4. Operational Period – 8/23-24/2012 24 hr 0600-0600

Management Objective:

- Implement good risk management practices in order to provide for firefighter, other responder and public safety. Use good risk analysis processes, the principles of the 10 Standard Fire Orders, LCES and the 18 Watch-Out Situations as the foundation for risk decisions at all levels.
- Use aggressive outreach to insure timely and accurate dissemination of information regarding fire related activities is provided to the public, land owners, cooperators, elected officials and other stakeholders.
- Utilize efficient and effective business practices to manage the fire cost, which should be in alignment with the identified values to be protected. Cost to be tracked in accordance with the approved cost share agreement.
- Ensure that relationships are maintained or enhanced with local land owners, business owners, the general public and other key stakeholders.
- Coordinate with ODF, the District and Forests resources regarding resource considerations, and WFDSS inputs.
- Develop strategies that have high probability of success for the overall suppression efforts on the incident.

Operational Objectives:

- Continue to implement strategies for engaging the fire that will help ensure coordinated efforts for mission success.
 - Implement identified actions at the appropriate time to allow for the right operational tempo to accomplish mission and reduce risk to fire fighters.
 - Where it can be safely done, minimize acreage burned, damage to private property and improvements.
 - Utilize resource advisors for input to help minimize environmental concerns related to operational activities.
 - Assess daily the validity of the strategy and tactics and assure planned tactics will meet suppression objectives.
 - Implement guidelines provided in the Barry Point Turnback Standards Plan.
- Utilizing operational strategies and tactics that minimize, impacts to private lands and structures, resource damage, economic impacts, and minimize the disruption to local activities and businesses where practical:
- Provide timely initial attack assistance to the forest and local agencies within the TFR or as requested.

Commanders Intent: To meet the intent of these objectives to provide the highest level of customer services for all involved with or affected by the incident, all incident assigned personnel should be prepared to take the appropriate actions regarding:

- Maintaining good situational awareness within the sphere of their established work areas.
- Personal interactions with others both inside and outside the incident management organization or incident operational areas.
- Managing an incident-within-an-incident and familiarities with medical extraction points.
- Establishing and maintaining good 360-degree communications structures to ensure all critical and important messages reach the appropriate people in a timely manner.

Strategy: The Barry Point incident management strategy is based on "Values at Risk." Firefighters, the public and other incident responders being the highest value. We will engage the fire on our terms at the appropriate tempo, where probability of success is high and the risk is acceptable. A combination of tactics will be employed with consideration of values at risk noted above as well as communities, private property, and infrastructure. Tactical actions are based on the principles of point defense and a mix direct / in-direct effort as dictated by the situation.

The following are guiding principles.

- The **Right Plan** (i.e., as informed by the Risk Decision Framework)
- In the **Right Place** (i.e., where we have a reasonable probability of success)
- At the **Right Time** (i.e., when we have favorable conditions for efficient and effective suppression)
- With the **Right Assets** (i.e., those suppression assets needed to safely implement tactics in support of reasonable objectives)
- For the **Right Duration** (i.e., release resources as soon as they are no longer needed)

INCIDENT Weather Forecast

FORECAST NO: 26
PREDICTION FOR: Day/Night SHIFT
SHIFT DATE: Aug. 23-24, 2012
TIME AND DATE
FORECAST ISSUED: Aug. 22, 2012, 2000 PDT

NAME OF FIRE: Barry Point
UNIT: Fremont-Winema NF
SIGNED: *Carl S. Corniglia Jr*
Incident Meteorologist

WEATHER DISCUSSION: An upper level trough will pass across the area late today and move east of the region tonight. As the trough passes, gusty southwest to west winds are expected to develop during the heat of the day, early-afternoon into early evening, generating gusts of 20 to 30 mph across portions of the fire area, mainly Branches 1 & 4 and across higher ridges. The air mass with this system is dry, so once the inversion breaks and the winds develop the RH values will drop into the teens. Tonight, cool high pressure at the surface will build over central Oregon, maintaining a northerly wind across the eastern branches.

...Gusty Afternoon and Evening Winds Expected Today...

INPUTS

FUELS

Fuels in the fire area are primarily composed of **cured grass**, mixed **grass and brush** (less than 2 ft. tall), and timber **with understory**. Primary timber species include mixed-sized Ponderosa Pine, Western Juniper, and True Fir (at higher elevations). Brush and understory includes Mountain Mahogany, Bitterbrush, conifer dog-hair thickets, sagebrush, and Ceonothus (at higher elevations). Snags are common throughout timbered areas and may contribute to spotting. ***Live fuels will contribute to fire intensity and rate of spread.***

WEATHER SUMMARY

See fire weather forecast for detailed information.

