Koger Arch Trail is located on Stearns District of the Daniel Boone National Forest. Along this trail, rock steps lead down to a seasonal creek crossing. From here the trail goes up and to the left, paralleling the road at a distance. The arch is within 0.3-mile from the trailhead. Koger Arch is 54 feet wide, 18 feet high and 91 feet across.

Return to the trailhead by retracing your steps, or continue on the trail through the arch and up the steps for 0.2-mile to reach the Sheltowee Trace National Recreation Trail.

Connections: Sheltowee Trace National Recreation Trail Section 35.

There is limited parking at the trailhead on County Road 582 just past the trail. It is recommended that vehicles turn around at the top of the hill and come back to park on the wide shoulder just before the trail.
