Incident Name: Barry Point Unit: OR-FWE Date: August 9, 2012 Time: 2100

Completed by: Brian J. Watts – Incident Commander ORIIMT4

Category	Element		Value = 1	Value = 3	Value = 5	Value Assigned	Remarks
Safety	Firefighter Safety		Low exposure and simple hazards.	Moderate exposure with several hazardous conditions.	High exposure that requires multiple mitigation strategies.	3	Dry Fuels and Hot/Dry Temperatures, Snags, Steep Terrain
	Public Safety		Low exposure or contact with the fire.	Moderate public exposures to hazards. Trigger points established.	Closures of highways and or evacuations are underway, or are likely.	3	Evacuation of Dog Lake Campground in place, Area/Road Closure in place, Level 2 Evac in place for private structures on South end of Drew's Reservoir.
Communities and Structures	Probability fire will impact residences or businesses within	In 2 Days	0 - 30%	31 – 70%	71 – 100%	3	Level 3 Evac issued for residences on south end of Drew's Reservoir. Structure Protection in place.
		In 5 days	0 - 30%	31 – 70%	71 – 100%	3	Private land and residences on south end of Drew's Reservoir.
	Probability fire will impact community assets within	In 2 Days	0 - 30%	31 – 70%	71 – 100%	1	
		In 5 days	0 - 30%	31 – 70%	71 – 100%	1	
	Probability fire will impact other structures within	In 2 Days	0 - 30%	31 – 70%	71 – 100%	5	Dog Mountain Lookout
		In 5 days	0 - 30%	31 – 70%	71 – 100%	5	Dog Mountain Lookout
Resource Values	Impacts		Impacts are acceptable	A single resource value will be highly impacted or several values will be moderately impacted	Likely impact to multiple values is very high	5	Purchased timber sale within close proximity of fire, grazing lands, cultural resources.
Meeting Incident Objectives	Difficulty		Objectives are difficult to achieve or achievement of objectives imminent	Objectives are moderately difficult to achieve.	Objectives are easy to achieve.	3	The objective to minimize fire size is anticipated to be difficult to achieve due to dry fuels, weather, and steep terrain.
	Timing to Meet		>9days or < 2 days	5-8 days	2-4 days	3	Fuel conditions, terrain, fuel type will entail time to achieve Incident Objectives. Uncertainty on holding east flank which is currently west of Dog Mountain.
Category	Element	Low	Moderate	High	Ranking and Comments		
Social / Political Considerations	Complexity	No controversy or media interest	Some impacts which are generating controversy with internal and external contacts.	High impacts are generating controversy with internal and external contacts.	Moderate – Fire behavior and growth exhibiting today has increased public interest in the incident. Minor controversy at this point, media interest picking up.

Incident Name: Barry Point Unit: OR-FWF Date: August 11, 2012 Time: 0800

Completed by: Brian J. Watts – Incident Commander ORIIMT4

Category	Element		Value = 1	Value = 3	Value = 5	Value Assigned	Remarks
Safety	Firefighter Safety		Low exposure and simple hazards.	Moderate exposure with several hazardous conditions.	High exposure that requires multiple mitigation strategies.	5	Dry Fuels and Hot/Dry Temperatures, Snags, Steep Terrain. Travel times increasing, spike camps are being discussed.
	Public Safety		Low exposure or contact with the fire.	Moderate public exposures to hazards. Trigger points established.	Closures of highways and or evacuations are underway, or are likely.	3	Evacuation of Dog Lake Campground in place, Area/Road Closure in place, Level 2 Evac in place for private structures on South end of Drew's Reservoir. Area closure discussions have been initiated and are likely.
Communities and Structures	Probability fire will impact residences or businesses within	In 2 Days	0 - 30%	31 – 70%	71 – 100%	3	Level 3 Evac issued for residences on south end of Drew's Reservoir. Structure Protection in place. Level 1 Evacuation issued for area South of Dog Lake Road to the California Border for structures and residences west of agriculture lands east of Forest Boundary.
		In 5 days	0 - 30%	31 – 70%	71 – 100%	3	Private land and residences on south end of Drew's Reservoir and adjacent to east of forest boundary south of Dog Lake Road to the California border.
	Probability fire will impact community assets within	In 2 Days	0 - 30%	31 – 70%	71 – 100%	5	Economic base of ranching and private timber land.
		In 5 days	0 - 30%	31 – 70%	71 – 100%	5	Economic base of ranching and private timber land.
	Probability fire will impact other structures within	In 2 Days	0 - 30%	31 – 70%	71 – 100%	5	Dog Mountain Lookout
		In 5 days	0 - 30%	31 – 70%	71 – 100%	5	Dog Mountain Lookout
Resource Values	Impacts		Impacts are acceptable	A single resource value will be highly impacted or several values will be moderately impacted	Likely impact to multiple values is very high	5	Purchased timber sale within close proximity of fire, grazing lands, cultural resources.
Meeting Incident Objectives	Difficulty		Objectives are difficult to achieve or achievement of objectives imminent	Objectives are moderately difficult to achieve.	Objectives are easy to achieve.	1	The objective to minimize fire size is anticipated to be difficult to achieve due to dry fuels, weather, and steep terrain. Big box strategy being implemented.
	Timing to Meet		>9days or < 2 days	5-8 days	2-4 days	1	Fuel conditions, terrain, fuel type will entail time to achieve Incident Objectives. Uncertainty on holding east flank which is currently west of Dog Mountain. This is a long duration event.
Category	Element	Low	Moderate	High	Ranking and Comments		

