

CORRECTED

Barry Point Fire

Incident Action Plan

MONDAY-TUESDAY

August 20-21, 2012

24 HOUR Operational Period

0600-0600

OR-FWF-120680

FS - P6G47N

BLM - G47N

INCIDENT OBJECTIVES

1. Incident Name

Barry Point

2. Date Prepared
08/19/2012

3. Time Prepared
2100

4. Operational Period – 8/20-21/2012 24 hr 0600-0600

Management Objective:

- Implement good risk management practices in order to provide for firefighter, other responder and public safety. Use good risk analysis processes, the principles of the 10 Standard Fire Orders, LCES and the 18 Watch-Out Situations as the foundation for risk decisions at all levels.
- Use aggressive outreach to insure timely and accurate dissemination of information regarding fire related activities is provided to the public, land owners, cooperators, elected officials and other stakeholders.
- Utilize efficient and effective business practices to manage the fire cost, which should be in alignment with the identified values to be protected. Cost to be tracked in accordance with the approved cost share agreement.
- Ensure that relationships are maintained or enhanced with local land owners, business owners, the general public and other key stakeholders.
- Coordinate with ODF, the District and Forests resources regarding resource considerations, and WFDSS inputs.
- Develop strategies that have high probability of success for the overall suppression efforts on the incident.

Operational Objectives:

- Continue to implement strategies for engaging the fire that will help ensure coordinated efforts for mission success.
 - Implement identified actions at the appropriate time to allow for the right operational tempo to accomplish mission and reduce risk to fire fighters.
 - Where it can be safely done, minimize acreage burned, damage to private property and improvements.
 - Utilize resource advisors for input to help minimize environmental concerns related to operational activities.
 - Assess daily the validity of the strategy and tactics and assure planned tactics will meet suppression objectives.
 - Implement guidelines provided in the Barry Point Turnback Standards Plan.
- Utilizing operational strategies and tactics that minimize, impacts to private lands and structures, resource damage, economic impacts, and minimize the disruption to local activities and businesses where practical:
- Provide timely initial attack assistance to the forest and local agencies within the TFR or as requested.

Commanders Intent: To meet the intent of these objectives to provide the highest level of customer services for all involved with or affected by the incident, all incident assigned personnel should be prepared to take the appropriate actions regarding:

- Maintaining good situational awareness within the sphere of their established work areas.
- Personal interactions with others both inside and outside the incident management organization or incident operational areas.
- Managing an incident-within-an-incident and familiarities with medical extraction points.
- Establishing and maintaining good 360-degree communications structures to ensure all critical and important messages reach the appropriate people in a timely manner.

Strategy: The Barry Point incident management strategy is based on "Values at Risk." Firefighters, the public and other incident responders being the highest value. We will engage the fire on our terms at the appropriate tempo, where probability of success is high and the risk is acceptable. A combination of tactics will be employed with consideration of values at risk noted above as well as communities, private property, and infrastructure. Tactical actions are based on the principles of point defense and a mix direct / in-direct effort as dictated by the situation.

The following are guiding principles.

- The **Right Plan** (i.e., as informed by the Risk Decision Framework)
- In the **Right Place** (i.e., where we have a reasonable probability of success)
- At the **Right Time** (i.e., when we have favorable conditions for efficient and effective suppression)
- With the **Right Assets** (i.e., those suppression assets needed to safely implement tactics in support of reasonable objectives)
- For the **Right Duration** (i.e., release resources as soon as they are no longer needed)

9. Prepared By (Planning Section Chief)

Rob Schmidt

10. Approved By (Incident Commander)

Mike L. McCon

ORGANIZATION ASSIGNMENT LIST	
1. Incident Name	
Barry Point Fire	
2. Date 8/20/2012	3. Time 1800
4. Operational Period 8/20-8/21/2012 0600 - 0600	
5. Incident Commander and Staff	
Position	Name
Incident Commander	Mike Morcom
Deputy	Chris Hoff
Safety Officer	Craig Dixon/Greg Vergari/Sam Phillips (t)
Medical Unit	Dale Pospisil / Richard Warthen
Information Officer	Virginia Gibbons/Jim Whittington
Human Resources	Bill Otani /Michael Donch
Liaison Officer	Dwight Robanske (t)

6. Agency Representative	
Agency	Name
US Forest Service	Fred Way/Rick Newman
US Forest Service	Tyrone Kelley/Kimberly Anderson

INCIDENT Weather Forecast

FORECAST NO: 23
 PREDICTION FOR: Day SHIFT
 SHIFT DATE: Aug. 20, 2012
 TIME AND DATE
 FORECAST ISSUED: Aug. 19, 2012, 2000 PDT

NAME OF FIRE: Barry Point
 UNIT: Fremont-Winema NF
 SIGNED: *Carl S. Coniglia Jr.*
 Incident Meteorologist

WEATHER DISCUSSION: An upper trough gradually approaching the coast will generate a southwest flow across the region the next couple of days before it passes to the east Tuesday evening. The result for today will be warm and dry conditions with an afternoon and early evening southwest breeze developing. There is a threat of isolated thunderstorms to the north during the afternoon and evening, but they are not expected to affect the fire area. Tonight, the southwest flow aloft will maintain a bit of a breeze across the ridges and very exposed locations while sheltered areas will become light overnight.

