## 1.2. Assessment

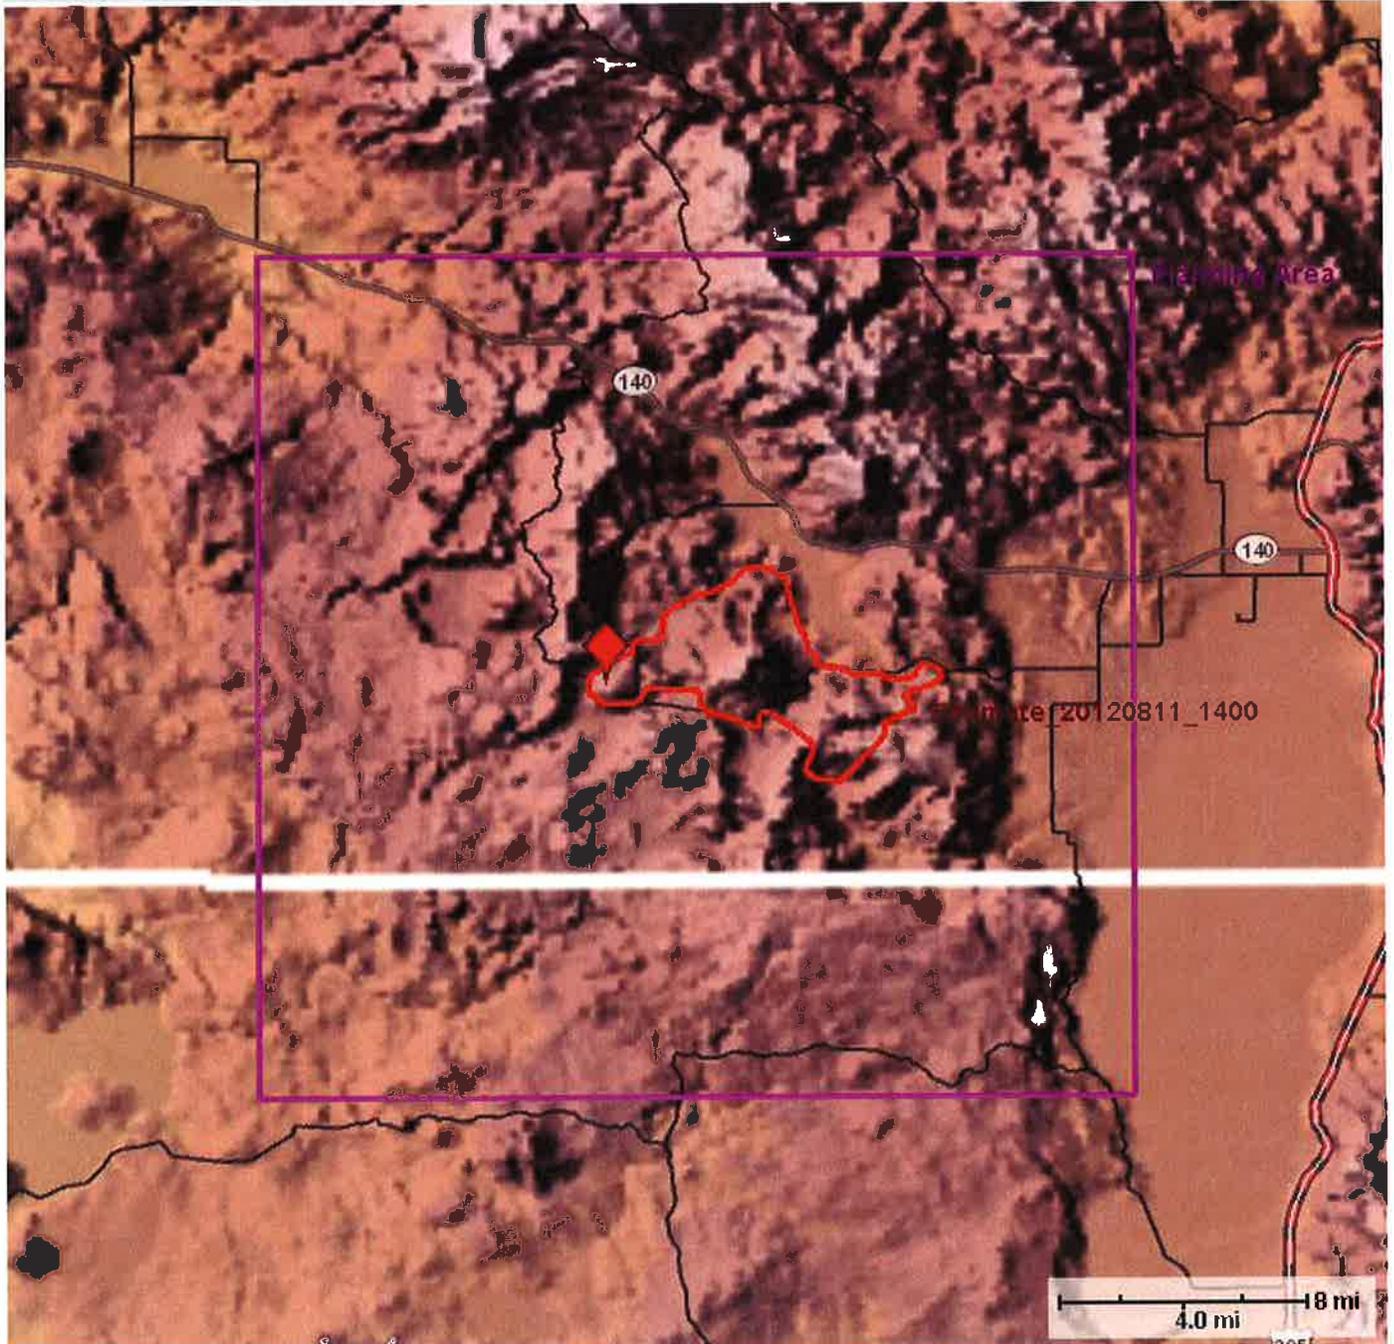

### 1.2.1. Incident Information

#### 1.2.1.1. Content

Incident Information

NAME	VALUE
Incident Name	Barry Point
Unique Fire Identifier	2012-ORFWF-000680
Responsible Unit Name	Fremont-Winema National Forests
FireCode	P6G47N
Incident Size	26,552 acres
Incident Cause	Natural
Incident Discovery	08/06/2012 16:26
Contained	
Controlled	
Out	
Jurisdictional Unit	ORFWF - Fremont-Winema National Forests
Jurisdictional Agency(s)	USFS
Geographic Area	Northwest
Point of Origin	42.1109 N / 120.8016 W
Owner Name(s)	Clint Albertson, Fred Way, Rachelle Huddleston-Lorton, Jody Perozzi, Mike Ramsey, Jessica Dhaemers
Nationally Significant	Yes

FIRE WEATHER FORECAST FOR OREGON AND NORTHERN CALIFORNIA  
NATIONAL WEATHER SERVICE MEDFORD, OR

# Fire Weather Zone Forecast

236 PM PDT SAT AUG 11 2012

...RED FLAG WARNING IN EFFECT UNTIL 8 PM PDT SATURDAY FOR HAINES INDEX FOR FIRE ZONES 624...625 AND 285...

...RED FLAG WARNING IN EFFECT FROM 2 PM TO 8 PM PDT SUNDAY FOR HAINES INDEX FOR FIRE ZONES 623...624...625 AND 285...

...FIRE WEATHER WATCH IN EFFECT FROM MONDAY AFTERNOON THROUGH MONDAY EVENING FOR HAINES INDEX FOR FIRE ZONES 624...625 AND 285...

...BREEZY AND GUSTY OFFSHORE WINDS AND POOR TO MODERATE HUMIDITY RECOVERIES TO CONTINUE IN THE COASTAL MOUNTAINS AND WESTERN SISKIYOU COUNTY TONIGHT THROUGH SUNDAY MORNING...

