

<b>INCIDENT OBJECTIVES</b>	1. Incident Name	2. Date Prepared	3. Time Prepared
	Barry Point	08/24/2012	2100

**4. Operational Period – 8/25/2012**

**Management Objective:**

- Implement good risk management practices in order to provide for firefighter, other responder and public safety. Use good risk analysis processes, the principles of the 10 Standard Fire Orders, LCEs and the 18 Watch-Out Situations as the foundation for risk decisions at all levels.
- Use aggressive outreach to insure timely and accurate dissemination of information regarding fire related activities is provided to the public, land owners, cooperators, elected officials and other stakeholders.
- Utilize efficient and effective business practices to manage the fire cost, which should be in alignment with the identified values to be protected. Cost to be tracked in accordance with the approved cost share agreement.
- Ensure that relationships are maintained or enhanced with local land owners, business owners, the general public and other key stakeholders.
- Coordinate with ODF, the District and Forests resources regarding resource considerations, and WFSS inputs.
- Develop strategies that have high probability of success for the overall suppression efforts on the incident.

**Operational Objectives:**

- Continue to implement strategies for engaging the fire that will help ensure coordinated efforts for mission success.
  - Implement identified actions at the appropriate time to allow for the right operational tempo to accomplish mission and reduce risk to fire fighters.
  - Where it can be safely done, minimize acreage burned, damage to private property and improvements.
  - Utilize resource advisors for input to help minimize environmental concerns related to operational activities.
  - Assess daily the validity of the strategy and tactics and assure planned tactics will meet suppression objectives.
  - Implement guidelines provided in the Barry Point Turnback Standards Plan.
- Utilizing operational strategies and tactics that minimize, impacts to private lands and structures, resource damage, economic impacts, and minimize the disruption to local activities and businesses where practical:
- Provide timely initial attack assistance to the forest and local agencies within the TFR or as requested.

**Commanders Intent:** To meet the intent of these objectives to provide the highest level of customer services for all involved with or affected by the incident, all incident assigned personnel should be prepared to take the appropriate actions regarding:

- Maintaining good situational awareness within the sphere of their established work areas.
- Personal interactions with others both inside and outside the incident management organization or incident operational areas.
- Managing an incident-within-an-incident and familiarities with medical extraction points.
- Establishing and maintaining good 360-degree communications structures to ensure all critical and important messages reach the appropriate people in a timely manner.

**Strategy:** The Barry Point incident management strategy is based on "Values at Risk." Firefighters, the public and other incident responders being the highest value. We will engage the fire on our terms at the appropriate tempo, where probability of success is high and the risk is acceptable. A combination of tactics will be employed with consideration of values at risk noted above as well as communities, private property, and infrastructure. Tactical actions are based on the principles of point defense and a mix direct / in-direct effort as dictated by the situation.

**The following are guiding principles.**

- The **Right Plan** (i.e., as informed by the Risk Decision Framework)
- In the **Right Place** (i.e., where we have a reasonable probability of success)
- At the **Right Time** (i.e., when we have favorable conditions for efficient and effective suppression)
- With the **Right Assets** (i.e., those suppression assets needed to safely implement tactics in support of reasonable objectives)
- For the **Right Duration** (i.e., release resources as soon as they are no longer needed)

8. Medical Emergency Procedures					
In the event of a medical emergency provide the following information to the Communications Unit:					
1. Declare the nature of the emergency Medical injury/illness? If injury/illness is it Life Threatening?					
2. If Life threatening, then request that the designated frequency be cleared for emergency traffic.					
3. Identify the on-scene point of contact (POC) by Resource and last name (i.e. PIC is TFLD Smith).					
4. Identify nature of the incident, number injured, patient assessment (s) and location (geographic and GPS coordinates).					
5. Identify on-scene personnel by position and name (i.e. EMT Freshwater).					
6. Identify preferred method of patient transport.					
7. Request any additional resource and/or equipment needed.					
8. Document all information received and transmitted on the radio or phone.					
9. Identify any changes in the on-scene point of Contact or medical personnel as they occur.