...Breezy this Afternoon...Strong Gusty Winds Tuesday Afternoon and Evening...

WEATHER FORECAST: Today

WEATHER: Sunny with afternoon buildups.

MAX TEMPERATURE: 83-88.
MIN HUMIDITY: 11-16%.
20 FT WINDS:

BRANCH II: Light wind becoming southwest 5 to 9 mph with gusts to 15 to 20 mph, mainly ridges.

BRANCH III: North to northeast wind 1 to 4 mph becoming south to southwest 4 to 8 mph late morning then increasing to 5 to 10 mph with gusts 15 to 20 mph, mainly ridges.

BRANCH I & IV: Northeast wind 1 to 4 mph becoming south 4 to 8 mph late morning then southwest 8 to 12 mph with gusts around 20 mph in the afternoon.

HAINES INDEX: 4 (Low).
MIXING HEIGHT: Near 1000 ft. AGL rising to 8,500 ft. AGL. Inversion lifting and dissipating around 1300.

WEATHER FORECAST FOR TONIGHT:

WEATHER: Mostly clear.

MIN TEMPERATURE: 50 to 55 ridges and 45 to 50 valleys.
MAX HUMIDITY: 50-60% ridges, 65-75% valleys.
20 FT WINDS:

BRANCH II & II: West to southwest winds 4 to 9 mph with gusts to 15 mph easing to 2 to 6 mph after 2000 with occasional gusts to 15 mph across ridges.

BRANCH I & IV: West to southwest winds 6 to 10 mph with gusts to 20 mph easing to southwest 5 to 9 mph after 2100 with occasional gusts to 15 mph.

HAINES INDEX: 4 (Low)
MIXING HEIGHT: 1,000-1,500 ft. AGL.

EXTENDED FORECAST:

TUESDAY: Partly cloudy and becoming windy. Lows 47-52. Highs 78-83. Southwest winds 3 to 7 mph increasing to 12 to 19 mph with gusts 20 to 30 mph. Strongest winds ridges and Branches 1 & IV.

WEDNESDAY: Mostly clear. Lows 40-45. Highs 75-80. West to southwest winds 5 to 10 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #23	TYPE OF FIRE: Wildland
FIRE NAME: Barry Point	OPERATIONAL PERIOD: 24 hr 8/20/12
DATE ISSUED 08/19//2012	TIME ISSUED: 1900
UNIT: FRF	SIGNED: /s/ Todd Gregory FBAN 

INPUTS

FUELS

Fuels in the fire area are primarily composed of **cured grass**, mixed **grass and brush** (less than 2 ft. tall), and **timber with understory**. Primary timber species include mixed-sized Ponderosa Pine, Western Juniper, and True Fir (at higher elevations). Brush and understory includes Mountain Mahogany, Bitterbrush, conifer dog-hair thickets, sagebrush, and Ceonothus (at higher elevations). Snags are common throughout timbered areas and may contribute to spotting. ***Live fuels will contribute to fire intensity and rate of spread.***

WEATHER SUMMARY

See fire weather forecast for detailed information.

FIRE BEHAVIOR INPUTS

Normalized weather will normalize fire behavior through today. Daytime temperatures and humidity will continue to allow for flare-ups in the interior of the fire. Spotting will occur if flare-ups are next to containment lines. Rates of spread on open fire perimeters will continue to increase. Fire behavior will respond quickly to wind influences. For tonight, expect cool temperature and good humidity recovery which will minimize fire behavior. Spotting potential will decline rapidly after dark. Again, wind will override RH and fuel moisture.

* Fine fuel moisture of 4% (exposed fuels) and 7% (shaded fuels) today.

* Fine fuel moisture nearing or surpassing 15% tonight.

* Probability of Ignition (PIG) 60-75% today, 15-30% tonight.