.DISCUSSION...HOT AND DRY WEATHER CONTINUES OVER THE INLAND DISTRICTS THROUGH MOST OF NEXT WEEK. THE THERMAL TROUGH SHIFTS WEST ALONG THE OREGON COAST TONIGHT AND AGAIN SUNDAY NIGHT. THIS WILL RESULT IN BREEZY WINDS OVER THE MID SLOPES AND RIDGE TOPS WITH POOR OVERNIGHT RECOVERIES. MUCH OF THE SAME IS EXPECTED SUNDAY WITH HOT AND DRY CONDITIONS WITH HAINES 6 EXPECTED OVER PARTS OF THE EAST SIDE AND SOUTHERN PORTION OF THE CASCADES. THESE CONDITIONS WILL ELEVATE THE FIRE DANGER...ESPECIALLY IN AREAS WHERE FIRES ARE ALREADY BURNING.

ORZ624-121100-

### 1.3. Objectives

#### 1.3.1. Content

##### Incident FMU List

Unit	FMU	Acres
CAMDF	GEN - General forest	105,629.5
CAMDF	NON	41,733.6
CAMDF	RLS	15,053.1
CANCA	Northern Cal General	131.6
ORFWF	02 - Fremont	260,228.1
ORLAD	Basin	19,253.7

##### Incident Objective List

Active	Inactive	Incident Objective
08/07/2012		Provide for firefighter and public safety.
08/07/2012		Manage the fire to minimize impacts to natural resources.
08/07/2012		Minimize impacts to heritage resources whenever possible.
08/07/2012		Use direct tactics whenever possible to minimize acres burned and loss of resource values.
08/08/2012		Manage incident to minimize impacts to private property and structures.
08/08/2012		Manage the incident to protect FS structures and recreation sites.
08/08/2012		Implement all strategies and tactics based on firefighter and public safety, taking into consideration sound, efficient as well as effective financial practices and appropriate Land and Resource and Fire Management Plans.
08/08/2012		Maintain and enhance relationships with local landowners and the public.

##### Incident Requirement List

Active	Inactive	Incident Requirement
08/11/2012		The lead resource advisor will ensure resource protection and mitigation measures contained in forest plans and associated amendments are implemented as practicable and needed considering suppression activities (e.g. noxious weed Modoc NF Fremont-Winema NF EIS/ROD).

##### Strategic Objective List

Unit/ FMU	Active	Strategic Objective
CAMDF	04/19/2011	<p>Forest-wide</p> <p>Utilize local cultural resource specialists or Native American representatives if possible prior to engagement and in the planning process to identify Native American</p> <p>Forest Service Manual 2360, (Emergency Undertaking) Section 106 of the National Historic Preservation Act.</p>

Strategic Objective List

Unit/ FMU	Active	Strategic Objective	
		traditional areas, and protect these areas when possible.	
CAMDF	04/19/2011	Forest-wide Goals for fire and fuels management include reducing threats to communities and wildlife habitat from large, severe wildfires and re-introducing fire into fire-adapted ecosystems.	Sierra Nevada Forest Plan Amendment ROD 2004 Page 34
CAMDF	07/13/2012	Aerial retardant drops are not allowed in mapped avoidance areas (on National Forest system lands) for threatened, endangered, proposed, candidate or sensitive (TEPCS) species or in waterways. This national direction is mandatory and would be implemented <b>except in cases where human life or public safety is threatened and retardant use within avoidance areas could be reasonably expected to alleviate that threat.</b>	Nationwide Aerial Application of Fire Retardant on National Forest System Land; Record of Decision; December 2011; page 2
CAMDF	04/19/2011	Forest-wide If feasible, avoid high intensity and crown fire within the 300 acre PAC for spotted owls, and the 200 acre PAC for northern goshawk.	Sierra Nevada Forest Plan Amendment 2004, pg. 59-61
CAMDF	04/19/2011	Forest-wide In CA spotted owl and northern goshawk PACS: If at all possible protect nest trees, minimize nest site disturbance, and protect at least 50 acre nest sites from both mechanical activities, and the oncoming fire.	Sierra Nevada Forest Plan Amendment 2004, pg. 59-61
CAMDF	04/19/2011	Forest-wide In CA spotted owl and northern goshawk PACS: Maintain large diameter trees, multi-layer canopy throughout the PAC.	Sierra Nevada Forest Plan Amendment 2004, pg. 59-61
CAMDF	04/19/2011	Forest-wide Cultural Resources: Utilize local technical specialists if possible prior to engagement, and in the planning process to identify categories of archaeological sites, and recommend appropriate level of protection in accordance with Forest Service Manual 2360,	Forest Service Manual 2360, (Emergency Undertaking) Section 106 of the National Historic Preservation Act.

