

Barry Point Fire

Incident Action Plan

FRIDAY-SATURDAY

August 24-25, 2012

24 HOUR Operational Period

0600-0600

OR-FWF-120680

FS - P6G47N

BLM – G47N

INCIDENT OBJECTIVES

1. Incident Name

Barry Point

2. Date Prepared
08/23/2012

3. Time Prepared
2100

4. Operational Period – 8/24-25/2012 24 hr 0600-0600

Management Objective:

- Implement good risk management practices in order to provide for firefighter, other responder and public safety. Use good risk analysis processes, the principles of the 10 Standard Fire Orders, LCEs and the 18 Watch-Out Situations as the foundation for risk decisions at all levels.
- Use aggressive outreach to insure timely and accurate dissemination of information regarding fire related activities is provided to the public, land owners, cooperators, elected officials and other stakeholders.
- Utilize efficient and effective business practices to manage the fire cost, which should be in alignment with the identified values to be protected. Cost to be tracked in accordance with the approved cost share agreement.
- Ensure that relationships are maintained or enhanced with local land owners, business owners, the general public and other key stakeholders.
- Coordinate with ODF, the District and Forests resources regarding resource considerations, and WFDSS inputs.
- Develop strategies that have high probability of success for the overall suppression efforts on the incident.

Operational Objectives:

- Continue to implement strategies for engaging the fire that will help ensure coordinated efforts for mission success.
 - Implement identified actions at the appropriate time to allow for the right operational tempo to accomplish mission and reduce risk to fire fighters.
 - Where it can be safely done, minimize acreage burned, damage to private property and improvements.
 - Utilize resource advisors for input to help minimize environmental concerns related to operational activities.
 - Assess daily the validity of the strategy and tactics and assure planned tactics will meet suppression objectives.
 - Implement guidelines provided in the Barry Point Turnback Standards Plan.
- Utilizing operational strategies and tactics that minimize, impacts to private lands and structures, resource damage, economic impacts, and minimize the disruption to local activities and businesses where practical:
- Provide timely initial attack assistance to the forest and local agencies within the TFR or as requested.

Commanders Intent: To meet the intent of these objectives to provide the highest level of customer services for all involved with or affected by the incident, all incident assigned personnel should be prepared to take the appropriate actions regarding:

- Maintaining good situational awareness within the sphere of their established work areas.
- Personal interactions with others both inside and outside the incident management organization or incident operational areas.
- Managing an incident-within-an-incident and familiarities with medical extraction points.
- Establishing and maintaining good 360-degree communications structures to ensure all critical and important messages reach the appropriate people in a timely manner.

Strategy: The Barry Point incident management strategy is based on "Values at Risk." Firefighters, the public and other incident responders being the highest value. We will engage the fire on our terms at the appropriate tempo, where probability of success is high and the risk is acceptable. A combination of tactics will be employed with consideration of values at risk noted above as well as communities, private property, and infrastructure. Tactical actions are based on the principles of point defense and a mix direct / in-direct effort as dictated by the situation.

The following are guiding principles.

- The **Right Plan** (i.e., as informed by the Risk Decision Framework)
- In the **Right Place** (i.e., where we have a reasonable probability of success)
- At the **Right Time** (i.e., when we have favorable conditions for efficient and effective suppression)
- With the **Right Assets** (i.e., those suppression assets needed to safely implement tactics in support of reasonable objectives)
- For the **Right Duration** (i.e., release resources as soon as they are no longer needed)

9. Prepared By (Planning Section Chief)

10. Approved By (Incident Commander)

ORGANIZATION ASSIGNMENT LIST

1. Incident Name

Barry Point Fire2. Date **8/23/2012**3. Time **1800**4. Operational Period **8/24-8/25/2012 0600 - 0600****5. Incident Commander and Staff**

Position	Name
Incident Commander	Mike Morcom
Deputy	Chris Hoff
Safety Officer	Craig Dixon/Greg Vergari/Sam Phillips (t)
Medical Unit	Dale Pospisil / Richard Warthen
Information Officer	Virginia Gibbons/Jim Whittington
Human Resources	Bill Otani / Michael Donch
Liaison Officer	Dwight Robanske (t)

6. Agency Representative

Agency	Name
US Forest Service	Rick Newton
US Forest Service	Kimberly Anderson
ODF	Gregg Pittman / Bill Hunt
READ	Michelle Barry / Mike Ramsey

7. Planning Section

Position	Name
Chief	Deb Schmidt
Resources Unit	Anne Shirley / Beth Kennedy
Situation Unit	Pat Hutchins /Brenda Hallmark (t)/ Jon Hanke (t)
Documentation Unit	Scott Wells
Demobilization Unit	Kyle Noble / Rod Matye
CTSP	Del Anderson / Jim Grace
IMET	Carl Cerniglia
FBAN	Todd Gregory
GIS	David Larson /Greg Hooper / Juanita Hernandez (t)
Training Specialist	Scott Wells

