# Barry Point Fire

Incident Action Plan

**SATURDAY**

**August 25, 2012**

**DAY Operational Period**

**0600-1800**

## IMT III Hunter

OR-FWF-120680

FS - P6G47N

BLM – G47N

| INCIDENT OBJECTIVES | 1. Incident Name<br>Barry Point | 2. Date Prepared<br>08/24/2012 | 3. Time Prepared<br>2100 |
|---|---|---|---|

**4. Operational Period** – 8/25/2012

**Management Objective:**

- Implement good risk management practices in order to provide for firefighter, other responder and public safety. Use good risk analysis processes, the principles of the10 Standard Fire Orders, LCES and the 18 Watch-Out Situations as the foundation for risk decisions at all levels.
- Use aggressive outreach to insure timely and accurate dissemination of information regarding fire related activities is provided to the public, land owners, cooperators, elected officials and other stakeholders.
- Utilize efficient and effective business practices to manage the fire cost, which should be in alignment with the identified values to be protected. Cost to be tracked in accordance with the approved cost share agreement.
- Ensure that relationships are maintained or enhanced with local land owners, business owners, the general public and other key stakeholders.
- Coordinate with ODF, the District and Forests resources regarding resource considerations, and WFDSS inputs.
- Develop strategies that have high probability of success for the overall suppression efforts on the incident.

**Operational Objectives:**

- Continue to implement strategies for engaging the fire that will help ensure coordinated efforts for mission success.
    - Implement identified actions at the appropriate time to allow for the right operational tempo to accomplish mission and reduce risk to fire fighters.
    - Where it can be safely done, minimize acreage burned, damage to private property and improvements.
    - Utilize resource advisors for input to help minimize environmental concerns related to operational activities.
    - Assess daily the validity of the strategy and tactics and assure planned tactics will meet suppression objectives.
    - Implement guidelines provided in the Barry Point Turnback Standards Plan.
- Utilizing operational strategies and tactics that minimize, impacts to private lands and structures, resource damage, economic impacts, and minimize the disruption to local activities and businesses where practical:
- Provide timely initial attack assistance to the forest and local agencies within the TFR or as requested.

**Commanders Intent:** To meet the intent of these objectives to provide the highest level of customer services for all involved with or affected by the incident, all incident assigned personnel should be prepared to take the appropriate actions regarding:

- Maintaining good situational awareness within the sphere of their established work areas.
- Personal interactions with others both inside and outside the incident management organization or incident operational areas.
- Managing an incident-within-an-incident and familiarities with medical extraction points.
- Establishing and maintaining good 360-degree communications structures to ensure all critical and important messages reach the appropriate people in a timely manner.

**Strategy:** The Barry Point incident management strategy is based on "Values at Risk." Firefighters, the public and other incident responders being the highest value. We will engage the fire on our terms at the appropriate tempo, where probability of success is high and the risk is acceptable. A combination of tactics will be employed with consideration of values at risk noted above as well as communities, private property, and infrastructure. Tactical actions are based on the principles of point defense and a mix direct / in-direct effort as dictated by the situation.

**The following are guiding principles.**

- The **Right Plan** (i.e., as informed by the Risk Decision Framework)
- In the **Right Place** (i.e., where we have a reasonable probability of success)
- At the **Right Time** (i.e., when we have favorable conditions for efficient and effective suppression)
- With the **Right Assets** (i.e., those suppression assets needed to safely implement tactics in support of reasonable objectives)
- For the **Right Duration** (i.e., release resources as soon as they are no longer needed)

## *INCIDENT Weather Forecast*

**FORECAST NO:** 28
**PREDICTION FOR:** Day/Night **SHIFT**
**SHIFT DATE:** Aug. 25-26, 2012
**TIME AND DATE**
**FORECAST ISSUED:** Aug. 24, 2012, 2000 PDT

**NAME OF FIRE:** Barry Point
**UNIT:** Fremont-Winema NF
**SIGNED:** *Carl S Cerniglia Jr*
**Incident Meteorologist**

---

***WEATHER DISCUSSION:*** An upper level ridge will move off to the east during the day as an upper level low pressure system starts to drop out of the Gulf of Alaska. This will result in the morning light northeast wind becoming southwest and gusty during the afternoon hours with temperatures and afternoon relative humidity values near normal levels. The winds will ease during the evening hours with cool overnight low temperatures and slightly higher overnight humidity recoveries.