Strategic Objective List

Unit/ FMU	Active	Strategic Objective	
		(Emergency Undertaking) clauses of Section 106 of the National Historic Preservation Act.	
CAMDF	04/19/2011	Forest-wide Protect communities from wildfire and prevent the loss of life and property.	Sierra Nevada Forest Plan Amendment ROD 2004, p. 45
CAMDF	04/19/2011	Forest-wide Protect national forest resources commensurate with values, hazards, risks, and management objectives.	LRMP page 4-2
CAMDF	04/19/2011	Forest-wide Take pre-suppression and suppression actions which protect life and property, and minimize resource degradation.	LRMP page 4-15
CAMDF	04/19/2011	Forest-wide Use appropriate suppression strategies of confine, contain, and control as specified in the Fire Management Action Plan. All responses will be for the purpose of control unless another response is authorized in the fire management action plan.	LRMP page 4-15
CAMDF	04/19/2011	Forest-wide Cultural Resources: Utilize local technical specialists if possible prior to engagement, and in the planning process to identify categories of archaeological sites, and recommend appropriate level of protection in accordance with Forest Service Manual 2360, (Emergency Undertaking) clauses of Section 106 of the National Historic Preservation Act.	Forest Service Manual 2360, (Emergency Undertaking) Section 106 of the National Historic Preservation Act.
CAMDF	04/19/2011	Forest-wide Maintain high quality fisher habitat. Provide for heterogeneous landscapes that may allow torching and small stand-replacing fire events but will be resilient and retain large tree elements to provide for future habitat and seed trees.	Sierra Nevada Forest Plan Amendment ROD 2004 Page 47
CAMDF/ GEN	06/30/2009	General forest Suppress all wildfires using the appropriate suppression response	LRMP page 4-211
CAMDF/ GEN	06/30/2009	General Forest In areas outside the Big Sage Fire Management Unit, suppress wildfires using the appropriate suppression response.	LRMP 4-194

Strategic Objective List

Unit/ FMU	Active	Strategic Objective
CAMDF/ GEN	06/30/2009	General forest      Protect national forest resources commensurate with values, hazards, risks, and management objectives.      LRMP page 4-15
CANCA/ Northern Cal General	09/30/2010	<p><b>1. F. Guiding Principles and Basic Policy Statements:</b> There are several basic principles that must be adhered to during any fire management planning and on the ground activities. These are further outlined in the Wildland and Prescribed Fire Management Policy Implementation Procedures and Reference Guide (IPRG), August 1998. These guiding principles correlate with <b>IAM Part 90, 1.2. Policy.</b></p> <ul style="list-style-type: none"> <li>• Firefighter and public safety is the number one priority in every fire management activity.</li> <li>• The role of wildland fire is an essential ecological process and natural change agent and will be incorporated into the planning process.</li> <li>• Fire management plans, programs, and activities must support land and resource management plans.</li> <li>• Fire management activities must be based on sound "risk management."</li> <li>• Fire management activities must be economically viable based on values to be protected, costs, and land and resource objectives.</li> <li>• Fire management plans must be based on the best available science.</li> <li>• Fire management plans must consider public health and environmental quality considerations.</li> <li>• Interagency coordination (Federal, Tribal, State, and local) is essential.</li> </ul> <p><b>Northern California Agency FireMP 2000 page 2</b></p>
ORFWF/ 02	08/30/2011	<p><b>Fremont-Forest-Wide Standards and Guidelines</b></p> <p>Provide and implement a fire protection program that is cost efficient and responsive to land and resource management goals and objectives. All wildfires will receive an appropriate management response utilizing a strategy of confine, contain, or control. Wildfires that threaten life, property, public safety, or improvements will receive aggressive suppression action using a control strategy. All high investment timber areas, such as seed orchards and evaluation plantations, will be protected from fire by taking aggressive initial attack and by considering their location in subsequent line location and attack strategies. Retardant Drops shall be carefully controlled in proximity to open bodies of water to preclude retardant from entering lakes or live streams.</p>