# Safety Message

## Hunter Type III

**INCIDENT: Barry Point Fire**      **OPERATIONAL PERIOD: Day 08/25/12**

**TOPICS:**  
**Emergency Medical Response/ Transportation/ Hazard Trees**

**NARRATIVE:**

**Emergency Medical Response**

- Review Block 8 of the medical plan with your crew. Knowing ahead of time what you will do, who you will call, and where you will go in the event of a serious injury will save time and potentially save a life. This is also found on page 49 of your IRPG.

**Transportation**

- High speed highways, smoke and poor visibility, narrow dirt roads and animals in the road, are all present when we travel to and from our work assignments. Any of these hazards can result in serious injuries or worse.
  - Avoid distractions that could divert your attention from the road.
  - Drive with lights on to increase your visibility to other drivers.
  - Always wear seatbelts.
  - Keep your windshield clean.
  - Slow down.

**Hazard Trees**

- Scout areas ahead of engaging, especially for mop-up operations. Flag and avoid hazardous trees or fall them if it can be done safely. Refer to page 20 of your IRPG for more hazard tree safety protocols.

**SAFETY OFFICER**      *Alan Johnston*

FIRE BEHAVIOR FORECAST				
FORECAST NUMBER: #28		TYPE OF FIRE: Wildland		
FIRE NAME: Barry Point		OPERATIONAL PERIOD: 24 hr 8/25/12		
DATE ISSUED 08/24/2012		TIME ISSUED: 1900		
UNIT: FWF		SIGNED: /s/ Todd Gregory FBAN <i>Todd Gregory</i>		
INPUTS				
FUELS				
Fuels in the fire area are primarily composed of cured grass, mixed grass and brush (less than 2 ft. tall), and timber with understory. Primary timber species include mixed-sized Ponderosa Pine, Western Juniper, and True Fir (at higher elevations). Brush and understory includes Mountain Mahogany, Bitterbrush, conifer dog-hair thickets, sagebrush, and Ceonothus (at higher elevations). Snags are common throughout timbered areas and may contribute to spotting. <i>Live fuels will contribute to fire intensity and rate of spread.</i>				
WEATHER SUMMARY				
See fire weather forecast for detailed information.				
FIRE BEHAVIOR INPUTS				
<b>*Breezy and Gusty Today!*</b>				
Late afternoon warming and drying still poses a risk for flare-ups and spotting. Burning periods will continue to shorten so large fire growth potential is limited. Expect similar flare-up potential and burning off of interior islands. Fuels are still very dry and fire behavior will change rapidly with wind. Night time conditions will continue to diminish any fire behavior and fine fuels will continue to reach moisture of extinction.				
* Fine fuel moisture of 4% (exposed fuels) and 7% (shaded fuels) today.				
* Fine fuel moisture nearing or surpassing 15% tonight.				
* Probability of Ignition (PIG) 75% today, 10-20% tonight.				
Bitterbrush moisture 90%, Sagebrush 50%-60%				
<b>*Today*</b>				
Fuel Type	Rate of Spread	Flame Length	Spotting Distance	*15 mph wind and 40% Slope
Grass (GR2)	25-40 ch/hr.	4-5 feet	0.2 mile	130-140 ch/hr 8-10FL
Grass with mixed shrub (GS2)	15-25 ch/hr	4-5 feet	0.2 mile	125-140 ch/hr 11-12FL
Timber with Understory (TUS)	6-8 ch/hr	6-7 feet	0.2 mile	30-35 ch/hr 13-14 FL
*GS2 - primary spread fuel type	*low wind condition		*from flare-ups	*High intensity condition Spotting Dist. 0.7mi w/30 mph ws
SPECIFIC:				
<b>* All Divisions*</b>				
Patrol and mop-up. Still potential for flare-ups in certain areas where the fire did not burn cleanly.				
AIR OPERATIONS: No issues expected				
FIRE BEHAVIOR SAFETY				
Hazards associated with fire behavior are diminishing as the threat of active fire decreases. Snags are still a very real threat. Be careful around stump holes and deep ash pockets.