---

***Fire Weather Watch this Afternoon and Evening for Wind and Low RH...***
***...Fire Weather Watch Sunday Afternoon through Monday Evening for Wind and Low RH...***

***WEATHER FORECAST: Today***

| | |
|---|---|
| **WEATHER:** | Sunny. |
| **MAX TEMPERATURE:** | 78-84. |
| **MIN HUMIDITY:** | 10-15%. |
| **20 FT WINDS:** | |
| **DIVS. AA, B, A, Z,& N:** | Light wind becoming southwest 2 to 5 mph after 1000 then increasing to 4 to 8 mph with occasional gusts 15 to 20 mph, mainly ridge tops. |
| **DIVS. M & L:** | Northeast wind 2 to 5 mph becoming south to southwest after 0900 then increasing to 5 to 10 mph with gusts around 20 mph in the afternoon. |
| **SOUTH OPS:** | East wind 3 to 5 mph becoming southwest after 0900 then increasing to 8 to 12 mph with gusts around 20 mph in the afternoon. |
| **HAINES INDEX:** | 4 (Low). |
| **MIXING HEIGHT:** | Near 1,000 ft. AGL rising to 7,000 ft. AGL. Inversion lifting and dissipating 1200 to 1300. |

---

***WEATHER FORECAST FOR TONIGHT:***

| | |
|---|---|
| **WEATHER:** | Clear. |
| **MIN TEMPERATURE:** | 48 to 53 ridges and 39 to 44 valleys. |
| **MAX HUMIDITY:** | 30-40% ridges, 55-65% valleys. |
| **20 FT WINDS:** | West to southwest wind 6 to 12 mph with gusts near 20 mph easing to 4 to 9 mph after 2100. |
| **HAINES INDEX:** | 3 (Very low). |
| **MIXING HEIGHT:** | 1,000 to 1,500 ft. AGL. |

---

***EXTENDED DISCUSSION:*** The upper level low pressure system moving out of the Gulf of Alaska should settle off the Washington and Oregon coast Saturday night. While models have been inconsistent with the details of this low, at this time it is expected to linger off the coast through Tuesday before lifting northeast across the Pacific Northwest. This low will bring breezy to windy conditions to the area Sunday through Tuesday during the afternoon and early evening hours. Precipitation is not expected with this system however temperatures will be cooler. Due to the longer range model inconsistencies, please keep up to date with the latest forecasts to get the latest details each day.

***EXTENDED FORECAST:***
**SUNDAY:** Mostly clear. Lows 39-44. Highs 73-79. Southwest winds 10 to 20 mph with gusts 25 to 35 mph.
**MONDAY and TUESDAY:** Mostly clear. Lows 38-43. Highs 73-79. Southwest winds 10 to 20 mph with higher gusts.

## FIRE BEHAVIOR FORECAST

| | |
|---|---|
| **FORECAST NUMBER: #28** | **TYPE OF FIRE: Wildland** |
| **FIRE NAME: Barry Point** | **OPERATIONAL PERIOD: 24 hr 8/25/12** |
| **DATE ISSUED 08/24//2012** | **TIME ISSUED: 1900** |
| **UNIT: FWF** | **SIGNED: /s/ Todd Gregory FBAN** |

### INPUTS

### FUELS

Fuels in the fire area are primarily composed of **cured grass**, mixed **grass and brush** (less than 2 ft. tall), and timber **with understory**. Primary timber species include mixed-sized Ponderosa Pine, Western Juniper, and True Fir (at higher elevations). Brush and understory includes Mountain Mahogany, Bitterbrush, conifer dog-hair thickets, sagebrush, and Ceonothus (at higher elevations). Snags are common throughout timbered areas and may contribute to spotting. ***Live fuels will contribute to fire intensity and rate of spread.***