Management Requirement List

Unit/FMU	Active	Management Requirement
CAMDF	04/19/2011	Forest-wide      Sierra Nevada Forest Plan Amendment

Management Requirement List

Unit/FMU	Active	Management Requirement	
		During fire suppression activities, consider impacts to aquatic- and riparian-dependent resources. Where possible, locate incident bases, camps, helibases, staging areas, helispots, and other centers for incident activities outside of RCAs or CARs. During pre-suppression planning, determine guidelines for suppression activities, including avoidance of potential adverse effects to aquatic- and riparian-dependent species as a goal.	ROD 2004, RCO#4.115 Page 65
CAMDF	04/19/2011	Forest-wide Use the strategy of control for wildfire on private lands protected under agreement with the California Department of Forestry	.LRMP page 4-15
CAMDF	04/19/2011	Forest-wide Use screening devices for water drafting pumps. (Fire suppression activities are exempt during initial attack.) Use pumps with low entry velocity to minimize removal of aquatic species, including juvenile fish, amphibian egg masses and tadpoles, from aquatic habitats.	Sierra Nevada Forest Plan Amendment ROD 2004, RCO#4.110 Page 64
CAMDF	04/19/2011	Forest-wide Lightning-caused fires may be used to reduce fuel loads or to provide other resource benefits, such as conserving populations of fire-dependent species. Before wildland fires can be used, national forest managers must prepare a fire management plan that describes how prescribed fires and naturally caused wildland fires will achieve resource management objectives.	Sierra Nevada Forest Plan Amendment ROD 2004 Page 35
CAMDF	04/19/2011	Forest-wide Human caused wildfires will be suppressed in every instance and will not be managed for resource benefits.	FSM 5103.2
CAMDF	04/19/2011	Forest-wide For All Threatened, Endangered, and Forest Service Sensitive Species of animals and plants: Utilize local technical specialists if possible prior to engagement, and in the planning process.	Sierra Nevada Forest Plan Amendment 2004, pg. 59-61
CAMDF	07/13/2012		

Management Requirement List

Unit/FMU	Active	Management Requirement
CANCA/ Northern Cal General	09/30/2010	<p>The Forest Service will report to FWS and NOAA fisheries (as appropriate) all misapplications of aerially applied fire retardant (on National Forest system lands). The report and assessment of impacts will determine necessary mitigation measures, remediation action, monitoring needs, and whether there is a need for reinitiation of formal consultation. Reporting and monitoring of misapplications of fire retardant is outlined in the Implementation Guide for Aerial Application of Fire Retardant. <a href="http://www.fs.fed.us/fire/retardant/afr_handbook.pdf">http://www.fs.fed.us/fire/retardant/afr_handbook.pdf</a></p> <p>Nationwide Aerial Application of Fire Retardant on National Forest System Land; Record of Decision; December 2011; page 4</p> <p>a) Protect life and property (residences, administrative buildings, businesses, and related structures), cultural and ceremonial sites, and natural resources from the threat of wildland fire commensurate with values protected by:</p> <ol style="list-style-type: none"> <li>1) Providing for fast, effective initial attack to control unwanted wildland fires.</li> <li>2) Ensuring that structures are "Fire Safe," including adequate "defensible space."</li> <li>3) Establishing fire hazard reduction programs, where needed (including the use of prescribed fire where appropriate), to reduce fuel loading and maintain forest health.</li> <li>4) Implementing fire prevention measures (or complying with existing fire prevention laws, ordinances, etc.) to reduce the risk of ignitions.</li> </ol> <p>b) Prevent to the extent practical, vegetation and structure fires from escaping residential areas and burning into the surrounding mountainous resource areas.</p> <p>c) Provide gainful employment opportunities for tribal members. Northern California FireMP 2000 Page 3</p>
ORFWF/ 02	08/30/2011	<p><b>Fremont-Management Area 16: Minimum Management</b></p> <p>Provide the level of fire detection and suppression activities needed to protect adjacent lands and for the safety, health, and life of area residents.</p>