FIRE BEHAVIOR INPUTS

Windier conditions will test containment lines today. Daytime temperatures and humidity will continue to allow for flare-ups in the interior of the fire. Spotting will occur if flare-ups are next to containment lines. Rates of spread on open fire perimeters will continue to increase. Fire behavior will respond quickly to wind influences. For tonight, expect cool temperature and good humidity recovery which will minimize fire behavior. Spotting potential will decline rapidly after dark. Again, wind will override RH and fuel moisture.

- * Fine fuel moisture of 4% (exposed fuels) and 7% (shaded fuels) today.
- * Fine fuel moisture nearing or surpassing 15% tonight.
- * Probability of Ignition (PIG) 80% today, 15-30% tonight.
- Bitterbrush moisture 90%, Sagebrush 50%-60%

Today

Fuel Type	Rate of Spread	Flame Length	Spotting Distance	*15 mph wind and 40% Slope
Grass (GR2)	50-60 ch/hr.	4 – 6 feet	0.4 mile	130-140 ch/hr 8-10FL
Grass with mixed shrub (GS2)	20-30 ch/hr	5 – 7 feet	0.4 mile	125-140 ch/hr 11-12FL
Timber with Understory (TU5)	8-11 ch/hr	7-9 feet	0.4 mile	30-35 ch/hr 13-14 FL
*GS2 - primary spread fuel type	*low wind condition		*from flare-ups	*High intensity condition Spotting Dist. 0.7mi w/30 mph ws

Tonight

Fuel Type	Rate of Spread	Flame Length	Spotting Distance
Grass (GR2)	0-6 ch/hr.	0-2 feet	0.1 mile
Grass with mixed shrub (GS2)	0-3 ch/hr	0-1 feet	0.1mile
Timber with Understory (TU5)	2-4 ch/hr	3-5 feet	0.1mile
*GS2 - primary spread fuel type	*forecasted winds		*from flare-ups

SPECIFIC:

All Divisions

Same situation we faced Tuesday. Fuels are dry and available so keep updated on conditions and expect interior islands to continue to burn. Spotting outside of lines is still a major concern. Investigate all flare-ups near containment lines.

****GUSTY WINDS will amplify spread rates and increase spotting. Watch the wind.****

AIR OPERATIONS: No issues expected

FIRE BEHAVIOR SAFETY

Wind Gusts can develop quickly. Communicate when winds change direction or increase speed so those downwind know it is coming.

Safety Message

PNW Team 2

INCIDENT: Barry Point Fire

OPERATIONAL PERIOD: Day/Night 08-23-12

TOPICS:

Driving Safety
Safety Needs
Cougars

NARRATIVE:

Driving Safety:

- Maintain driving speed at or below posted limits
- Do NOT drive when fatigued
- Leave plenty of space between vehicles
- Avoid distracted driving, no cell phones, audio or navigation devices
- Be respectful of the local community and other drivers – SLOW DOWN

Basic Safety Needs Met:

On every wildfire one of the most basic of human needs that must be met is that of SAFETY. Today we ask that every Division and Group once again assure that the safety needs of the firefighter are met.

- Take rest breaks and hydrate to avoid fatigue
- Maintain communications among crew members
- Wear your Personal Protective Equipment

Cougars:

Cougars have been sighted on the Barry Point Fire. Firefighters working in Division F near H-22 observed a cougar watching them mop up last night. In addition, local residents have observed cougars in Division L. Cougars have a wide range of travel.

ENCOUNTERING A COUGAR – WHAT TO DO

- Do not leave food around your work area.
- Stay calm & stand your ground
- Maintain eye contact
- Do not turn your back to the cougar
- Back away slowly
- Do NOT run. Running triggers a response in cougars which could lead to an attack
- Raise your arms and speak firmly
- If the Cougar seems aggressive, raise your arms to make yourself look larger and clap your hands
- IF in the very unusual event a cougar attacks you, fight back with rocks sticks, tools, etc.

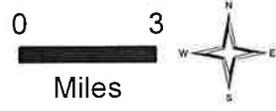

EVERYONE GOES HOME!

SAFETY OFFICER

Human Resource Message

Typically, at this point of the incident folks have become more familiar with who they are working with and are more apt to let their guard down.

The situation is less intense, so there is less adrenaline. The subconscious becomes more aware of the comforts missing. When this occurs, we sometimes become less tolerant with each other or have more of a tendency to complain. Raising our awareness levels that this is something that may occur will help us be more patient with and more willing to lend a helping hand....

Thanks for the excellent work in taking care of each other mentally and physically!!!