8. Logistic Section

Position	Name
Chief	Bob Thomas
Deputy	
Facilities Unit	Janel Winborne
Ground Support	Jeff Tanasse
Communications	Dennis Brigante / Jeff Keener
Food Unit	Dennis Donovan / Kiefer Yosemite
Medical Unit	Richard Warthen / Dale Pospisil
Security	Scott Carrigan

9. Operations Section

Chief	Steve Rawlings /Laura Mayer

INCIDENT Weather Forecast

FORECAST NO: 27
PREDICTION FOR: Day/Night SHIFT
SHIFT DATE: Aug. 24-25, 2012
TIME AND DATE
FORECAST ISSUED: Aug. 23, 2012, 2000 PDT

NAME OF FIRE: Barry Point
UNIT: Fremont-Winema NF
SIGNED: *Carl S. Corniglia Jr*
Incident Meteorologist

WEATHER DISCUSSION: High pressure will build over Washington and northern Oregon while a thermal trough of low pressure strengthens along the coast. This will result in a predominately north to northeast flow across the fire area through tonight. This will also result in cooler temperatures, low daytime minimum RH levels and very poor ridge top humidity recoveries tonight. Saturday will be a mild day with light southwest winds. Beyond that, a low pressure system is expected to meander around off the Pacific NW coast producing gusty southwest winds at times Sunday and Monday.

...Very Poor Ridge-Top RH Recoveries Tonight...

WEATHER FORECAST: Today

WEATHER: Sunny.
MAX TEMPERATURE: 74-79.
MIN HUMIDITY: 10-15%.
20 FT WINDS:
BRANCH II: Light wind becoming northeast 2 to 5 mph after 1000 then becoming west 3 to 6 mph after 1500.
BRANCH III: North to northeast wind 4 to 7 mph becoming northwest after 1600.
BRANCH I & IV: Northeast to east wind 5 to 9 mph becoming west after 1500.
HAINES INDEX: 4 (Low).
MIXING HEIGHT: Near 1000 ft. AGL rising to 6,000 ft. AGL. Inversion lifting and dissipating around 1400.

WEATHER FORECAST FOR TONIGHT:

WEATHER: Clear.
MIN TEMPERATURE: 47 to 52 ridges and 39 to 44 valleys.
MAX HUMIDITY: 25-35% ridges, 60-70% valleys.
20 FT WINDS:
BRANCH II: Northwest wind 3 to 6 mph. After 2200 wind becoming light in the valleys and east 2 to 5 mph across the higher ridges.
BRANCH III: Northwest wind 4 to 8 mph becoming north to northeast wind 3 to 7 mph after 2100.
BRANCH I & IV: Northwest wind 5 to 9 mph becoming north to northeast after 2100.
HAINES INDEX: 3 (Very low).
MIXING HEIGHT: Less than 1,000 ft. AGL.

EXTENDED FORECAST:

SATURDAY: Clear. Lows 38-44. Highs 77-83. Southwest winds 5 to 9 mph.
SUNDAY: Mostly clear. Lows 42-48. Highs 78-83. Southwest winds 10 to 20 mph with higher gusts.
MONDAY: Mostly clear. Lows 42-48. Highs 75-80. Southwest winds 10 to 20 mph with higher gusts.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #27	TYPE OF FIRE: Wildland
FIRE NAME: Barry Point	OPERATIONAL PERIOD: 24 hr 8/24/12
DATE ISSUED 08/23//2012	TIME ISSUED: 1900
UNIT: FWF	SIGNED: /s/ Todd Gregory FBAN <i>Todd Gregory</i>

INPUTS

FUELS

Fuels in the fire area are primarily composed of **cured grass**, mixed **grass and brush** (less than 2 ft. tall), and **timber with understory**. Primary timber species include mixed-sized Ponderosa Pine, Western Juniper, and True Fir (at higher elevations). Brush and understory includes Mountain Mahogany, Bitterbrush, conifer dog-hair thickets, sagebrush, and Ceonothus (at higher elevations). Snags are common throughout timbered areas and may contribute to spotting. Live fuels will contribute to fire intensity and rate of spread.

WEATHER SUMMARY

See fire weather forecast for detailed information.

FIRE BEHAVIOR INPUTS

Late afternoon warming and drying still poses a risk for flare-ups and spotting. Early detection is key in containing spots. Burning periods will continue to shorten so large fire growth potential is limited. Expect similar flare-up potential and burning off of interior islands. Fuels are still very dry and fire behavior will change rapidly with wind. Night time conditions will continue to diminish any fire behavior and fine fuels will continue to reach moisture of extinction.

* Fine fuel moisture of 4% (exposed fuels) and 6% (shaded fuels) today.

* Fine fuel moisture nearing or surpassing 15% tonight.

* Probability of Ignition (PIG) 75% today, 10-20% tonight.