Management Requirement List

Unit/FMU	Active	Management Requirement
ORFWF/ 02	08/30/2011	<p><b>Fremont-Management Area 13: Developed Recreation</b></p> <p>For proposed recreation sites and private sector recreation sites (special use permits), all wildfires will be suppressed to minimize size and impacts.</p>
ORFWF/ 02	08/30/2011	<p><b>Fremont-Management Area 10: Wilderness</b></p> <p>Management objectives presented in the Gearhart Mountain Wilderness Management Plan will be followed (Appendix 5, LMP) Use suppression techniques that achieve minimal disturbance. All fires will be suppressed using the appropriate management strategy.</p>
ORFWF/ 02	08/30/2011	<p><b>Fremont-Management Area 9: Semi-Primitive Recreation</b></p> <p>Semi-Primitive Non Motorized: Allow fire to play a natural part within the setting. Semi-Primitive Motorized: Fires will be suppressed to avoid serious threats to life and/or property.</p>
ORFWF/ 02	08/30/2011	<p><b>Fremont-Management Area 7: Special Management Areas</b></p> <p>Give preference to those suppression methods resulting in the smallest practicable area burned and having the least effect on roaded natural recreational values.</p>
ORFWF/ 02	08/30/2011	<p><b>Fremont-Management Areas 3 and 14: Old-Growth Habitat for Dependent Species</b></p> <p>Old-growth areas should be a high priority for wildfire suppression.</p>
ORFWF/ 02	08/30/2011	<p><b>Fremont-Management Area 2: Threatened and Endangered Species</b></p> <p>Bald eagle management areas are highest priority for wildfire suppression if potential for damage to habitat is high.</p>
ORFWF/ 02	08/30/2011	<p><b>Fremont-Management Area 15: Fish and Wildlife Habitat and Water Quality</b></p> <p>Perennial Streams and Water Bodies: Machine constructed fire lines should not be built in riparian areas during fire suppression activities. Perpendicular crossings, with subsequent rehabilitation are permitted, but discouraged if alternatives exist. Intermittent Streams: No heavy equipment movement up and down stream channels and riparian areas during fire suppression is allowed. Ephemeral Draws: Equipment disturbance of duff and soil will be minimized. Seeps and Springs: No equipment disturbance except for restoration or improvement.</p>
ORFWF/ 02	08/30/2011	<p><b>Fremont-Management Area 1: Mule Deer Winter Range</b></p> <p>Wildfire will be evaluated for appropriate management action.</p>
Retardant Avoidance	05/31/2012	<p>The aerial application of fire retardant is allowed for fighting fires. Aerially delivered fire retardant should not be applied to any mapped terrestrial</p>

Management Requirement List

Unit/FMU	Active	Management Requirement
		<p>avoidance area, waterway or buffer. <b>The only exception to using aerially applied fire retardant in avoidance areas is for the protection of human life or public safety.</b> The Incident Commander is the decision maker.</p> <p>Information concerning the Record of Decision for the Aerial Application of Fire Retardant is available at <a href="http://www.fs.fed.us/fire/retardant/index.html">http://www.fs.fed.us/fire/retardant/index.html</a></p>