### WEATHER SUMMARY

*See fire weather forecast for detailed information.*

### FIRE BEHAVIOR INPUTS

***Breezy and Gusty Today!***

***Late afternoon warming and drying still poses a risk for flare-ups and spotting. Burning periods will continue to shorten so large fire growth potential is limited. Expect similar flare-up potential and burning off of interior islands. Fuels are still very dry and fire behavior will change rapidly with wind. Night time conditions will continue to diminish any fire behavior and fine fuels will continue to reach moisture of extinction.***

*** Fine fuel moisture of 4% (exposed fuels) and 7% (shaded fuels) today.**

*** Fine fuel moisture nearing or surpassing 15% tonight.**

*** Probability of Ignition (PIG) 75% today, 10-20% tonight.**

**Bitterbrush moisture 90%, Sagebrush 50%-60%**

***Today***

| Fuel Type | Rate of Spread | Flame Length | Spotting Distance | *15 mph wind and 40% Slope |
|---|---|---|---|---|
| Grass (GR2) | 25-40 ch/hr. | 4-5 feet | 0.2 mile | 130-140 ch/hr 8-10FL |
| Grass with mixed shrub (GS2) | 15-25 ch/hr | 4-5 feet | 0.2 mile | 125-140 ch/hr 11-12FL |
| Timber with Understory (TU5) | 6-8 ch/hr | 6-7 feet | 0.2 mile | 30-35 ch/hr 13-14 FL |
| **GS2 - primary spread fuel type* | *low wind condition | | *from flare-ups | *High intensity condition Spotting Dist. 0.7mi w/30 mph ws |

**SPECIFIC:**

***All Divisions***

Patrol and mop-up. Still potential for flare-ups in certain areas where the fire did not burn cleanly.

**AIR OPERATIONS: No issues expected**

### FIRE BEHAVIOR SAFETY

Hazards associated with fire behavior are diminishing as the threat of active fire decreases. Snags are still a very real threat. Be careful around stump holes and deep ash pockets.

# Safety Message

## *Hunter Type III*

| INCIDENT: Barry Point Fire | OPERATIONAL PERIOD: Day 08/25/12 |
|---|---|

**TOPICS:**

**Emergency Medical Response/ Transportation/ Hazard Trees**

**NARRATIVE:**

**Emergency Medical Response**

- Review Block 8 of the medical plan with your crew. Knowing ahead of time what you will do, who you will call, and where you will go in the event of a serious injury will save time and potentially save a life. This is also found on page 49 of your IRPG.

**Transportation**

- High speed highways, smoke and poor visibility, narrow dirt roads and animals in the road, are all present when we travel to and from our work assignments. Any of these hazards can result in serious injuries or worse.
  - Avoid distractions that could divert your attention from the road.
  - Drive with lights on to increase your visibility to other drivers.
  - Always wear seatbelts.
  - Keep your windshield clean.
  - Slow down.

**Hazard Trees**

- Scout areas ahead of engaging, especially for mop-up operations. Flag and avoid hazardous trees or fall them if it can be done safely. Refer to page 20 of your IRPG for more hazard tree safety protocols.

## 8. Medical Emergency Procedures

In the event of a medical emergency provide the following information to the Communications Unit:

1. Declare the nature of the emergency
   Medical injury/illness? If injury/illness is it Life Threatening?
2. If Life threatening, then request that the designated frequency be cleared for emergency traffic.
3. Identify the on-scene point of contact (POC) by Resource and last name (i.e. PIC is TFLD Smith).
4. Identify nature of the incident, number injured, patient assessment (s) and location (geographic and GPS coordinates).
5. Identify on-scene personnel by position and name (i.e. .EMT Freshwater).
6. Identify preferred method of patient transport.
7. Request any additional resource and/or equipment needed.
8. Document all information received and transmitted on the radio or phone.
9. Identify any changes in the on-scene point of Contact or medical personnel as they occur.