Bitterbrush moisture 90%, Sagebrush 50%-60%

Today

Fuel Type	Rate of Spread	Flame Length	Spotting Distance	*15 mph wind and 40% Slope
Grass (GR2)	40-50 ch/hr.	4 – 6 feet	0.2 mile	130-140 ch/hr 8-10FL
Grass with mixed shrub (GS2)	20-25 ch/hr	5 – 7 feet	.5mile	125-140 ch/hr 11-12FL
Timber with Understory (TU5)	8-10 ch/hr	7-9 feet	.5 mile	30-35 ch/hr 13-14 FL
<i>*GS2 - primary spread fuel type</i>	<i>*low wind condition</i>		<i>*from flare-ups</i>	<i>*High intensity condition</i>

Tonight

Fuel Type	Rate of Spread	Flame Length	Spotting Distance
Grass (GR2)	0-6 ch/hr.	0-2 feet	0.1 mile
Grass with mixed shrub (GS2)	0-3 ch/hr	0-1 feet	0.1 mile
Timber with Understory (TU5)	2-4 ch/hr	3-5 feet	0.1 mile
<i>*GS2 - primary spread fuel type</i>	<i>*forecasted winds</i>		<i>*from flare-ups</i>

SPECIFIC:

All Divisions

All divisions are in varied stages of improve, mop-up, patrol. Pockets of unburned fuel near containment lines are still a concern. Spotting potential will be very low after midnight but smoldering spots become active spots during the day. Any torching tree near containment lines are threats to containment. Snags will continue to be a hazard. Depth of mop-up is critical when reducing the threat of spotting.

****GUSTY WINDS will amplify spread rates and increase spotting. Watch the wind.****

AIR OPERATIONS: No issues expected

FIRE BEHAVIOR SAFETY

Excellent day to review the back cover of your IRPG – ensure the **STANDARD FIREFIGHTING ORDERS** are followed, and **WATCHOUT SITUATIONS** are understood.

Safety Message

PNW Team 2

INCIDENT: Barry Point Fire	OPERATIONAL PERIOD: Day/Night 08-20-12
----------------------------	--

TOPICS:

HRO- Model MOP UP Safety

NARRATIVE:

PACE - Some organizations use the PACE model to insure backup plans are in place. This supports the HRO principle of "Resiliency".

- **P** = Primary. This is your primary plan for accomplishing your mission.
- **A** = Alternate. This is your "Plan B". You would fall back to your Alternate if something happens to make your Primary plan infeasible. The Alternate plan still achieves your mission, just in a different way.
- **C** = Contingency. If your Primary and Alternate plans fail, you would fall back to your Contingency plan. Your mission may not be achieved by your Contingency plan but it is a coordinated set of actions to insure safe engagement in some part of the mission.
- **E** = Emergency. If conditions are such that your Primary, Alternate and Contingency plans cannot be accomplished, fall back to your Emergency plan. Your Emergency plan is designed to move people and resources to safety and account for everyone.
- It is important to develop these plans before engaging in your Primary plan so that all resources know where to go and what to do if conditions change.

Mop Up

Many of the ongoing fires are in Mop Up stage and this is a time when many accidents and injuries occur because we lose focus and situational awareness. It takes a lot of self-discipline to mop up day after day. Remember to wear all your appropriate PPE, maintain communication with your crewmates, take frequent breaks and keep eyes on your crewmates.

Minimum PPE Standards include:

- Leather gloves for hand protection
- Safety goggles or glasses for eye protection
- Ear plugs or muffs for hearing protection
- Chaps when running chainsaws

8. Medical Emergency Procedures					
In the event of a medical emergency provide the following information to the Communications Unit:					
<ol style="list-style-type: none"> 1. Declare the nature of the emergency Medical injury/illness? If injury/illness is it Life Threatening? 2. If Life threatening, then request that the designated frequency be cleared for emergency traffic. 3. Identify the on-scene point of contact (POC) by Resource and last name (i.e. PIC is TFLD Smith). 4. Identify nature of the incident, number injured, patient assessment (s) and location (geographic and GPS coordinates). 5. Identify on-scene personnel by position and name (i.e.EMT Freshwater). 6. Identify preferred method of patient transport. 7. Request any additional resource and/or equipment needed. 8. Document all information received and transmitted on the radio or phone. 					
Identify any changes in the on-scene point of Contact or medical personnel as they occur.

Human Resource Message

STRESS REMINDERS

- **Take action, don't ignore your stress**
- **Stay in touch with team members and communicate**
- **Talk and share feelings**
- **Replenish, rest, get some down time**

Stress is normal and everyone has it

**PRACTICE RANDOM ACTS OF KINDNESS!
IT WILL MAKE ANOTHER PERSON'S DAY!
IT WILL MAKE YOUR DAY!**

Bill Otani (503-705-5980), HRSP

Michael Donch, HRSP