Societal / Political Considerations	Complexity	No controversy or media interest	Some impacts which are generating controversy with internal and external contacts.	High impacts are generating controversy with internal and external contacts.	Moderate – Fire behavior and growth exhibiting today has increased public interest in the incident. Minor controversy at this point, media interest picking up.

Incident Name: Barry Point Unit: OR-FWF Date: 08/17/12 Time: 1620 Completed by: Chris Hoff – PNW2 IMT

Category	Element		Value = 1	Value = 3	Value = 5	Value Assigned	Remarks	
Safety	Firefighter Safety		Low exposure and simple hazards.	Moderate exposure with several hazardous conditions.	High exposure that requires multiple mitigation strategies.	5	Dry Fuels and Hot/Dry Temperatures, Snags, Steep Terrain, thunderstorms.	
	Public Safety		Low exposure or contact with the fire.	Moderate public exposures to hazards. Trigger points established.	Closures of highways and or evacuations are underway, or are likely.	5	Evacuation of Dog Lake Campground in place, Area/Road Closure in place, Level 3 Evac in place for private structures on South end of Drew's Reservoir and west of Goose Lake. Area Closure in effect on 8/12/12. Area Closure on Modoc NF on 8/16. 3 residences in Westside area.	
Communities and Structures	Probability fire will impact residences or businesses within	In 2 Days	0 - 30%	31 – 70%	71 – 100%	5	Level 3 Evac issued for residences on south end of Drew's Reservoir and several residences in Westside Community. Level 3 Evacuation issued for area South of Dog Lake Road, for structures and residences west of Goose Lake in Modoc county. Level 1 Evacuation order issued for residences east of Drew's Reservoir. Trigger points for evacuations have been established.	
		In 5 days	0 - 30%	31 – 70%	71 – 100%	5	Private land and residences on south end and east of Drew's Reservoir, Westside Community and adjacent to forest boundary south of Dog Lake Road and south of the California border.	
	Probability fire will impact community assets within	In 2 Days	0 - 30%	31 – 70%	71 – 100%	5	Economic base of ranching, private timber land, recreational amenities and residences on southern perimeter are being impacted.	
		In 5 days	0 - 30%	31 – 70%	71 – 100%	5	Economic base of ranching, private timber land, recreational amenities and residences on southern and eastern perimeter are being impacted.	
	Probability fire will impact other structures within	In 2 Days	0 - 30%	31 – 70%	71 – 100%	5	Residences on southern and eastern perimeter.	
		In 5 days	0 - 30%	31 – 70%	71 – 100%	5	Residences on southern and eastern perimeter.	
	Resource Values	Impacts		Impacts are acceptable	A single resource value will be highly impacted or several values will be moderately impacted	Likely impact to multiple values is very high	5	Purchased timber sale within close proximity of fire, grazing lands, cultural resources, Collins Pine private timberlands.

Meeting Incident Objectives	Difficulty		Objectives are difficult to achieve or achievement of objectives imminent	Objectives are moderately difficult to achieve.	Objectives are easy to achieve.	1	The objective to minimize fire size is anticipated to be difficult to achieve due to dry fuels, weather, and steep terrain. Big box strategy being implemented.
	Timing to Meet		> 9 days or < 2 days	5-8 days	2-4 days	1	Fuel conditions, terrain, fuel type will entail time to achieve Incident Objectives. Uncertainty on holding south flank.
Category	Element	Low	Moderate	High	Ranking and Comments		
Social / Political Considerations	Complexity	No controversy or media interest	Some impacts which are generating controversy with internal and external contacts.	High impacts are generating controversy with internal and external contacts.	High – Fire behavior and growth being observed has increased public interest in the incident. Collins Pine land and timber are vital to economic base in the area. Political interest in both states is expected to increase as the fire increases in size and threatens private residences.