Bitterbrush moisture 90%, Sagebrush 50%-60%

Today

Fuel Type	Rate of Spread	Flame Length	Spotting Distance	*15 mph wind and 40% Slope
Grass (GR2)	15-30 ch/hr.	3-4 feet	0.2 mile	130-140 ch/hr 8-10FL
Grass with mixed shrub (GS2)	8-14 ch/hr	3-4 feet	0.2 mile	125-140 ch/hr 11-12FL
Timber with Understory (TU5)	4-6 ch/hr	5-6 feet	0.2 mile	30-35 ch/hr 13-14 FL
<i>*GS2 - primary spread fuel type</i>	<i>*low wind condition</i>		<i>*from flare-ups</i>	<i>*High intensity condition Spotting Dist. 0.7mi w/30 mph ws</i>

Tonight

Fuel Type	Rate of Spread	Flame Length	Spotting Distance
Grass (GR2)	0-4 ch/hr.	0-1 feet	0.1 mile
Grass with mixed shrub (GS2)	0-2 ch/hr	0-1 feet	0.1 mile
Timber with Understory (TU5)	2 ch/hr	3-4 feet	0.1 mile
<i>*GS2 - primary spread fuel type</i>	<i>*forecasted winds</i>		<i>*from flare-ups</i>

SPECIFIC:

All Divisions

Patrol and mop-up.

AIR OPERATIONS: No issues expected

FIRE BEHAVIOR SAFETY

Complacency is a killer! Remember the task at hand. Keep alert for hazards and changing conditions. Have a good shift.

Safety Message

PNW Team 2

INCIDENT: Barry Point Fire

OPERATIONAL PERIOD: Day/Night 08/24/12

TOPICS:

Transition of Command
Wild Animal Encounters
LCES

NARRATIVE:

Transfer of Command

One of the most dangerous times on a fire is during the transfer of command. Firefighters requires clear command and control directions. Having a clear understanding of who is in command, leaders intent, task, purpose & end state is paramount to our overall success.

- Be certain to brief others as needed
- Debrief your actions
- Communicate hazards to others
- Acknowledge messages
- Ask if you are uncertain.

Wild Animals

Animals have been sighted on our fireline and roadways including Bees, Wasps, Deer, Bear, Cougar, Coyote, and more.

Remember prior to encountering a wild animal implement the following techniques:

- Make supervisors aware of known allergies to bee stings and carry Epi kit.
- Consider limiting deployment of personnel with known allergies to work areas with close by pre-planned medivac sites.
- Keep fireline and spike camps clean.
- Backhaul garbage daily.

Lookouts, Communications, Escape Routes, and Safety Zones

- Assign experienced firefighters to be your lookouts. Make sure they can see the fire AND your work area. Communicate frequently to maintain your situational awareness.
- Make sure you can also communicate with your crewmembers, division supervisor, adjacent forces, and Arapaho Communications.
- Find, flag, and brief the location of escape routes before engaging the fire. Always have a Plan B if your primary escape route is compromised. Estimate escape time based on the slowest crewmember.
- Be realistic about how big your safety zone needs to be. If you need to use it, the fire will be up and moving and probably a lot hotter than when you went in to work the fireline. You should be able to stay in the safety zone without needing a fire shelter.

REMEMBER – EVERYONE GOES HOME!

SAFETY OFFICERS

Craig Dixon SOF 1/*Greg Vergari* SOF 1/ *Sam Phillips* SOF (t)

8. Medical Emergency Procedures					
In the event of a medical emergency provide the following information to the Communications Unit:					
<ol style="list-style-type: none"> 1. Declare the nature of the emergency Medical injury/illness? If injury/illness is it Life Threatening? 2. If Life threatening, then request that the designated frequency be cleared for emergency traffic. 3. Identify the on-scene point of contact (POC) by Resource and last name (i.e. PIC is TFLD Smith). 4. Identify nature of the incident, number injured, patient assessment (s) and location (geographic and GPS coordinates). 5. Identify on-scene personnel by position and name (i.e. .EMT Freshwater). 6. Identify preferred method of patient transport. 7. Request any additional resource and/or equipment needed. 8. Document all information received and transmitted on the radio or phone. 9. Identify any changes in the on-scene point of Contact or medical personnel as they occur.

Human Resource Message

Duty

Be proficient in your job, both technically and as a leader

Take charge when in charge
Adhere to professional standard operating procedures
Develop a plan to accomplish given objectives

Make sound and timely decisions

Maintain situational awareness in order to anticipate needed actions.
Develop contingencies and consider consequences.
Improvise within the leader's intent to handle a rapidly changing environment.

Ensure that tasks are understood, supervised and accomplished

Issue clear instructions.
Observe and assess actions in progress without micro-managing.
Use Positive feedback to modify duties, tasks, and assignments when appropriate.

Your friendly Human Resource Specialists
Michael &, Bill

Quote of the day

"I believe that every right implies a responsibility; every opportunity, an obligation; every possession, a duty."

John D. Rockefeller, Jr., *speech (1941)*
