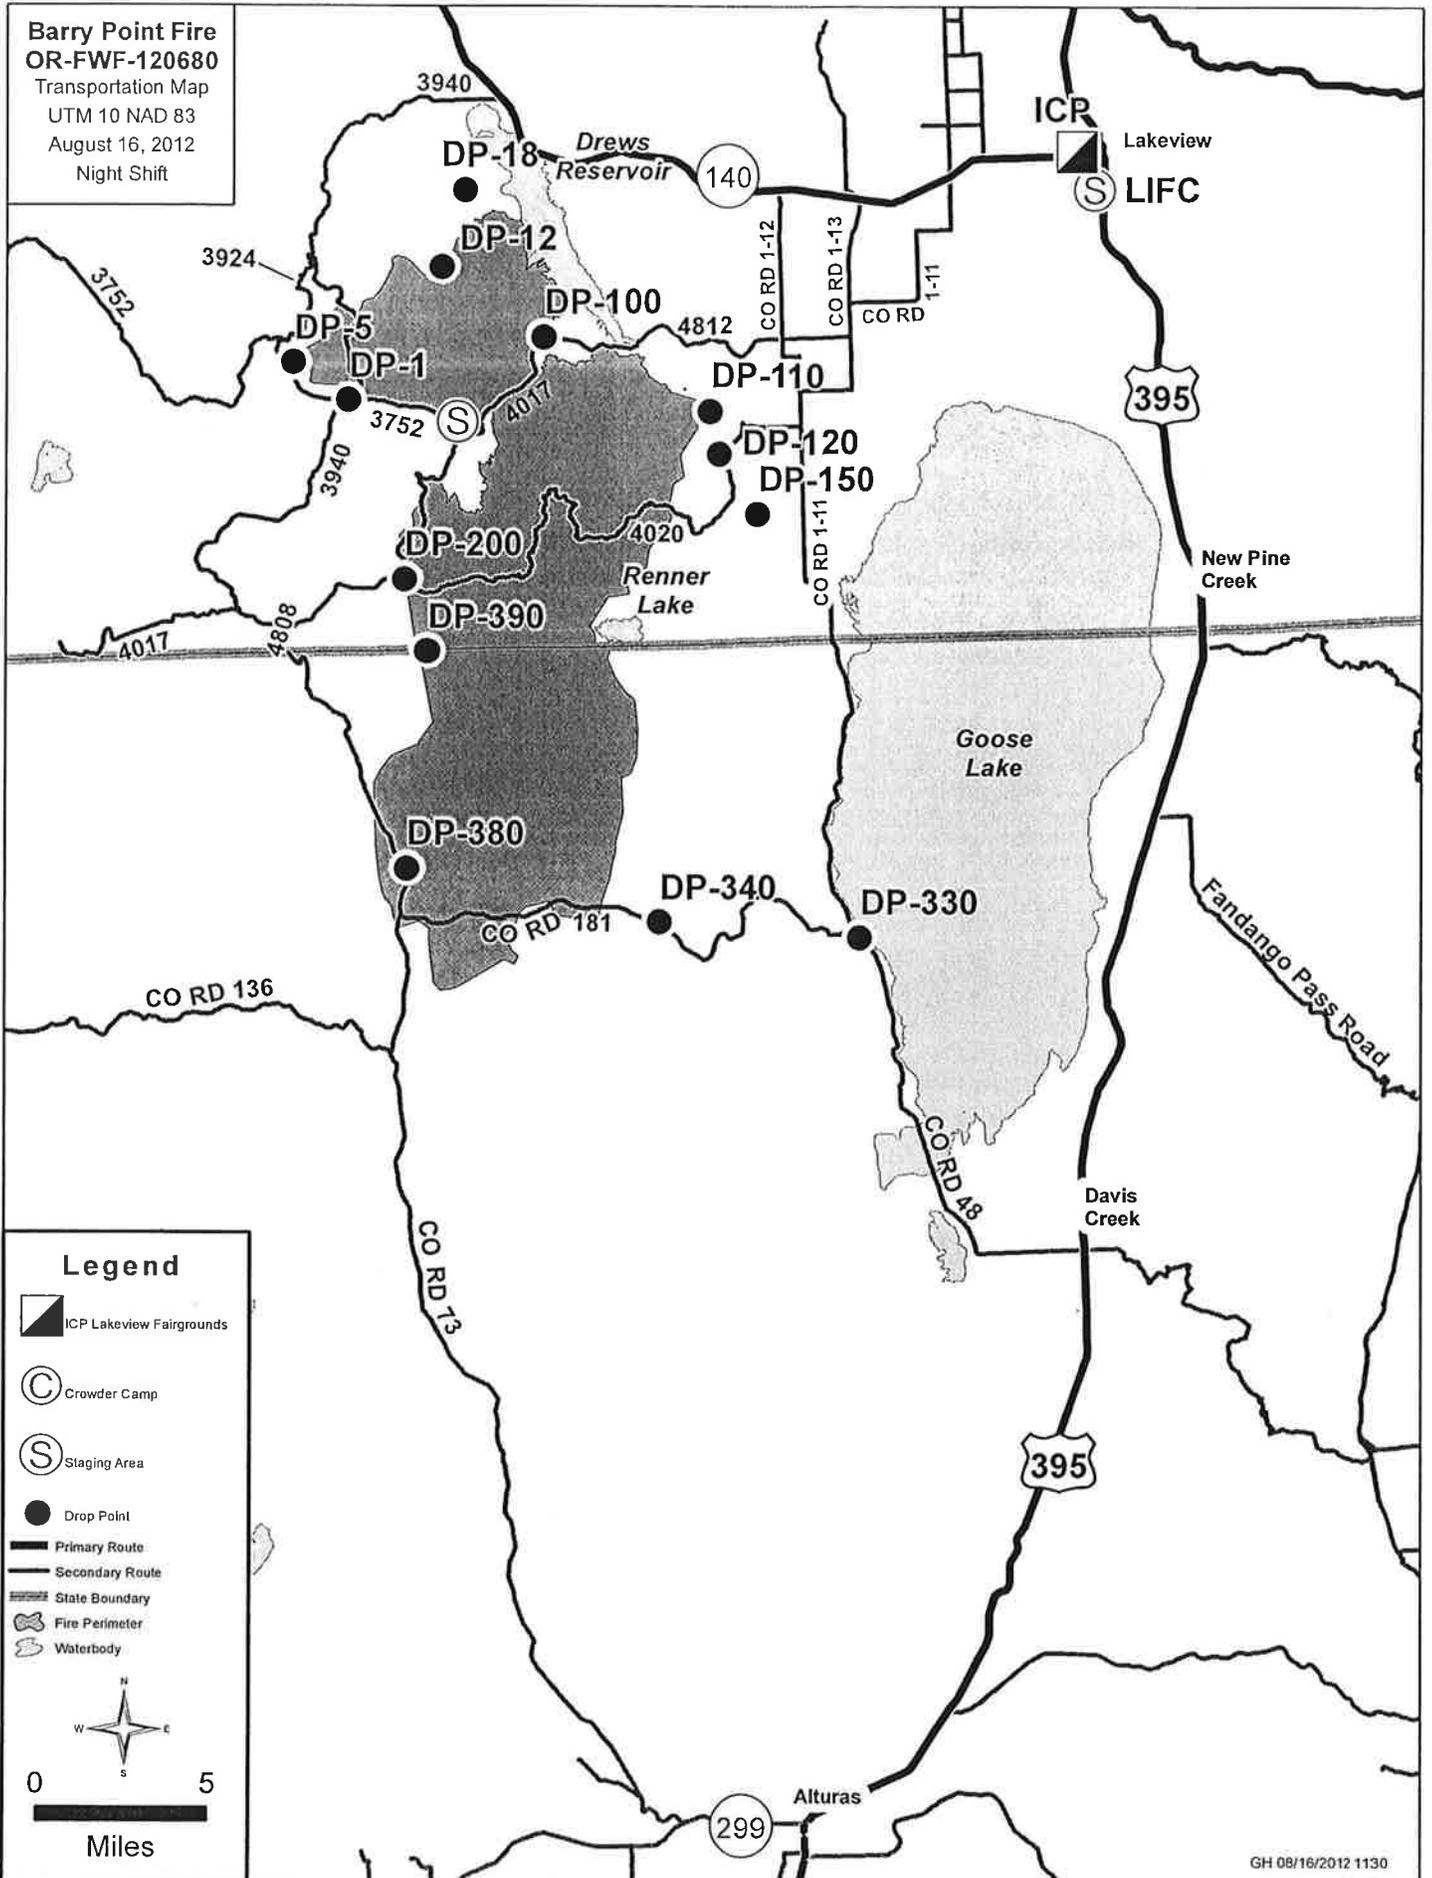

Incident Human Resource Specialists are: Bill Otani, Michael Donch & Todd Buchholz

Location: Inside corner of blue metal building