## 1.4. Course of Action

### 1.4.1. Content

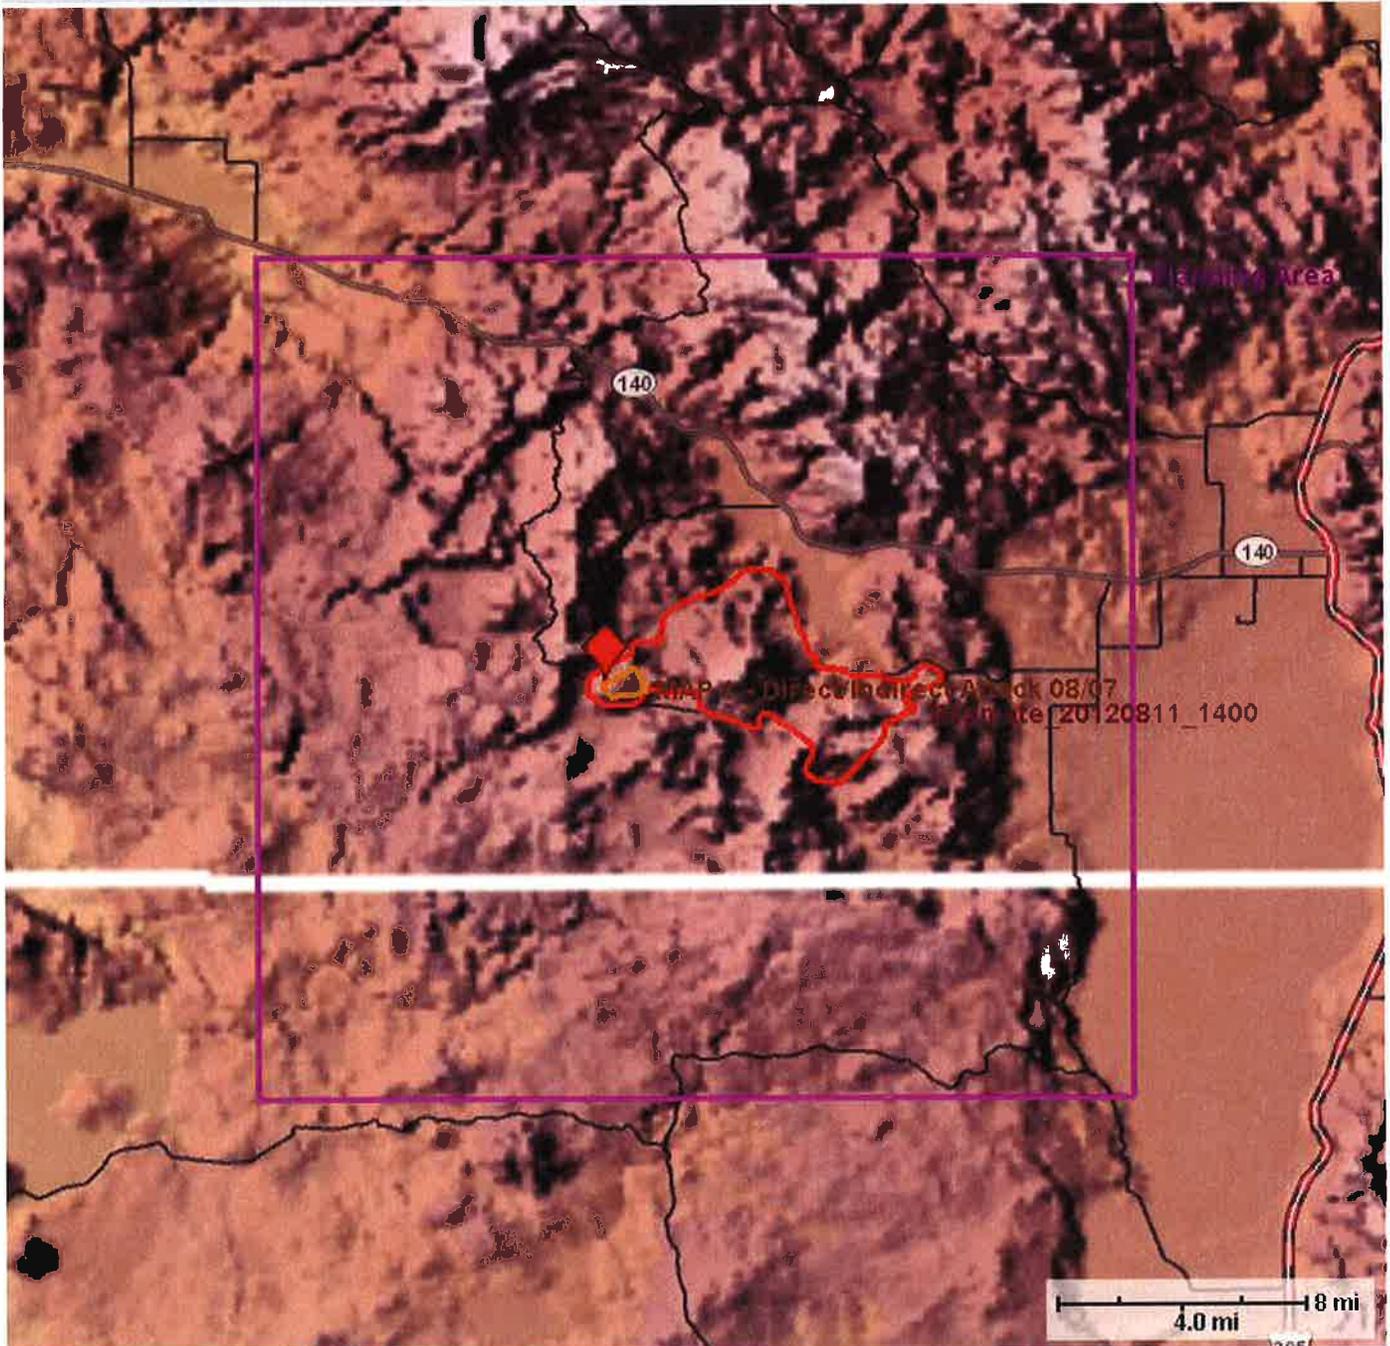

Estimated Cost

NAME	VALUE
Estimated Cost	\$10,000,000
Method(s) Used	Other

Course of Action

Active	Inactive	Action Item
08/07/2012		Follow the planned initial response.
08/08/2012		Minimize fire area west of Drews Reservoir.
08/08/2012		Prioritize protection of private property through coordination with ODF in concert with overall Strategic and Tactical Fire Planning.
08/08/2012		Develop and maintain a threat assessment of structures in proximity to fire.
08/08/2012		Minimize impacts to active timber sales.
08/11/2012		Identify, develop and execute opportunities at the landscape scale to ensure successful containment of fire.

**Management Action Point 1**

NAME	VALUE
Incident Name	Barry Point
Cost	
Shape	Direct/Indirect Attack 08/07
Activated	08/07/2012
Deactivated	

## Management Action Point 1

---

### **Condition**

If direct attack is not successful then use indirect strategies.

### **Actions**

If fire is not maintained within MAP1 then use indirect strategies.

### **Resources**

## 1.5. Validation

### 1.5.1. Content

#### Validation History

Date (CDT)	User	Action	Comments
08/11/2012 19:27	Albertson, Clint	Decision created	
08/11/2012 19:30	Albertson, Clint	The proposed Course of Action will satisfy the Objectives	Conditions and situation of ongoing incident directs a larger strategic approach to managing this fire.

#### Relative Risk

NAME	VALUE
Relative Risk	High
Duration	Medium
Saved By	Dhaemers, Jessica
Completed	08/08/2012 11:59 CDT

### Hazards Notes

Fire behavior is high due to heavy fuel loads and low fuel moisture.

### Values Notes

Timber Values, existing timber sales with associated equipment and saw logs, heritage resources, adjacent private land, grazing allotments, and limited infrastructure at risk.

### Probability Notes

Mid August, continuous fuels, single digit RH and predicted high to extreme weather conditions.

## **1.6. Rationale**

### **1.6.1. Content**

Cost has been modified to reflect evolving situation. Additional input will be needed. Course of action directs incident management to create and implement a higher level strategic approach to meet objectives.
